TO CONSUMPTIVES.

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease Consumption, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send, free of charge, a copy of the prescription used, which they will find a sure cure for Consumption, Catarrhs, Chastarrs, Bronchitis and all throat and lung troubles. He hopes sufferers will try his remedy, as it is invaluable. Those desiring a prescription, which will cost them nothing, may prove a blessing. Write to please address EDWARD A. WILSON, Brooklyn, New York.

Protecting Fruit Trees from Mice.

Last winter thousands of fruit trees were girdled and killed by mice, and the same thing will doubtless happen again the coming winter unless orchardists take precautions to prevent it. Mice are not usually very troublesome in orchards where clean cultivation is practised and rubbish is not allowed to accumulate as a shelter for them, but the orchardist will find it necessary to provide some sort of protection, if he wishes to be fairly sure of bringing his young trees safely through the winter.

The mice burrow along the ground under the snow in search of food, and as soon as they come to a young tree start to gnaw it. Wooden veneer is probably the most satisfactory protection against them and it has the additional merit of being a good preventive of sunscald. The veneer is wrapped closely around the trunk and tied; and an air space is left between it and the tree. These veneers cost from \$3.75 to \$5.00 per thousand. Ordinary building paper, which costs a mere trifle, is also a first rate protection, but it is not of much value as a preventive of sunscald. Tar paper is also effective, but as trees have been injured by its use, it is better to be on the safe side and use something else. In any case the lower end of paper should be banked with earth, so that the mice cannot readily get under it to the tree. A mould of earth about a foot high around the base of the tree will often turn them, and even snow trampled about the tree has proved effectual, but these are not so trustworthy as the veneers or the building paper.

The Fruit Division also points out that this plague of mice is largely due to the common practice of destroying every owl and hawk that can possibly be shot or trapped. It is a great mistake to do this. All varieties of owls and hawks are great mousers, indeed mice constitute the chief item in the bill-of-fare of most species. At least ten varieties of owls are classed as residents of Canada, and of these only the Great-horned owl is a menace to the farmer's poultry yard. Of a dozen species of hawks commonly found in Canada, only three are classed as chicken hawks, viz., the Sharp-shinned Hawk, the Goshawk and Cooper's Hawk. The four varieties usually known as "hen hawk" scarcely ever visit poultry yards, and an occasional depredation is far more than counterbalanced by their services as destroyers of mice rats, squirrels and other enemies of the farmer.

DESTROYING WEED SEEDS. There are many ways in which weed seeds can be destroyed on the farm, says Mr. G. H. Clark, Chief of the Seed Division, Ottawa. Quantities of weed seeds get out into the farmyard at threshing time. There is a general tendency just at that time to do things with a rush. The threshing machine is apt to be over crowded and many of the weed seeds, as well as a considerable quantity of grain, carried out with the straw. These are likely to germinate and grow with the next crop. A little care in the barn at the time of threshing and cleaning of grain, especially seed grain, will do much to lessen future labor with hoe and cultivator. Cleanings from grain containing weed seeds should be boiled or very finely ground. The seeds of many of the worst weeds are so small that it is not safe to trust to grinding to kill them; they should be boiled. It is not wise, either, to throw worthless screenings in roadways. Many of them will be carried away in mud on the hoofs of horses and the wheels of vehicles and so distributed widely. The seeds of most weeds of the Mustard family have such a pungent flavor or odor as to render them unpalatable to stock. The admixture with meal of even a small quantity of Worm-seed Mustard would render it useless for feeding purposes.

The enactment of laws to compel the cutting of weeds before they have ripened seed should be dealt with by the provincial and municipal authorities, because the majority of weeds are necessarily local in character, on account of the diversity of climate, soil and methods of farming. It may be said that further laws of this sort would not be enforced any better than those we now have. But it is the duty of all farmers to make sure that they are not responsible for the spread of weeds from their farms to others. Good farmers should endeavor to create a strong public sentiment against shiftlessness on the part of those who are disposed to allow their fields to become overrun with weeds, so that the danger which now exists, and the greater danger which is in prospect, may be met in such a way that noxious weeds will not become too great a burden upon those who make their living primarily from the cultivation of the soil.

THE DISSEMINATION OF WEED SEEDS. All weeds are disseminated by means of their seeds, while a considerable number also multiply through the medium of underground root stems. Among the latter we have Couch Grass, Canada Thistle, Perennial Sow-Thistle, Bindweed, Sheep Sorrel, and some others. When a new weed is discovered, it is a good plan to examine into its habits of growth and means of reproduction

Just in Jest

A cook's duties cover a wide range. Promises are as easily made as they are broken.

