

Your Worn-out Stomach.

What it needs is the strengthening influence of Dr. Hamilton's Pills—they work marvels where the stomach and digestion are poor. In one day the appetite increases and the whole system is rapidly strengthened. No stomach specialist could write a better prescription than Dr. Hamilton's Pills of Mandrake and Butternut. At all dealers in a yellow box, price 25c., or five boxes for one dollar.

IT PAYS TO ADVERTISE.

Breathes there a man with soul so dead,
Who never to himself has said,
"My trade of late is getting bad,
I'll try another ten inch ad."
If such there be, go mark him well;
For him, no bank account shall swell;
No angel watch the golden stair,
To welcome home a millionaire.
The man who never asks for trade
By local line or ad displayed
Cares more for rest than worldly gain
And patronage but gives him pain
Tread lightly, friends; let no rude sound
Disturb his solitude profound;
Here let him live in calm repose
Unsoiled except by men he owes.
And when he dies go plant him deep
That naught may break his dream-
less sleep;
Where no rude clamour may dispel
The quiet that he loved so well,
And that the world may know its loss
Place on the grave a wreath of moss
And on a stone above "Here lies
A chap who wouldn't advertise."

Sell Your Cold for a Dollar?

You surely won't stop at a dollar bill to cure that horrid sniffing cold? Go to any druggist and get "Cattarrhazone" and your cold will be a thing of the past. There is almost witchery in the swift way Cattarrhazone kills colds. But when you consider the penetrating, healing and antiseptic qualities of Cattarrhazone perhaps it's not so wonderful. Certainly there is no remedy half so prompt for colds or catarrh as Cattarrhazone. Refuse a substitute and insist on having only "Cattarrhazone."

The Late Thomas Aldcorn.

After an illness of several months from creeping paralysis there passed away at his residence, Lot 10, Con. 6 Egremont, one of the most highly respected citizens of this section. The deceased was born in Ville Cartier township near the city of Quebec, nearly 58 years ago. His parents came from Roxburghshire, Scotland. When he was sixteen years of age, they came to Proton, and he has resided there and in Egremont ever since, moving to the Sixth twelve years ago. About 27 years ago he married Miss Margaret McBain of Creemore, formerly also from Quebec, who with a daughter Miss Mabel, and a son William, is left to mourn his loss. His mother is also still living with her son William, in Proton, at the advanced age of 86 years. Three brothers, John and William, of Proton, and James, of Corbetton, and three sisters, Mrs. S. Smith and Mrs. Chas. Hall, Proton, and Mrs. Martin Moodle, Cartwright Man., also survive. In religion the deceased was a Presbyterian, a consistent member of Woodland church, and in politics a Reformer. The funeral takes place this afternoon to Mount Forest Cemetery.—Confederate.

Catarrh Cannot be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

Vapo-Resolene is sold by druggists or sent prepaid on receipt of price. A Vapo-Resolene outfit including a bottle of Creolene S.S. and for Creolene S.S. Send for Illustrated booklet. HARRISON MILLS CO., Ltd., Agents, 225 St. James St., Montreal, Canada.

THE USE AND MANAGEMENT OF INCUBATORS

Best machines are cheapest. Directions should be followed. At this season of the year the incubator question is an important one to the poultryman. Says F. C. Elford acting Chief of the Poultry Department, Ottawa. An inexperienced person or beginner in the poultry business should exercise the same care and judgement in buying an incubator that a farmer would use in selecting an expensive farm implement. In other words, he should take care to buy the best. It is simply wasting money to buy a poor machine, as it can never be depended upon. With a first class machine, all that the beginner has to do is to learn to run his machine according to the manufacturer's directions. Five or ten minutes, morning and night will be all the time required to care for the machine and it can be depended upon to maintain the proper degree of heat and bring the eggs to a successful termination of the hatch if the operator simply follows the instructions and does not interfere with the machine or attempt experiments on his own behalf. He is not likely to know more about the machine than the manufacturer.

To be considered first class, an incubator must not only hatch a large percentage of chicks, but those hatched must be large, strong and lively. The test of incubation is not alone in the number hatched, but also in the health, vigor and hardness of the chicks, and their ability to live and thrive. Faulty incubators are responsible for the death of many small chicks. Being poorly hatched, they should have, they struggle against heavy odds and die off in large numbers in the brooders. If, by buying a low priced and poorly constructed incubator, a man gets a 20% lower hatch or gets 20% lower vigor in the chicks that do hatch, he has bought the probability of failure in buying that machine.

A large hatch of strong chicks cannot be expected unless the eggs used are from a pen of thrifty, vigorous fowls. If the breeding stock is lacking in vitality the chicks are sure to be weak. The fresher the eggs are the greater is the vitality of the germs and the more chicks they will hatch. It is not very advisable to use for hatching, eggs that are more than ten days old, and these should be tested twice during the incubation period. The use of a simple egg tester will enable a man to know what eggs are fertile, and thus prevent him from blaming the machine when it is not at fault.

