

PRESIDENT'S ADDRESS.

At the Annual Meeting of the South Grey Women's Institute.

As it falls to my lot to preside over the third annual meeting of the S. G. W. I. I may tell you of some of the work that this Institute is doing. During the past year we have held a number of meetings. Last July we had two lady delegates, Miss Beam and Miss Roddick. These ladies conducted five meetings in S. G. We tried to start a branch at Allan Park but failed, as we could not get any of the ladies to take hold and work. The meetings were fairly well attended. Miss Beam spoke on "Cheerfulness in the Home," at Durham and Allan Park, and at Elmwood on "Butter Making." Miss Roddick also addressed the meeting, meanwhile conducting demonstrations in cooking. She made deserts in Durham and cooked vegetables and made salads at other points. The Secretary and myself accompanied these ladies to Elmwood and we had a very pleasant and profitable time.

We held our annual meeting in Durham last year and we had Miss Laura Rose of Guelph with us.

She gave us a splendid address on the "Work of a Week." She just told us how she would do each day's work. We held meetings in August, September, October and November; two in Guelph, one in Bentinck and one in Egremont. These were very well attended and we had papers on different subjects at every meeting. There is also a question drawer at each meeting.

We sent a delegate to Guelph to attend the convention in December and she brought home an excellent report which was read at our meeting in Durham in January. It was very stormy and there were not many at the meeting, but we had several papers on home-nursing which were listened to very attentively.

We have had one meeting in Egremont this last month.

We find it impossible to meet in the winter as the roads are so bad and the members are so widely scattered over the four townships. Now this is just our own branch of the Institute. I think the Secretary will be able to tell us about the other branches, and we hope they are going on working and meeting with success.

There is often a thought comes to my mind something like this: I expect to pass through this world but once, if there be any kindness I can show or any good thing I can do to any one near me, let me do it now; let me not neglect it for I shall not pass this way again. We should always be doing what we can to help each other to make this life better and pleasanter.

The women of some countries are not thought so much of as those in our own dear land. Here they rule their own homes and are accounted first importance. They have a great work to do. On them devolves the duty of inculcating the spirit of thrift—thrift properly defined means care and prudence, making the best of what we have. In this we should try to do our very best, for every little counts in home-making.

Women's Institutes have opened up a wide field of usefulness for the women of the farm, so many subjects being dealt with that relate to the well being of that which makes life not only profitable but enjoyable as well. There is something about the Women's Institute which brings us in common touch with one another. It seems to be the means of bringing about the old time sociability by removing that spirit of gossip and jealousy, and giving something else to think about. If we do not make it the means of enlightening and broadening our minds, it is useless to keep it up.

A woman's duties are many; her possibilities are even more. Wherever her life touches another, there she has had opportunity. The young girls who shall come to reside over the homes of Ontario will be far better fitted to assume the responsibilities that were the majority of their mothers when they came to reside over the new home that marriage gave them. This is due to the different educational schools which are being established in our land.

It is our custom to appoint new officers at our annual meeting. You have now a President, Vice-President and board of directors to elect. I assure you I feel more than obliged to you for your kind helpfulness and sympathy for the past year. I know I have made many mistakes but you have borne with me and given me every encouragement. In justice to myself I can conscientiously say that I have at least tried to do my best, but if I have failed, I thank you again for your forbearance, and whoever my successor may be she can ever rely on my assistance and help in all she undertakes for the good of the Institute.

Yet allow me to say in closing that the greatest boon towards making the home happy is God's richest blessing resting upon that home. Let every member of the family live each day, each hour of their lives trusting in God for everything and then, and not till then will the homes experience that peace which the world cannot give. Mrs. Thos. McGirr.

The Verdict of Public Opinion.

It is with the best article every time. That's why Putnam's Corn Extractor has been in the lead for the last half century. In cures corns painlessly in twenty-four hours and never never fails. Use only Putnam's for corns and warts.

Corner Concerns.

Mr. John Barbour left last Wednesday to spend a few weeks on the Manitoulin Island with his sister.

"Colin's at the Door," sounds charming in a good old Scotch song, but Colin of the mill gang at the door talking love for dear life to the daughter when the old man wants to get a good night's rest, isn't quite so delightful.

