

# WE WILL SAVE YOU MONEY

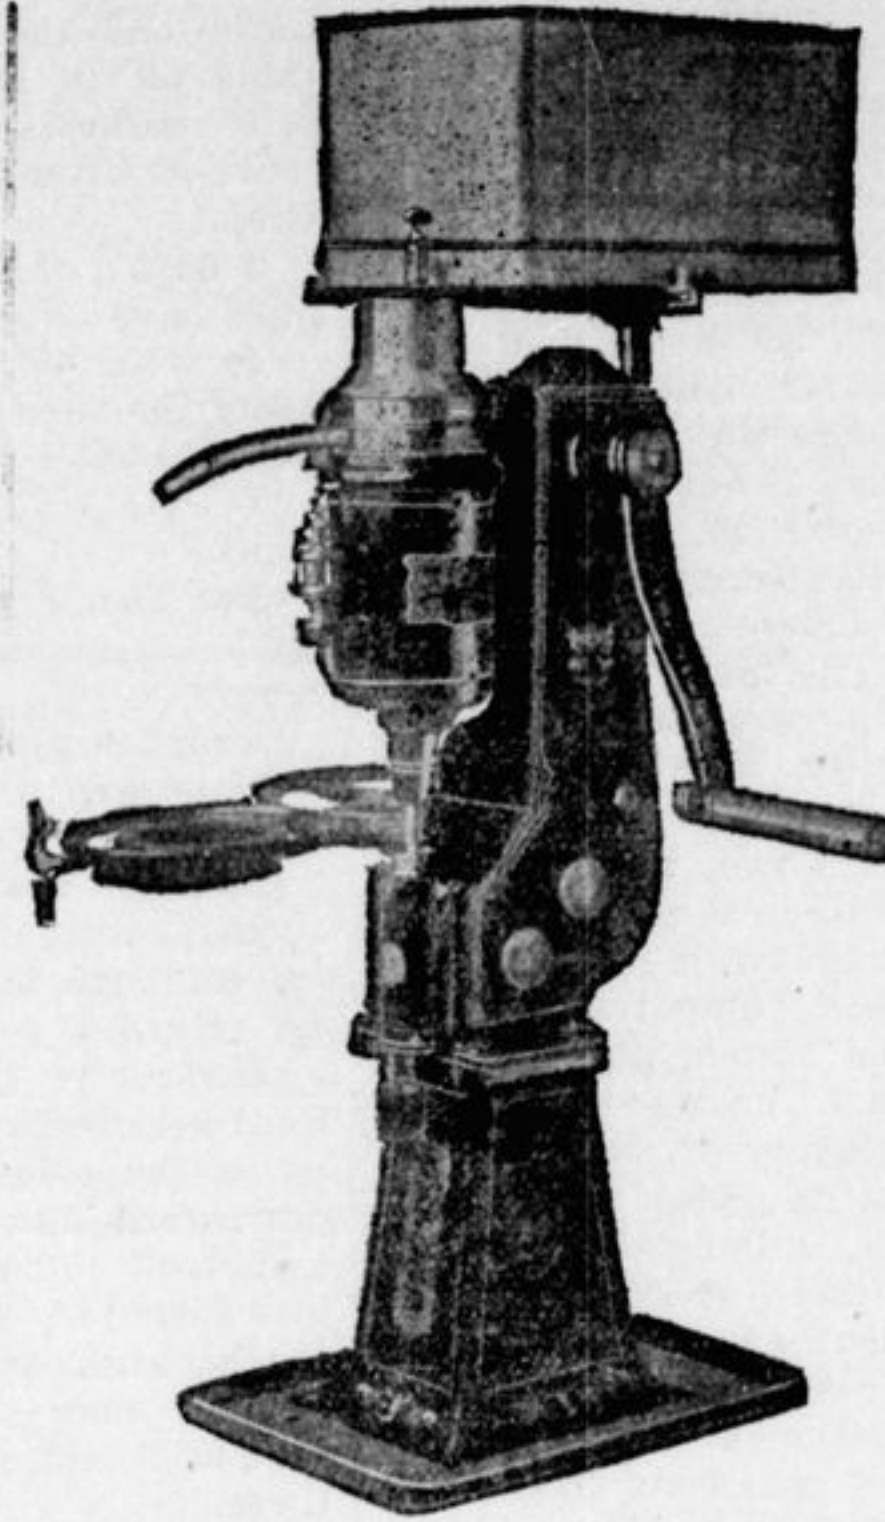

WE ARE NOW PREPARED to offer unheard of inducements to Shareholders and extra value to all others who give us a share of their patronage. This is a co-operative concern, being the only intermediate link between the Manufacturer and the Consumer, and the business is so framed that we retain only a small profit on wholesale prices for handling the goods. It has paid others already to become shareholders, and it will assuredly pay you. We present on this page a few of the articles we handle, and can furnish on shortest notice anything needed on the Farm or in the Home.

