THE DURHAM CHRONICLE Psychine Strengthened My Whole System

Pure Blood in your veins now will save you much in purse and person before the winter is over, PSYCHINE makes rich red blood, keeps people well and at their best.

"To-day I am enjoying good health, solely through the use of Psychine. When I began using Psychine, I was suffering with a heavy cold in the bronchial tubes, and a cough which seemed to rack me to pieces. The doctors' medicine gave me no relief, and I began to dread consumption working on me. With the second dose, Psychine benefited me and gave new strength. Psychine toned up my whole system, and quickly stopped the cough. I heartily recommend Psychine to persons run-down, in need of a tonic, or suffering with coughs, colds or catarrh. I bless the day tried Psychine."-Allan Connor, Prinyer, near Picton, Ont.

Forcasts For April

We distinctively repeat our statement made in March Word and Works concerning the central date of the Venus equinox. It properly belongs on April 5th instead of May 6th as by an unfortunate mistake it is made to appear in our 1905 Almanac This will throw the first April storm period near the center of the Venus period, as the first regular Vulcan period is central on the 1st, extending to the 5th.

A marked change to warmer, with Mrs. W.H.Bunt has been in Wood- corresponding fall of the barometer, two or three days of April. Indications of coming change and storms will be apparent to observing people over most parts of the country, and Mr. Chas. Stafford is in Toronto these fore running indications will culminate in storms of rain, wind and thunder, centering on the touching Monday and Tuesday, the 3rd and 4th. Any locality in all the great storm belts of the country will be liable to these visitations, and where Mrs. Bunt, sr., of Woodbridge, is ever high humidity and temperature, attended by low barometer may exist, to that extent forceful and violent storms will be probable. Anyone of ordinary intelligence can tell hours before whether his immediate locality is going to fall in the direct path of a storm. The tendency to hail Miss Rae Gillies, of Toronto, is the storms will be greatly increased at this time, a copperish, electrical cloud being almost a certain precursor of approaching hail. The period will, end in change to much cooler with probable snow flurries northward, Miss Mary Thompson leaves this and cool to frosty nights will follow
