THE WONDERS OF ELECTRICITY

Now Used for Purifying Flour

The New Process Makes Bread and Pastry Lighter, Sweeter,
Whiter and More Wholesome—Womer of Canada Delighted.

What is Electricity?

nobody knows, not even Edison.

What does it do?

everybody knows.

It runs street cars—telephones—auto-

mobiles,

furnishes light—heat—power

—detects and defeats disease

—enables the doctors to see clear

through a man.

Performs all sorts of wonders

—not least of which is acting as

Nature's Great Purifier

because when the world's dust, dirt

and disease germs have been taken up

by the air, and hang over the earth in

clouds—

electricity shoots lightning through

the clouds

—flash!—boom!—rumble!

—down comes the rain, the atmos-

phere is purified and we exclaim

—"how nice and fresh the air is since

that thunder storm!"

Electricity in the Flour Mill.

Something like that but minus the

thunder and lightning,

—silently—swiftly—surely

electricity performs its miracle in the

"Royal Household" mill—the only mill

in the Dominion of Canada where elec-

tricity is used for purifying purposes.

When the grinders—separators—

sifters—air-filters, have ground and re-

ground—purified and repurified the

flour again and again, all down through

the seven floors of the big "Royal House-

hold" mill until it is nearer perfection

than flour ever was before—electricity

says—

"I can do more than that" and send-

ing its mysterious charge of

Electrified Air

through the flour, removes the last, least

trace of impurity—gives it new life and

greater energy—makes a flour that is

pure enough,

sweet enough,

white enough,

to be worthy the name and fame of

"Royal Household"—the flour that is

more delicious—more healthful—more

satisfying than any other flour in the

world.

—the flour that makes the bread and

pastry used on the tables of Royalty—

the flour that thousands of Canadian

women are now using to make better

bread—better pastry than they ever

made before.

Every day hundreds of testimonials

are coming to the Ogilvie Flour Mills

Co. Ltd., Montreal, from women who are

using Royal Household Flour, accord-

ing to the "Royal Household" recipes

and say they are delighted with it.

The recipes will be sent free for the

asking

—ask for them—

"FLOURFAX."

Dislocated Her Shoulder.

Mrs. Johanna Soderholm, of Fergus
Falls, Minn., fell and dislocated her
shoulder. She had a surgeon get it
back in place as soon as possible, but
it was quite sore and pained her very
much. Her son mentioned that he
had seen Chamberlain's Pain Balm
advertised for sprains and soreness,
and she asked him to buy her a bottle
of it, which he did. It quickly re-
lieved her and enabled her to sleep
which she had not done for several
days. For sale by H. Parker.—2.

He Deserved Pity.

His suffering from Sciatica was so
great, but thanks to Nerviline he was
cured. "I suffered for three years
from sciatica," writes E. S. Jenkins
of Portland, "and no man ever suf-
fered more. I spent a small fortune
on different remedies but the only
one with real merit was Nerviline.
I used a few bottles of Nerviline and
was perfectly cured. I can recom-
mend Nerviline as a sure cure for
sciatica: it's excellent also for rheu-
matism and Neuralgia." Try Nervi-
line. 25c. at all Druggists

Developing Markets for Butter.

The Dairy Division of the Depart-
ment of Agriculture, Ottawa, has
again this year operated a number
of creameries in the North West
Territories, so that farmers in dis-
tricts adapted to dairying might be
able to obtain a cash income from
their cows until such time as they
are able to carry on the work for
themselves. Considerable attention
has recently been devoted to develop-
ing new markets for the butter pro-
duced, and the results have been
quite satisfactory. In spite of the
fact that the price of butter in East-
ern Canada has been lower this year
than last the patrons of the North
West creameries have received an
average net price of 20.98 cents a
pound for the butter manufactured
from the cream supplied by them,
over a cent a pound more than in
1908, and the highest price ever ob-
tained for the season's output of the
Government creameries.

British Columbia has naturally
been the chief market for Territorial
butter in the past and still continues
to take the bulk of the shipments.
Freight rates and other expenses are
so heavy that a satisfactory trade
with Great Britain cannot be carried
on at present, but a considerable ex-
port trade is being developed with
Japan and other Oriental countries.
Before the Osaka Exposition there
was scarcely any Canadian butter
sold to Japan, but in spite of the
war some 34,000 pounds have been
shipped to that country from the
Government creameries during the
first ten months of this year. The
total consumption of butter in Japan
is not large, but there are indications
of a decided increase in demand for
the Canadian article at the close of
the war.

The Yukon butter trade is also be-
ing recovered for Canada. The total
amount consumed in that territory
annually is over 500,000 pounds, of
which nearly 200,000 pounds has this
year been contributed by the Govern-
ment creameries in the North West
Territories. When the country was
first opened several shipments of
tinned butter sent up by Canadian
firms were found to be very inferior
in quality, and consequently, the
Canadian article got a bad name and
the market was practically monopoli-
sized by the United States. Indeed,
until 1903 about the only Canadian
butter used in the Yukon was that
sent to the Mounted Police. Mean-
while the Dairy Division had been
testing various styles of tins and
other packages, and had found that
a first class article, properly packed,
could be shipped there at a profit.
Orders for 90,000 pounds were re-
ceived last year and the amount has
been more than doubled this season
as mentioned above.

THE VALUE OF STRICT DAIRY LAWS.

There has been some opposition to
our stringent legislation such as the
Dairy Products Act of 1893 and the
Butter Act of 1903, which forbid the
manufacture and sale in Canada of
adulterated dairy goods, including
filled cheese and process butter.
The Hastings cheese case, recently
reported in the press, has shown that
if our dairy laws had been one whit
less strict, the Canadian cheese trade
might have received a blow from
which it would have required years
to recover. The case in question is
still fresh in the public memory.
A leading firm of grocers in Hast-
ings, England, was charged with sel-
ling as pure cheese an article which
the local analyst alleged was adu-
lterated with foreign fat. Fortunately
the Canadian High Commissioner
and the chief inspector in Britain
of the Department of Agriculture
were able to present a vigorous de-
fence, backed up by indisputable evi-
dence forwarded from Canada by the
Chief of the Dairy Division. It was
shown that in Canada the manu-
facture of margarine or "filled"
cheese was absolutely prohibited un-
der heavy penalties, and the condi-
tions of manufacture were such that
it was quite impossible for this to
happen without the fact coming to
the notice of the authorities. The
purity of the cheese was admitted
and the charge finally dismissed,
when it was found that the Canadian
contentions were proven by the re-
port of the Government Analyst,
which showed the sample in question
contained 43 per cent of milk fat and
no foreign fat whatever.

The case has attracted almost uni-
versal attention in Great Britain and
the triumphant vindication of the
purity of Canadian dairy products
will prove a great advertisement of
our goods. If however, our dairy
laws has been lax or our departmental
organization imperfect on either
side of the Atlantic, the result might
have been different.
