A FLOCK OF SHEEP. - We boast of this as a thinking age, and yet men, like a lot of sheep, will blat any shibboleth or follow any leader who tickles their ears. You will find educated men and successful business men who exercise judgment on everything else, but when it comes to politics they let out their thinking to newspapers and political leaders. Bryan and his clap trap about the " erown of thorns on labor's brow " is a sample of the windy chaff with which the crowd is caught in spite of the brains the Almighty gives them to distinguish and sift truth. "The prophets prophesy falsely, and my people love to have it so." The mental effort necessary to face the issue squarely and take a decided stand is too much for those who treat the whole responsibility of the franchise lightly. In the judgement day one of the important issues will be what men have done with that most precious and most potent force for good or ill, the right to vote.

There will come a day when the jaundice will be as plain in your face as it is manifest to-day in your liver

WHAT ARE YOU DOING?-The trouble is not with those who "plug" votes or those who buy them, it is with the indifferent elector, and the smooth tongued unctous partisan who is willing to profit by the methods of the machine Good people when brought face to face with the issue will shrug their shoulners and ask what can be done Politicians will deplore the evil, and by resolution or legislative enactment condemn and penalize it. Nine out of ten will dismiss the question with the remark that one party is as bad as another, but with the mental reservation that their party has whatever slight advantage there is. The cursed thing thrives because those who should rise in their might and smite it to death sit still and tolerate it. We need a red hot Amos or Isaiah to rise in the name of God and bring the responsibility home to those who allow the crafty politician and brazen heeler to use the ballot box for their neferious ends. Thank God there are always, enough men when they see their duty and are aroused to the necessity to do it to get up and set wrong right. What are you going to do about it? What right have you to shift your responsibility upon someone else?

DANGER AREAD, -Eternal vigilance is the price of liberty. Depose despotism, and unless a sleepless eye is kept on the throne an arrogant Napoleon will succeed a dissolute and self willed Louis. We prate about the voice of the people being the voice of God. It is ten times as likely if left to itself to become the voice of the Devil. The franchise is the glorious heritage bequeathed to us by a testament sealed with our father's blood. In these days it seems likely to become an instrument of hell to promote the interests of politicians, boodlers and social buccaneers. If there is one thing that is a menace to civilization to-day it is this "liberty" to vote. As nations grow more enlightened the right will be more and points out that the treatment of more jealousy guarded. mistcok the man. This is the way to put down backbiting. Let scandal mongers and character killers understand that they can't market their carrion at your door and you will not be troubled with their presence or product. The trouble is that most people either like a little gossip or have not backbone enough to put down evil speaking. It is a mean thing to sit by and see a man stabbed in the back. The man who tolerates it will soon do the same himself.

A FATAL VICE - When you find yourself leaning in the direction of a leather cushioned chair or on air filled settee look out. The fellow who is always looking for a nice place to sit down will have no place to rest his weary end, in a short while. It makes one sick to walk into some places and see able bodied men trying to do business with all their energies bent on getting the soft side of a chair. When a man gets the "sit down" disease before he is fifty it is all up with him. Laziness is fatal. You can cure almost any other kind of vice. Cecil Rhodes, at times-indeed generally-had a straightforward way of speaking. The Princess Radziwell in her recent book, had this anechote of him: -One day some tourists of importance were visiting Groote Schuur, where they had been entertained by Mr. Rhodes; he took them. himself, over the house and grounds, and at last showed them one of Lobengula's sons, whom he employed as a workman on his estate. This led to a talk about the Matabele rebellion, and the leader asked Mr. Rhodes what year it had taken place. The colossus thought for a moment, then called to the young native. "Look here," he said "what year did I kill your father."

Once prominent in political affairs, wealthy, and with friends by the score, John Burrows, who during the reign of "Bill" Tweed, of New York, was known as Tweed's mason, was sent last week to the almshouse on Blackwell's Island.
