DURHAM CHRONICLE

W. IRWIN, Editor and Proprietor.

Durham, March 16, 1905.

BOARD OF HEALTH.

The Provincial Board of Health, subject to the approval of the Lieutenant-Governor in Council enacts the following regulations:

Whenever scarlet fever is present in any municipality, and the Medical Health Officer requires the assistance of sanitary police for the purpose of assisting such officer or officers in carrying out the health regulations in force in the municipality, he shall temporarily employ one or more persons as sanitary police until the council of the municipality shall have appointed such officer or officers. Should such council refuse or neglect to make such appointments on the request of the Medical Health Officer, they may be made by the Provincial Board of Health.

2. The Local Board of Health of any municipality, and where there is no local board, the Medical Health Officer, may, either with or without prior agreement, take possession of any non-occupied land or building not being nearer than one hundred and fifty yards to an inhabited dwelling, for the purpose of an isolation hospital, subject to the provisions of sections 22 to 28, R. S. O., 1897, Cap. 218, both inclusive, with reference to compensation and otherwise. Any title acquired shall vest in the municipality. The health authorities shall establish on said land, or in said building, an hospital, as provided under Sec. 100, Cap. 248, R. S. O. 1897, with necessary appliances for the reception and care of patients, and shall equip the same to the satisfaction of an officer of the Provincial Board of Health. An ambulance or other suitable conveyance shall also be provided.

3. Any default on the part of the authorities of any municipality in taking immediate and effective action in carrying out the regulations of the Provincial Board of Health, or any of the Health Acts of the Province, or any health by-law in force in the municipality, shall at once be reported by the Medical Health Officer to the secretary of the Provincial Board of Health, in order that the said board may take such measures as it deems requisite for placing the said municipality in a position, as regards its

sanitary arrangements, to effectively combat the said disease.

4. Every physician or householder who has reason to know or suspect that any person under his charge has scarlet fever shall report the same within twenty-four hours to the health authorities of the municipality, in the manner provided by the Public Health Act.

The Medical Health Officer of a municipality, or any of his medical assistants, having received information of a suspected case of scarlet fever therein, shall immediately inquire into the facts, either by consultation with the attending physician, or by his own personal observation, or by both. If the characteristic symptoms of the disease are not sufficiently developed at the time of investigation, the Medical Health Officer shall keep the case under observation until its true nature is discovered.

Until the time has arrived when, in the opinion of the Medical Health Officer, all cause for suspicion of danger is passed, the suspected case shall be isolated and otherwise dealt with in the manner as prescribed for a case of scarlet fever.

5. On the occurrence of the first or any case of scarlet fever in the municipality, the Medical Health Officer shall at once place the person attacked in the isolation hospital, tent, or other place provided under the Act, and shall take proper measures for the disinfection, or, if necessary, the destruction of all clothing which may have been exposed to the contagion, and for the disinfection, and purification of every house, conveyance, rail-car, steamboat, sailing vessel, carriage or other vehicle which may have been exposed to the contagion.

6. Where the emergency demands such measures, he shall further place in another building or tent, which shall be provided as prescribed in the act, all persons who may have been exposed to the contagion, and shall supply them with all necessaries until the period of incubation of the disease shall have elapsed as provided in sec. 93 of the Public Health Act. No person who has not had scarlet fever shall go, or be permitted to go, abroad until the period of incubation of the disease has elapsed, and until the clothing or effects worn or carried by or with all persons exposed to the contagion be disinfected as provided in the Act.

Whenever in a house there is a case of scarlet fever, or whenever there are persons isolated in the same on account of exposure or supposed exposure to scarlet fever, no children or other persons shall be permitted to leave the premises until in the opinion of the Medical Health Officer, they and their clothing are free from infection.

7. Whenever a case of scarlet fever has occurred in a child attending any school the Medical Health Officer shall personally, or through another physician, cause a daily examination to be made of all the children of the school room for at least one week from the date of the occurrence of the last case amongst such children. If any children are absent from such school, a medical examination shall be made of them in the same manner as if they were in attendance at the school.

8. The minimum period of isolation of any case of scarlet fever shall be six weeks from the onset of the disease; and any person then having any discharge due to scarlet fever, shall be isolated for such further period as in the opinion of the Medical Health Officer may be necessary for the safety of the public.

9. In case of the death of any person suffering from scarlet fever, the Medical Health Officer shall at once be notified by either the physician or the party in charge of the body, and shall cause the same to be enveloped in a sheet thoroughly saturated with a solution of mercuric chloride, in the proportion of one to five hundred parts (two drachms to the gallon), or in a carbolic acid solution of five per cent strength. An outer sheet shall also be applied to prevent evaporation. As soon as possible the body shall be placed in a coffin which shall immediately thereafter be permanently closed. It shall be the further duty of the Medical Health Officer to see that the funeral be strictly private, and that the body be buried in some cemetery commonly used for the burial of persons dying within the said municipality, and that all infected apartments, clothing and other effects, be speedily and thoroughly disinfected, and that no such apartments be entered or occupied by members of the family or other persons, until they have been so disinfected.