A magic lantern and gramophone concert was given in the school on Wednesday night by a blind man. The attendance was very good.

Mrs. Guy Williams will leave to join her husband at Tisdale, Assinaboia, N. W. T., the latter part of this week. They will commence life as farmers, having homesteads there.

If the Pomona Scribe will allow us the privilege we will tell you how Mr. and Mrs. Ben Crittenden happened to be visiting up at Mrs. Thos. Anderson's and met a Mrs. Mantle of Ayr, who is also visiting in that part at present. As Mr. and Mrs. C. at one time resided in Ayr when the trio got together they were a most congenial element.

So your Traverston correspondent swore because an old sow rooted up the roadside in his part. To show his feelings over a little thing like that seems like a case of cussed, and cussed just because that was the kind of a cuss he was. An old sow in this part last week broke into a building ate all the straw hats in sight, destroyed dinner baskets and ate the contents and ripped up some coats and cloaks for bedding, yet we didn't swear. Other people will do that for us and run chances of getting rewarded.

A siding was put in to the mill from the cement track and a few loads of lumber has been shipped out. It is found to be a great convenience and saving of money.

On account of the wet weather some farmers have just nicely got their potatoes planted, others who got them in early tell us they have decayed in the ground so they will have to start over again and be in the race with rest of us.

The Man Who Works Hard.

Perseverance and will-power he must have, but whether he has strength and vigor is another consideration. Hard working men usually have irritable nerves and should fortify their system with a course of Ferrozone, a tonic that rebuilds and revitalizes beyond all telling. It's just wonderful the strength that Ferrozone imparts to broken-down men. It forms new blood, supplies the system with abundant nourishment, and where formerly there was tiredness and lassitude Ferrozone establishes a reserve of energy and vim. Try Ferrozone price 50c. per box.

OFF TO THE ASSEMBLY.

It is a far cry from Vancouver to St. John and yet it seems fitting that the voice that a year ago whispered to the young men "go West" should this year call to the venerable assembly to turn toward the land of the rising sun.

As most of your readers are aware there are two main routes leading to St. John, one round by the old city of Quebec, along the banks of the St. Lawrence, down by the bay of Chaleur and away by the northern extension of the Bay of Fundy to the city that has long been the lumbering centre of the East. The other route takes you from Montreal by a direct line across the state of Maine to McAdam and thence along the valley of the St. John River down to the Chief City of New Brunswick. Measured by actual mileage, the latter is much the shorter route, but by the more practical measurement of dollars and cents they are the same. By the shorter route the actual running time is less, but those who travelled on, on Monday evening reached St. John slightly ahead of those who by the shorter route left Toronto on Tuesday morning. The route by the Intercolonial offered more sight seeing and more travelling for the money than the other, but remembering the Scottish advice "gang right through" I selected the shorter route. Evidently the C. P. R. were doubtful of the popularity of their own route for the "special" that was mentioned in a circular from the company was not sent out. However two day coaches a dining-car and pullman bore the placards with the inscription, "Private

Can be stopped in a few minutes and permanently cured in one hour by inhaling fragrant healing Catarrhazone. No remedy compares with Catarrhazone for cold in the head and nasal catarrh. It soothes and heals the inflamed mucous membranes, prevents sneezing and coughing, clears away the "stuffed up" feeling in the forehead. If you have not used Catarrhazone get it to-day and try it for your next cold. You'll be surprised at the efficiency of this delightful inhaler treatment which pleases everyone because it cures so quickly. Complete outfit \$1.00; trial size 25c.

STeady work for first-class plumbers, gas and steam fitters. Samuel A. Esswein, Columbus, Ohio.—3.

WHAT HAPPENS AFTER FIVE HOURS.

Dr. Bouchard, the eminent French physician, has furnished facts which show that if food is retained in the stomach more than five hours it becomes fermentative and putrefactive,—not digestive,—and that this is the starting-point of disease.