The advantages of a really good incubator are not all summed up in the larger hatches and the greater strength and vigor of the chicks. Such a machine renders us independent of the vagaries of the broody hen and enables us to get chicks when we want them. How much this means a study of market prices reveals. Everyone knows that the price of eggs is very high in the fall and winter, owing to the fact that the hens have not recovered from moulting and the pullets have not yet begun to lay. Obviously, then, if we want eggs to sell when prices are high, we should hatch our chickens of the American varieties in April or May, and of the Mediterranean varieties in May; then feed the pullets for growth so they will be mature and laying by November. The same thing holds good with chickens for market. The greatest profits are made by putting our eggs, our broilers, and our fatted chickens for the home or export trade upon the market when supplies are scarce and prices highest.

If an incubator is to be purchased, it should be ordered early, as there are apt to be vexatious delays in shipment and delivery and it is always advisable that the operator have an opportunity to run the machine for a few days before the eggs are placed in it, or until the regulation is understood and the temperature of the egg chamber can be maintained at 102½ degrees F. The incubator should be placed in a well ventilated room, preferably one unheated. The chicks developing in the shells require an abundance of fresh air. A bright airy cellar, or a well ventilated room having an even temperature is the best place. The ventilation should be so arranged that there will be outside air entering the room at all times, but without a direct draught blowing on the machine.

Finally, let me repeat the advice to follow implicitly the directions that accompany the machine. Study carefully the instructions regarding the care of the lamp and the control of temperature, the turning, cooling and testing of the eggs, and all other details. Then, when hatching commences let the machine alone. It is too late to rectify mistakes in management, and interference can only injure the hatch. The chicks should be left in the machine until they are thoroughly dry, and should not be fed the first day. When feeding commences be careful to feed sparingly. More small chicks are killed by over-feeding than by under-feeding.

W. A. Clemons,
Publication Clerk.

The Best Physic.

When you want a physic that is mild and gentle, easy to take and certain to act, always use Chamberlain's Stomach and Liver Tablets. For sale by H. Parker.

REASON No 6 WHY YOU SHOULD USE

Red Rose Tea

Because of the care in Selection and Blending.

My agents in the east are expert tea tasters, and every lot of tea that is sent down from the Gardens has to pass their inspection. They take samples from the chests and carefully taste them, then if the tea is fully up to the Red Rose standard, it is accepted and shipped; if not it is rejected.

The most important test of all, however, is when the tea arrives here, as during the passage through the Red Sea, the very great heat often affects the Tea very seriously. Immediately on arrival, samples are taken from each lot and subjected to the most rigid tests, and only those teas which have retained all their original flavor and strength are used for Red Rose (the balance is jobbed off in bulk).

When blended and ready to be put into sealed packages, it is tested again just to make sure no mistake has been made in the blending; nothing is left to chance.

Will you test us by ordering a package?

T. H. ESTABROOKS, St. John, N. B.

BRANCHES: TORONTO WINNIPEG.

Had to Undergo An Operation.

Friends of Mr. John Fields will regret to learn that he has had to undergo an operation in the Western hospital, Toronto. The cause is rather an unusual one, being what is known as a "dental cyst," which had to be removed. The cyst was a growth on the right lower jawbone, and was caused by a fracture of the bone in having a tooth extracted six or seven years ago. The growth was successfully removed on Monday of this week and is attracting considerable attention in dental circles. Mr. Field had recently been appointed to the foremanship of the composing room in the T. Eaton Company printing department, and will, we hope, soon be able to resume his duties.—Flesherton Advance.

New G. T. R. Station at Chesley.

Last week the G. T. R. staff moved into the new station at Chesley, and handsome quarters they have. Nothing is too good for Chesley, but the new station is certainly much better equipped and finer than the people of this village expected. The Grand Trunk Railway has certainly done the grand for Chesley. With the siding that has been put in, and the improvements that will be made next spring, the total outlay on the station and other improvements here will be about \$15,000. The new depot consists of a general waiting room, ticket office, smoking room, ladies' room and baggage room. Between the office and the baggage room is a commodious vestibule. The ceiling of the station is of the very choicest Georgia pine, and the wainscoting six feet high is of oak. Between the wainscoting and the ceiling the walls are nicely decorated. The station is illuminated by about fifty electric lights. The different rooms are heated by Guernsey's latest improved hot water radiators. There is 200 feet of platform extending along the station and when people get off the train and view the surroundings they cannot fail to be impressed with the idea that Chesley is a place of importance. The G. T. R. deserved the unanimous vote of thanks tendered the company by the citizens of this place at the public meeting on Dec. 21th, 1904.—Ent.

Will You Help It?

THE HOSPITAL FOR SICK CHILDREN

For it Cares for Every Sick Child in Ontario whose Parents Cannot Afford to Pay for Treatment.