These provisions shall equally apply to all undertakers' apartments and furnishings.

10. The last Revised Rules for checking the Spread of Contagious and Infectious Diseases, issued by the Provincial Board of Health, shall be the guide for the specific performance of such instructions as are contained in these regulations.

11. The secretary of every local Board of Health shall promptly notify the Provincial Board of Health of every outbreak of scarlet fever; and shall monthly make a return of the total cases occurring during the prev-

ious month on forms printed by the Registrar-General for reporting deaths from contagious diseases.

Champion Liniment for Rheumatism.

Chas. Drake, a mail carrier at Chapinville, Conn. says: "Chamberlain's Pain Balm is the champion of all liniments. The past year I was troubled a great deal with rheumatism in my shoulder. After trying several cures the storekeeper here recommended this remedy and it completely cured me." There is no use of suffering from that painful ailment when this liniment can be obtained for a small sum. One application gives prompt relief and its continued use for a short time will produce a permanent cure. For sale at Parker's Drug Store.

Address and Presentation.

Mr. and Mrs. Alexander Bell, of Glenelg, have purchased the Townner property and will move to town about the first of April. About two weeks ago the friends and neighbors assembled to say "good-by" and to show their respects to the honored couple.

Reeve McFadden was asked to take the chair which he filled very acceptably. Short addresses were made by Messrs. W. J. Young and George Al-joe, and a bountiful supply of refreshments was provided by the ladies.

The following address was then read to which Mr. Bell made a suitable reply:

MR. AND MRS. BELL.

Dear Friends,—Having heard that you are about to move from amongst us to spend your declining years in Durham, we have gathered this evening to visit you a last time, express our regret at your departure, show you in a measure with what esteem you have been regarded by your neighbors and to wish you God speed on leaving. You have been connected with this district for many years, and have shown yourselves ever ready to lend a helping hand to those in need. You have lived in peace and quietness with all, have sorrowed with our sorrows and been glad with our gladness. You, Mr. Bell, in your capacity of assessor for so long a time, by your faithfulness and complete knowledge of Glenelg have the assurance that no one else in your place has ever done his work with fewer mistakes, or more satisfaction to the people and council of Glenelg.

To help to show in more than words our appreciation of you both, we present you with these chairs, wishing you many years comfort in their use and hoping that as you recline therein you will sometime think of your old neighbors.

And as you more nearly approach "that bourne from which no traveller returns" may your spirits grow lighter and may you have an abundant entrance into that Home above to which we all at last hope to go.

(Signed) THOS. McFADDEN.
W. J. YOUNG.

What Causes Appendicitis.

The commonest cause of appendicitis is constipation. When you require physic don't use cheap drastic pills—get Dr. Hamilton's Pills which strengthen the stomach, regulate the bowels and prevent any tendency to appendicitis. In one day you'll feel the tremendous benefit of Dr. Hamilton's Pills. By purifying the blood and cleansing the system they prevent headaches, lift depression and drive away weariness. No medicine so successful as Dr. Hamilton's Pills, sold everywhere in 25c. boxes with yellow cover; get the genuine.

MORTLY MCINTYRE, a boy about 16 years of age, who claims to come from Mount Forest, was tried before Police Magistrate Telford on Tuesday afternoon last, on a charge laid by George Staples against said McIntyre for alleged housebreaking and stealing a watch chain. The accused pleaded guilty and was sent to Owen Sound gaol for a period of three months, at hard labor. He also stole a pair of mitts, which were recovered, but the chain McIntyre claims to have lost. Mr. Staples advertises enain in this issue. The boy was a tough character for one so young, and it is to be hoped the punishment inflicted will be a useful lesson.

A Chicago Alderman Owes His Election to Chamberlain's Cough.

"I can heartily and conscientiously recommend Chamberlain's Cough Remedy for affections of the throat and lungs," says Hon. John Shenick, 220 So. Peoria St., Chicago. "Two years ago during a political campaign I caught cold after being overheated which irritated my throat and I was finally compelled to stop, as I could not speak loud. In my extremity a friend advised me to use Chamberlain's Cough Remedy. I took two doses that afternoon and could not believe my senses when I found the next morning the inflammation had largely subsided. I took several doses that day, kept right on taking through the campaign, and I thank this medicine that I won my seat in the Council." This remedy is for sale at Parker's Drug Store.