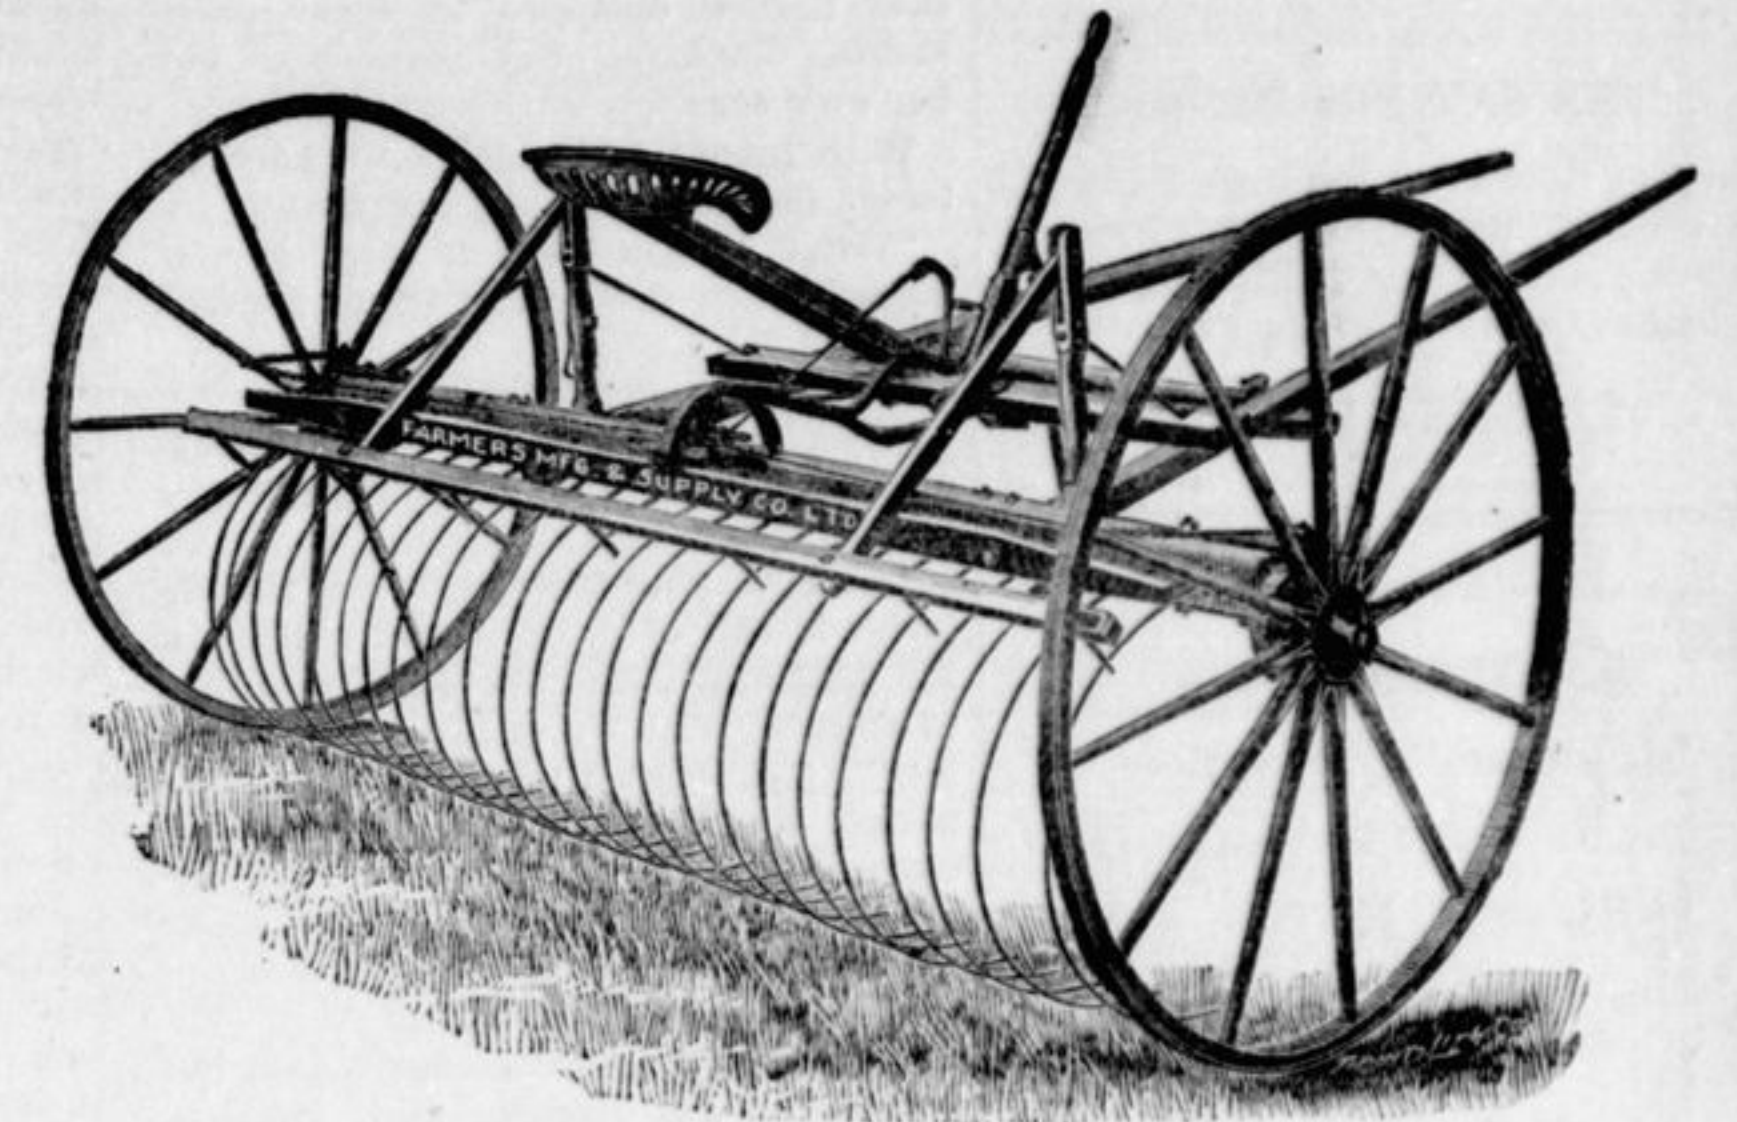

THE KING OF MOWERS

Referring to our Mowers, we ask your consideration of the following points:

1. The gear is the simplest on any mower.
2. The gear, close to the outside wheel, balances the machine.
3. No pounding, the pitman is the longest.
4. The horses draw from the point of resistance.
5. The cutting apparatus is the best ever put on a mower.
6. The rolling tilt binds no part.
7. The Foot-lift is without an equal.
8. Easiest mower to handle.
9. Every one is built for work.
10. Has serrated guards.
11. An adjustable drag bar.
12. Is strongest and best.