The Hospital for Sick Children, College street, Toronto, appeals to the fathers and mothers of Ontario for funds to maintain the thousand sick children that it nurses within its walls every year.

The Hospital is not a local institution—but Provincial. The sick child from any place in Ontario who can't afford to pay has the same privileges as the child living in Toronto and is treated free. The Hospital had last year in its beds and out 761 patients, 267 of these were from 196 places outside of Toronto. The cost is 98 cents per patient per day, and there were 129 sick little ones a day in the Hospital.

"GOOD DAY, DOCTOR."

Since its foundation the Hospital has treated 10,371 children—about 300 of these were unable to pay and were treated free. Every dollar may be the translator of your kind thoughts into the Hospital kind deeds. Everybody's dollar may be the Friend in Need to Somebody's child.

Let the money of the strong be mercy to the weak. The Hospital pays out dividends of health and happiness to suffering childhood on every dollar that is paid by the friends of little children.

If you know of any sick child in your neighborhood who is sick or crippled or has club feet send the parent's name to the Hospital.

"SHE'S KNITTING" See the example of what can be done for club-foot children. There were 14 like cases last year and hundreds in 28 years.

BEFORE AFTER
Please send contributions to J. Ross Robertson, Chairman, or to Douglas Davidson, Sec. Treas., of the Hospital for Sick Children, College Street, Toronto.

JOHN CLARK

(McKinnon's old Stand)

HIS NERVES PLAYED OUT.

And Health Broke Down—A LIFE Saved By the Timely Use of Ferrozone.

Mr. Karl E. Newsome of Rothesay writes: "I owe a debt of gratitude to Ferrozone which saved my life after a severe seizure of Nervous Prostration. About a year ago my health gave out completely. I was in a weak irritable condition that I couldn't work, and found that the doctors did nothing for me but take my money. My druggist recommended Ferrozone as the best preparation for nervous troubles, so I commenced at once to take one tablet at meals. Every box of Ferrozone I took seemed to do me more good than the previous one, and it wasn't very long before I was strong enough to move around again. In three months I was completely cured and know I wouldn't be alive to-day if I hadn't used Ferrozone. It braced up my nerves, gave me a strong healthy constitution, and is certainly a marvellous restorer and tonic for nervous people."

The reason Ferrozone is so successful in curing nervous disease is that it contains the very elements that are needed to restore the wasted nerve cells. It is a nourishing, strength-giving tonic that costs 50c. per box, containing three weeks treatment. Six boxes for \$2.50. Sold by all druggists or by mail from The Ferrozone Company Kingston, Ont. Don't fail to get Ferrozone today if you are nervous.

JNO. A. DARLING
CHEMIST — AND — DRUGGIST
DURHAM, ONT.

THE CHILDREN

Try reasoning with children instead of scolding them.

A baby's weight at five months should be double its weight at birth. Tell your children white lies and they will soon hand you back the other color.

Baby's food should always be administered at regular hours to avoid indigestion.

Spray the children's throats occasionally with a very weak solution of carbolic acid and water.

A little application of the old fashioned maxim about going to bed early might do a good deal to solve the problem of the city child's nervousness.

When baby pulls at his ear, cries sharply and presses his head against his mother, let her beware of earache, a common but dangerous complaint in very young children.

Sick Headache.

This distressing ailment results from a disordered condition of the stomach. All that is needed to effect a cure is a dose or two of Chamberlain's Stomach and Liver Tablets. In fact, the attack may be warded off, or greatly lessened in severity, by taking a dose of these tablets soon as the first symptom of an attack appears. Sold by H. Parker.

A FATAL VICE.

When you feel yourself leaning the direction of a leather cushion chair or an air filled settee look of the fellow who is always looking for a nice place to sit down will be no place to rest his weary end in short while. It makes one sick walk into some places to see a bodied men trying to do business with all their energies bent on getting the soft side of a chair. When the man gets the "sit down" before he is fifty it is all over him. Laziness is fatal. A cure almost any other kind of ailment. A drunkard may brace up, a boy may get rid of a hot temper, a man may settle down, but a lazy one to give you a swift kick in time you feel yourself gravitating towards the cushion. No the in the bud. If you are an employer don't keep a sanitarium for the of the maids. Let somebody do the nursing. Give the lazy his walking ticket. That will him more good than all the preaching you can put into his head. There is more money in it for you.

Monocles In the English Army

About a century ago a British army order was issued forbidding officers to wear eyeglasses or spectacles. But a short sighted officer longing to a crack cavalry regiment had no mind to resign his commission or stumble blindly, and invented the single eyeglass. He called to account by the author he claimed that the monocle, of the singular number, did not contravene the order against spectacles and glasses in the plural. The tape accepted this literal reading of the law, and, becoming popular in the British army, the monocle adopted by civilian beaux.