This food mass becomes putrid. Generates gas. The stomach dilates. There is a seeming lump-weight, burning, or belching. Blood, fibre, tissue, and cells begin to absorb poison from the stomach and alimentary canal instead of nutrient, and right here is the producing cause of Constipation, Diabetes, Bright's Disease, Uterine and Ovarian troubles, Rheumatism, Gout, Nervous and Mental Distress, Bronchitis, Heart Affection, Pulmonary Consumption, Jaundice, Liver and Skin Diseases. Inability of the stomach to properly handle food is mainly caused by overeating, drinking too much liquid, gases generated from slow digestion, preventing the mixing of food with gastric juice to properly prepare it for use in the body. Dr. J. S. Leonard worked for years in perfecting Anti-Fill, so that it would guarantee regular stomachic action, and its astonishing cures are proof of its mission being fulfilled; of its being the greatest system treatment in the world. 50 cents of drugists, or mailed to any address by WILSON-FRYE Co., Niagara Falls, Ont. Sample free.

SOLD IN DURHAM AT DARLING'S DRUG STORE.

GLENELG COURT OF REVISION.

The Council met May 30th and organized as a Court of Revision. All the members present. Each member made and subscribed to the necessary oath as such member, and took their seats. Mr. McFadden was appointed to the chair.

Appeals were heard and changes were made in the Assessment Roll as follows:

Geo Staples and Richard Barker were entered as tenants for lots 43 and 44, con. E. G. R.

Arthur McCrie was entered for 1 of 29, con. 1, E. G. R. Dan Robertson was entered for W. 1/2 lot 8, con. 11. W. Watterson was entered for E. 1/2 lot 8, con. 11. W. A. Wiggins was entered as owner for north halves of lots 5 and 6, con. 1, S. D. R., and separated from the Bell property. Ronald McPherson was entered as M. F. on lot 44, con. 3, N. D. R. Peter Muir was entered as owner for lot 21, con. 1, N. D. R.

In its own way equally charming was the quiet restful impression produced by Moose Lake, a resort for hunters and fishers in the State of Maine. As we swept along the banks of the St. John we found the waters running from the sea landwards which called to mind the fact that there is a tide in the affairs of men as well as in Funday Bay.

Lay and clerical, farmers and business men, judges, lawyers and governors, ministers and professors all gather to take part in the proceedings of the Assembly. The occupations of the way are varied in the extreme. One reverend clergyman was seen with a combination key with which he was exercising the ingenuity of his fellow passengers in the attempt to unlock its mystery. Then there was the old fashioned riddle and the story chest from which were taken "treasures both new and old." So the merry laugh went round till the title, "Long faced Presbyterians" seemed ill placed. Yet all was not so trifling. Notwithstanding all the merriment there were discussions as to life and work, till the problems of town and country were looked at from many a point of view and sympathies were awakened through a richer and fuller acquaintance. So we rolled on and there was the meeting of old friends with its gladness and sadness, and the contact with men of repute hitherto unknown, and the still more delightful discovery of character and power in some new acquaintance that sends one away with hope and confidence for the church of the future, yet withal the memories of the past are sad as well as glad. Ten years ago I went over the same route to a former meeting of the Assembly. On that occasion some of the happiest sallies were from Drs. Proudfoot, Cochran Thompson and Robertson and the dearly loved D. J. McDonnell with some former Assembly men. I recalled the incidents and we laughed over them again the tear all the time rising in the midst of the laugh. Such is life with its joys and sorrows its laughter and its tears.

One of the speakers yesterday spoke of the modern Saint John as being a kin to the ancient Saint of that name in their spirit of loving hospitality and already we are able to testify to the truth of the remark. There are many things more that might be said but I have written at too great length already. If I have time I shall try and write something of Assembly work for a future issue which through your kindness will reach the many friends I cannot reach individually. Meantime adieu

Yours Sincerely,
WM. FARQUHARSON.

Too Great A Risk.

In almost every neighborhood some one has died from attack of cholera or cholera morbus, often before medicine could be procured or a physician summoned. A reliable remedy for these diseases should be kept on hand. The risk is too great for anyone to take. Chamberlain's Colic, Cholera and Diarrhoea Remedy has undoubtedly saved the lives of more people and relieved more pain and suffering than any other medicine in use. It can always be depended upon. For sale by H. Parker.—2

Town Lots for Sale.

IN THE CENTRAL PART OF Durham. Four lots on the West side of Albert Street, for private residences. Now is the time to get these lots. For further information apply to

J. M. HUNTER, Durham.