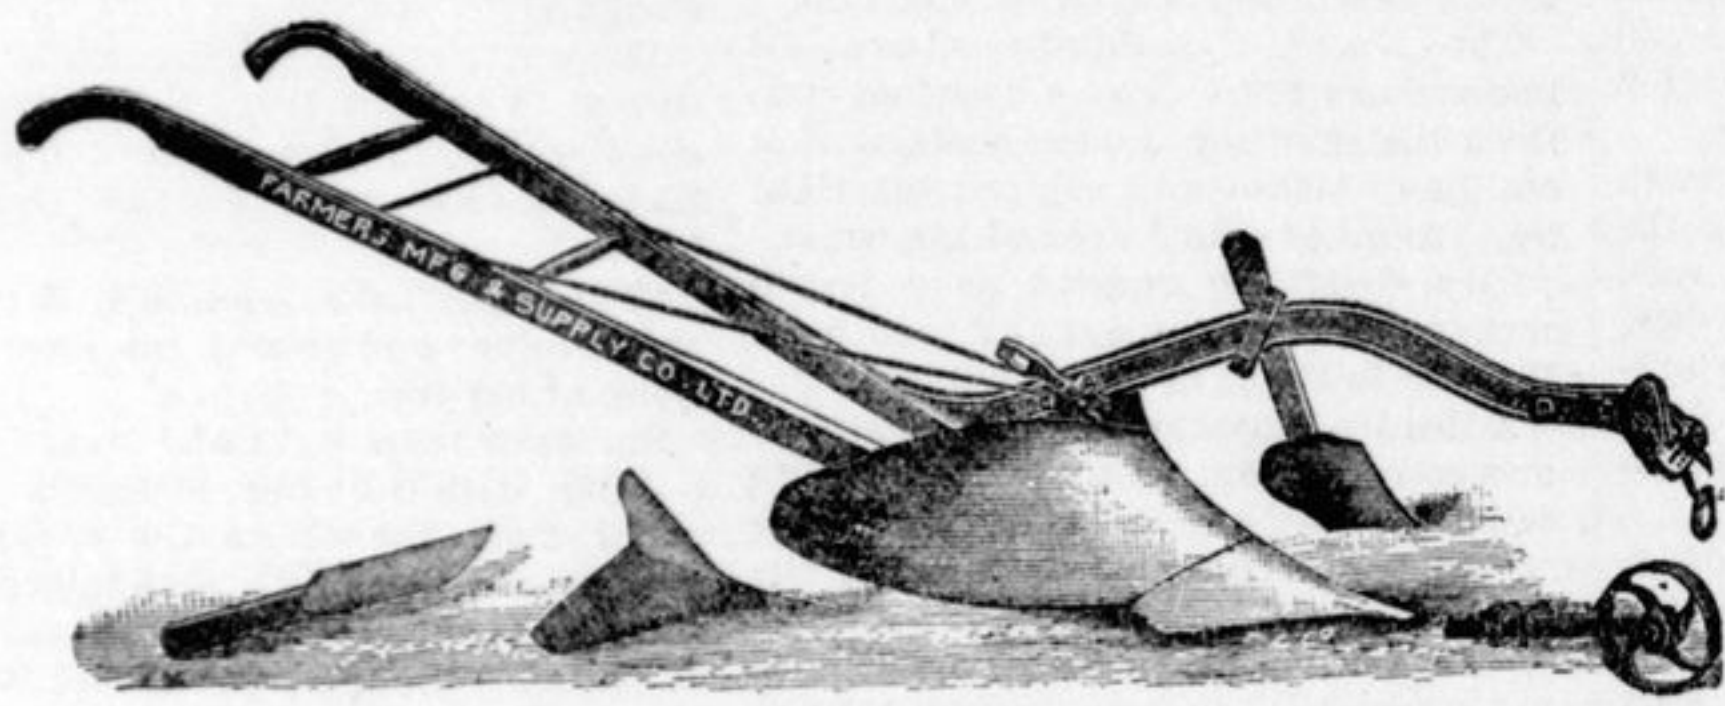

OXFORD SEPARATOR

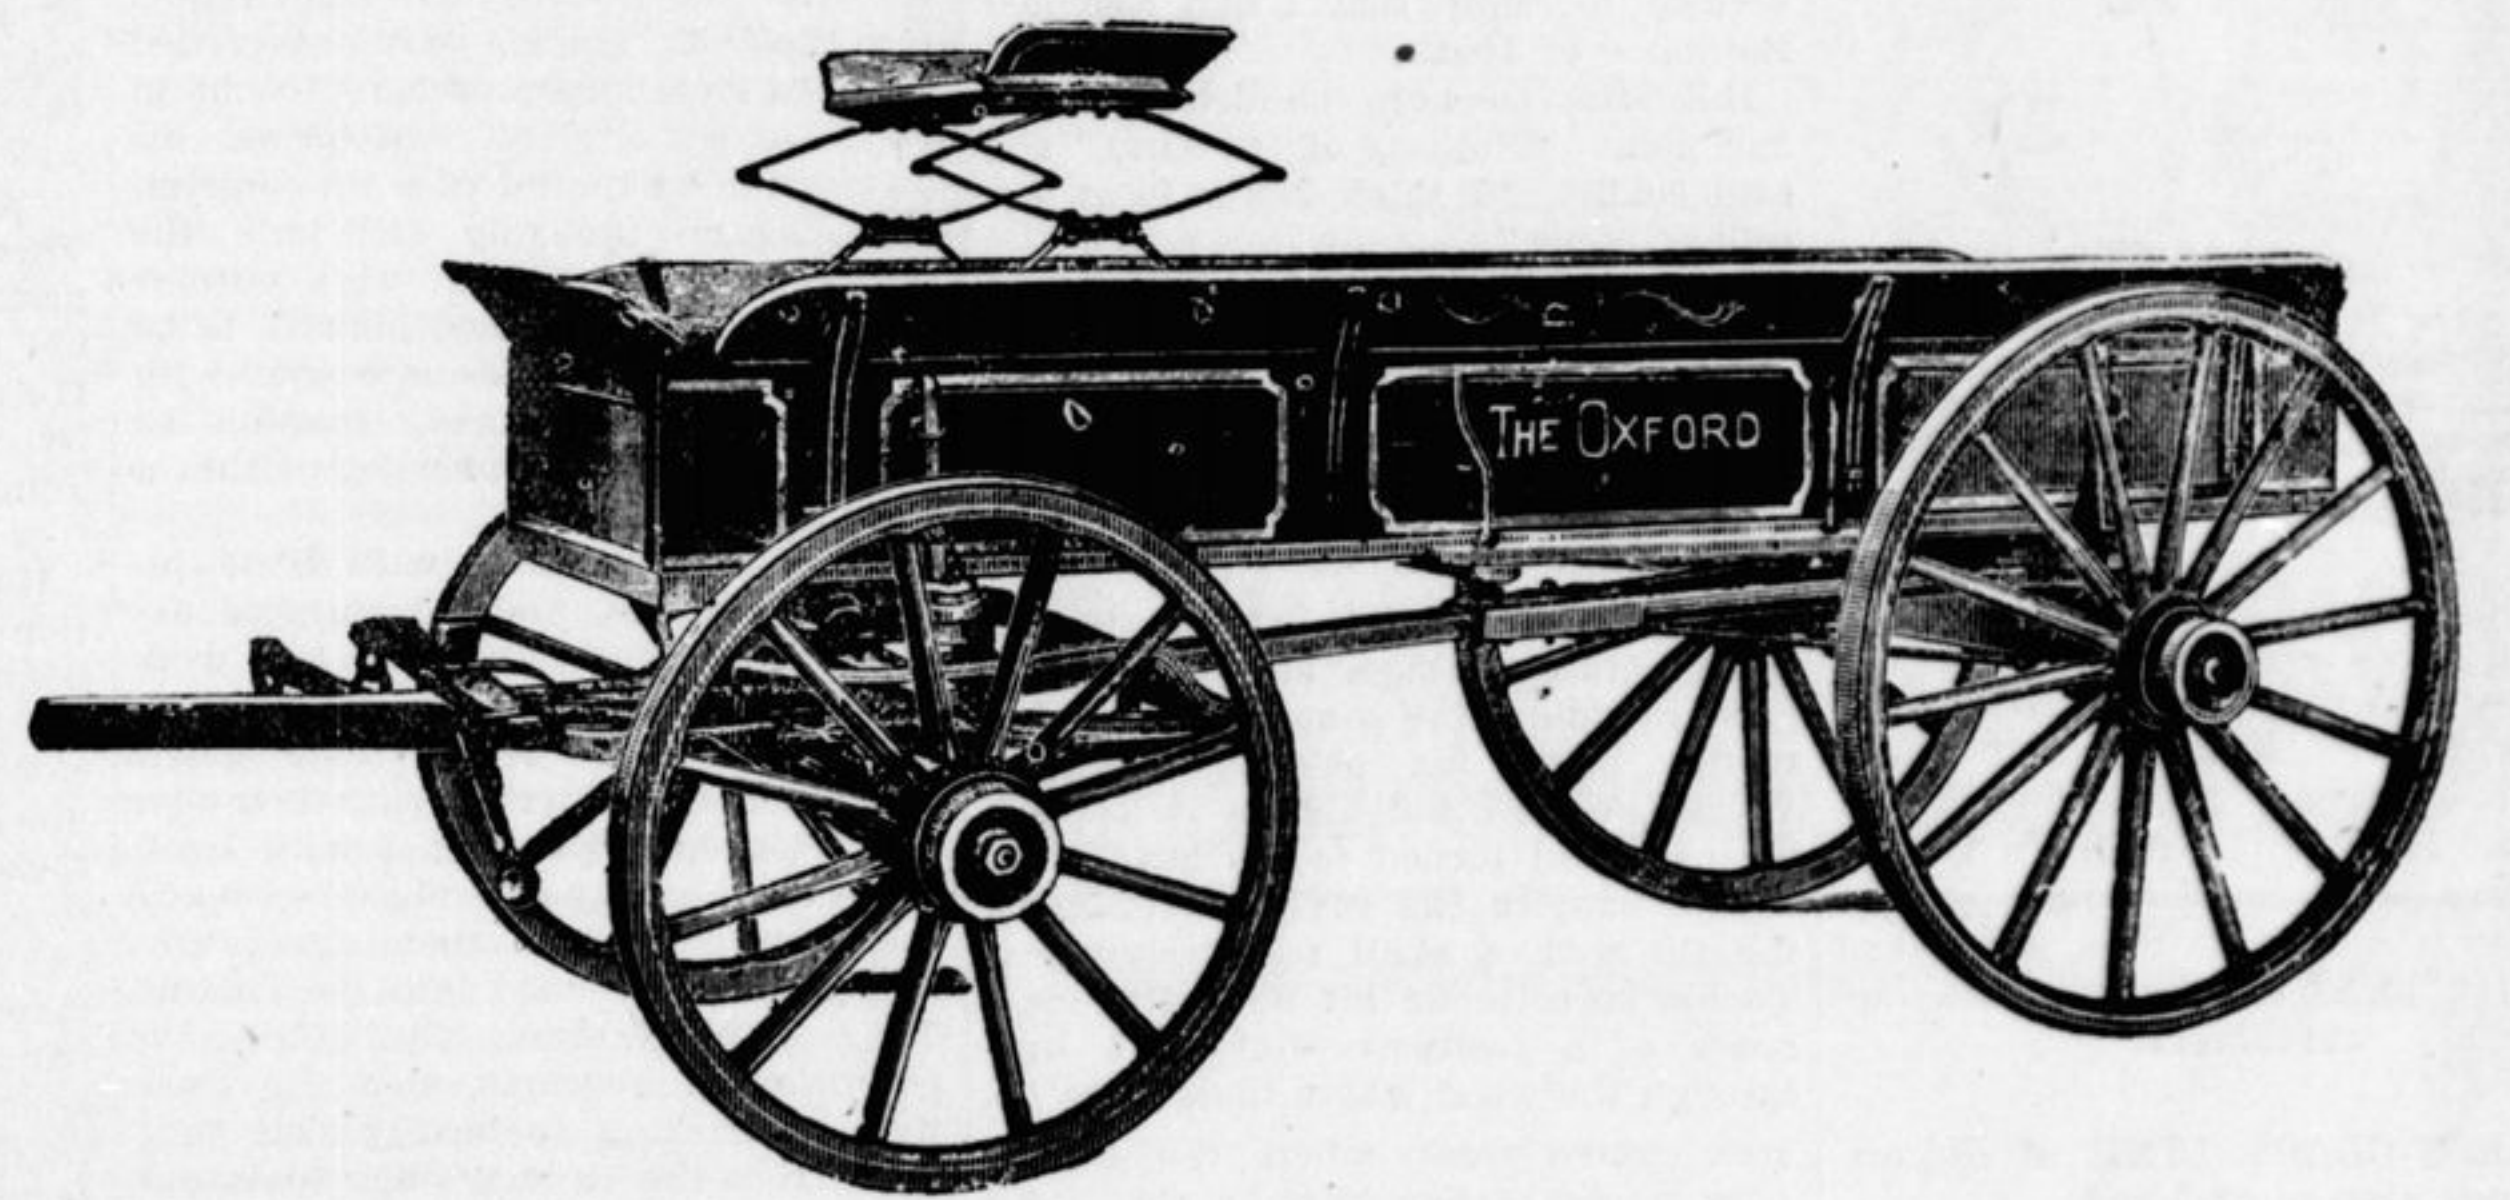

SELF-DUMP HAY RAKE

Furnished with Wood or Steel Wheels. These Rakes will outlast any other rake manufactured, and with good care it will last a life-time. This Rake has been on the market for years and is too well known to require describing. The rake is neat, strong, self-dumping—the operator dumping it with his foot. It is made of good material and well constructed throughout, and we guarantee it to do good work.

