One of the curiosities of this curious age of ours was caught in the waters of the Choptank river some time ago. It was a good sized terrapin with a healthy, well developed oyster on its back and was both literally and figuratively an oyster on four legs.

THE COOKBOOK.

A loaf of stale bread is almost as good as when newly baked when wrapped closely in a towel and steamed through thoroughly.

Do not invariably throw away the oil from the can of sardines. It is a very good substitute for butter when codfish balls or made over dishes of fish are on hand.

The fishy taste can be removed from canned salmon or lobster by putting it in a colander, pouring boiling water over it and then letting it stand long enough to drain and cool.

COLLEGE AND SCHOOL.

The game of chess is still included in the curriculum of Russian schools. European physicians claim that clay modeling in public schools is a greater source of danger than the use of slates because of the germs which

stick in the clay. In East Indian schools mental arithmetic is a vastly more serious matter than it is in the schools of this country. Pupils of ten years are taught to remember the multiplication table up