The girl with the most rings isn't always a belle. Faint heart never won fair lady, or brunette either.

Literature has other drawbacks besides return postage. When the prima donna gets sick it is an ill-starred venture.

Isn't it funny that a moth can get fat by merely eating holes. A woman may not waste her lace, and still may lace her waist.

Many a man feels bilious even before he gets the doctor's bill. The man who keeps his troubles to himself also keeps his friends.

No, Maud, dear, you don't have to be inquisitive to pump an organ. Even in wearing a shoe it is necessary to put one's whole soul in it.

To ask a conductor to carry you for nothing is not a fare proposition. Some coins are so worn and shiny that you can't make head nor tail of them.

Bread may be the staff of life, but money is a pretty good substitute for dough. Make hay while the sun shines, and your friends will borrow from you when it rains.

People who live where they have earthquakes naturally kick about the ground rents.

Heart Palpitation at Night.

Rattles even the strongest man, but to the average woman it is a taste of general purgatory. Take a little Nerviline in sweetened water and away goes the palpitation. You'll be saved lots of worry by keeping Nerviline on hand, which is a treasure for all sorts of pains and aches. Nerviline cures headache, stomach and bowel troubles quickly. Costs 25c. for a large bottle.

A Recipe.

Little grains of powder, Little gobs of paint, Make a girl's complexion Look like what it ain't.

The Germs of Cattarrh

Not only attack the passages of the head and throat but finally reach the lungs and cause consumption. Nothing destroys cattarrh so quickly as fragrant healing Cattarrhazone which relieves the cough, stops the discharge, takes all soreness from the throat. "I consider Cattarrhazone has a cure for Cattarrh and lung trouble" writes James E. Wetherell of Brighton. "It cured me after many good doctors failed to even relieve my trouble." Cattarrhazone can't fail to cure—it's guaranteed. Two month's treatment \$1.00; trial size 25c.

Thirty Millions for Flour

Canada Spends this Vast Sum Annually for Bread, Cake and Pastry.

Since Canada spends thirty millions a year for flour, and makes the best in the world, it would seem as if every Canadian family could and would have this flour. The Prince of Wales selected it for the Royal household and hence its name. No flour ever became popular so rapidly. It owes everything to the way it is made. The best mills in the Empire grind it again and again to make it fine enough. Process after process is applied and finally electricity to make it pure enough. Electricity is a new idea in flour making. It makes flour whiter, sweeter, purer and more nutritious. This process is controlled in Canada by the Ogilvie Flour Mills Co., Limited, and used exclusively in making Royal Household flour, which has captured Great Britain, the Netherlands, Scandinavia, Finland, South Africa, Gibraltar, the West Indies, Newfoundland and even far off Fiji and Australia, and Canada from coast to coast. Thousands of unsolicited testimonials pour in on the Ogilvie Company. The best grocers certify to their customers that no flour is the equal of Royal Household for either bread or pastry. The Ogilvie Mills at Montreal and Winnipeg, and its new mill being built at Fort William are taxed to their utmost to produce the famous flour fast enough, and yet their capacity is more than double that of any other flour concern in Canada.

Not The Slightest Danger

In using Dr. Hamilton's Pills of Mandrake and Butternut for constipation or piles. Highly recommended because they cause no griping pains. For prompt and certain cure use only Dr. Hamilton's. Price 25 cents.

W. A. CLEMONS, Publication Clerk.

Psychine Strengthened My Whole System

Pure Blood in your veins now will save you much in purse and person before the winter is over. PSYCHINE makes rich red blood, keeps people well and at their best.

"To-day I am enjoying good health, solely through the use of Psychine. When I began using Psychine, I was suffering with a heavy cold in the bronchial tubes, and a cough which seemed to rack me to pieces. The doctors' medicine gave me no relief, and I began to dread consumption working on me. With the second dose, Psychine benefited me and gave new strength. Psychine toned up my whole system, and quickly stopped the cough. I heartily recommend Psychine to persons run-down, in need of a tonic, or suffering with coughs, colds or catarrh. I bless the day I tried Psychine."—Allan Connor, Printer, near Picton, Ont.

PSYCHINE is pronounced SI-KEEN. For sale by all Druggists at \$1 and \$2. For further advice and information write Dr. Slocum, Limited, 179 King Street West, Toronto, Can.

SOLD BY ALL DRUGGISTS AT \$1 and \$2.