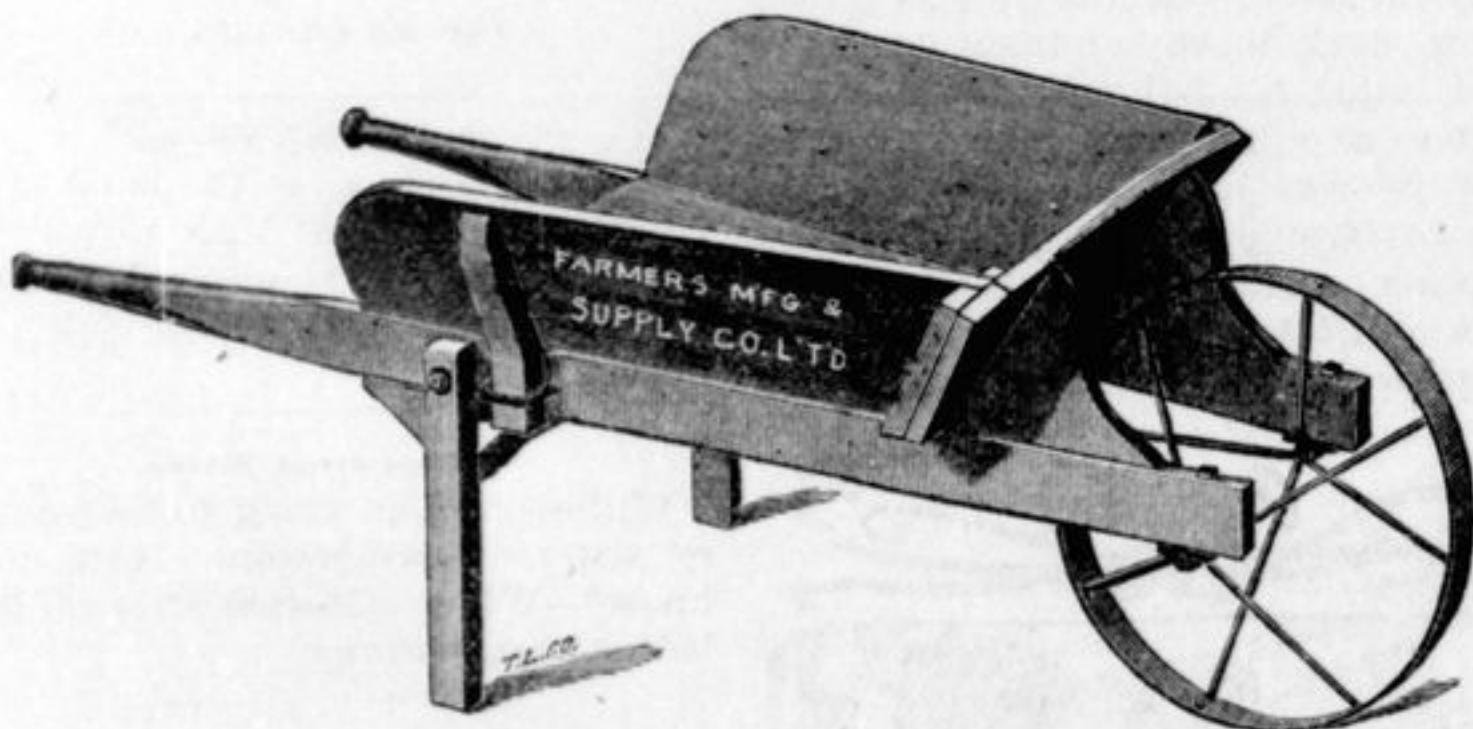

No. 21 PLOW.

This is the most widely used plow in Ontario to-day for general work. Is light in draft and fitted with the best American Soft Centre Steel Mould Boards which are extra hardened and guaranteed to clean in any kind of soil. We supply them with Colter, Wheel and Skimmer as desired.

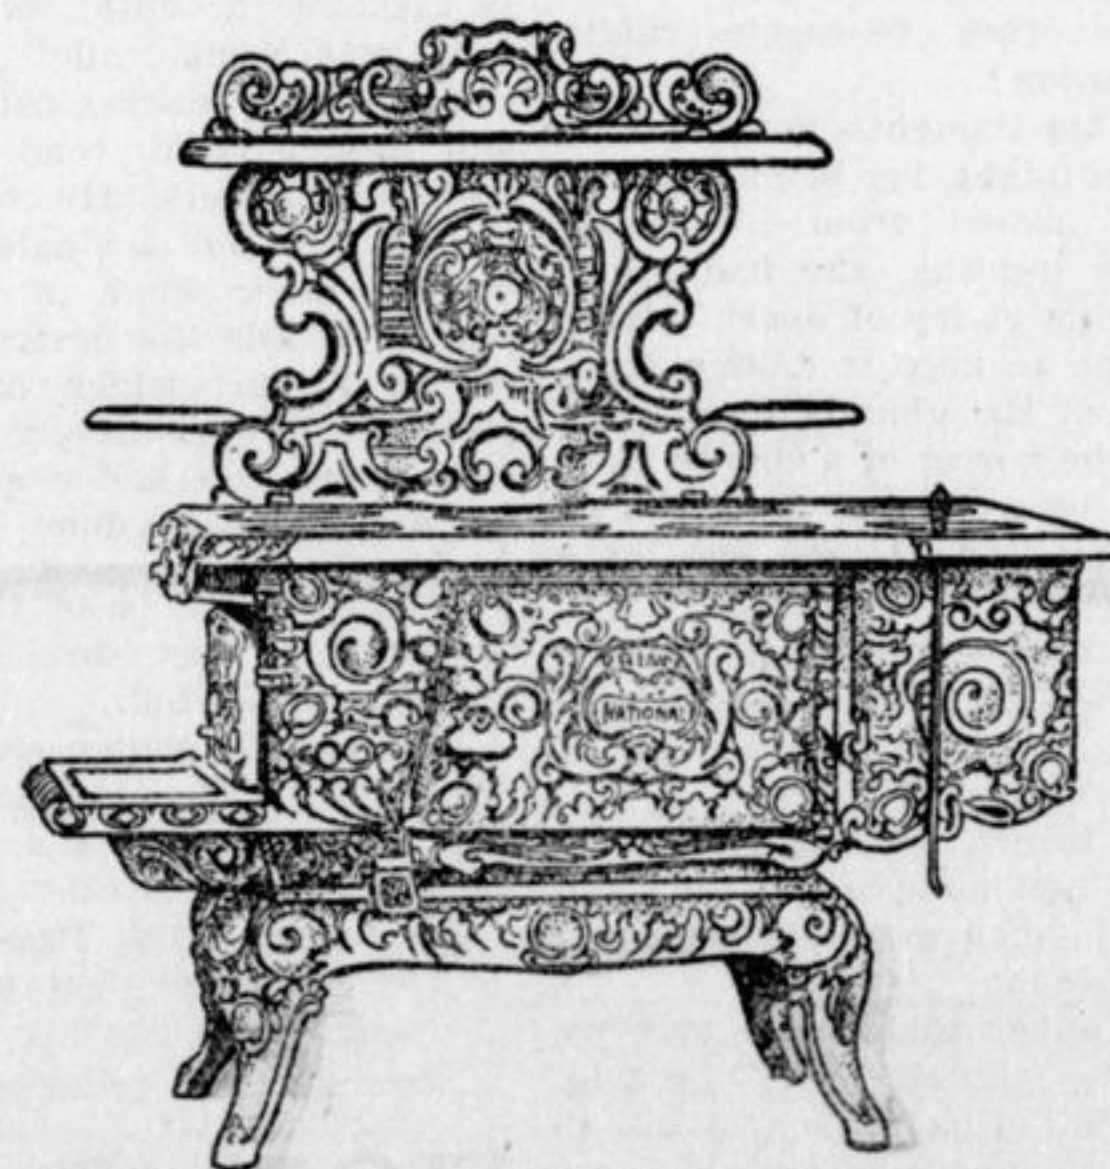

OXFORD WAGON

Wheels 3 feet 8 inches and 4 feet 6 inches.

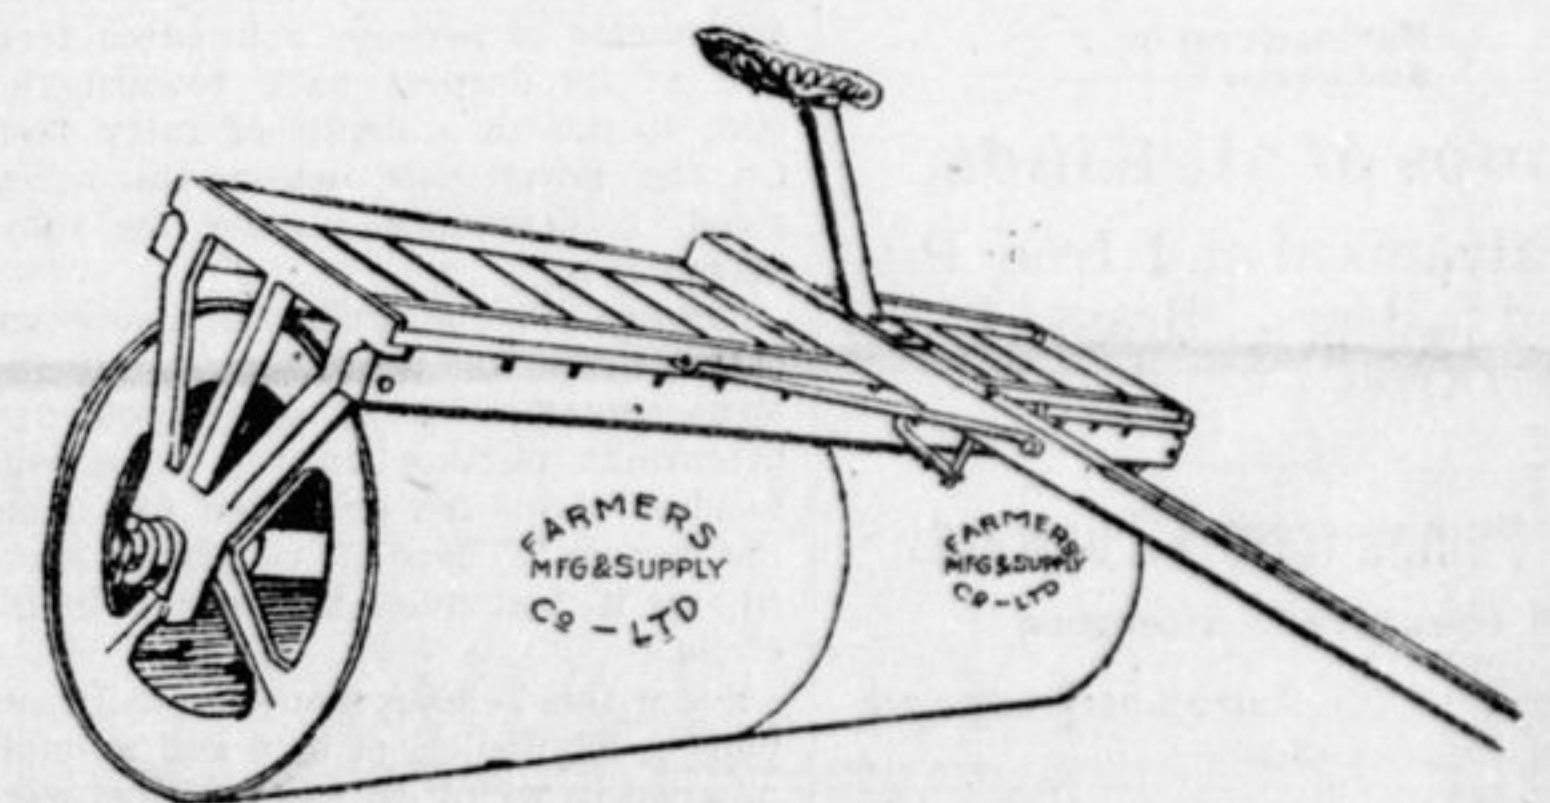

WHEELBARROW

Our Wheelbarrow has a wrought iron tension wheel, made of the best material, and is neatly finished and painted with the best oil and lead colors. It is very reasonable in price. We recommend this Barrow for stable and garden use for any one in need of such an article. Made in two sizes, 10 and 12 inch boxes.

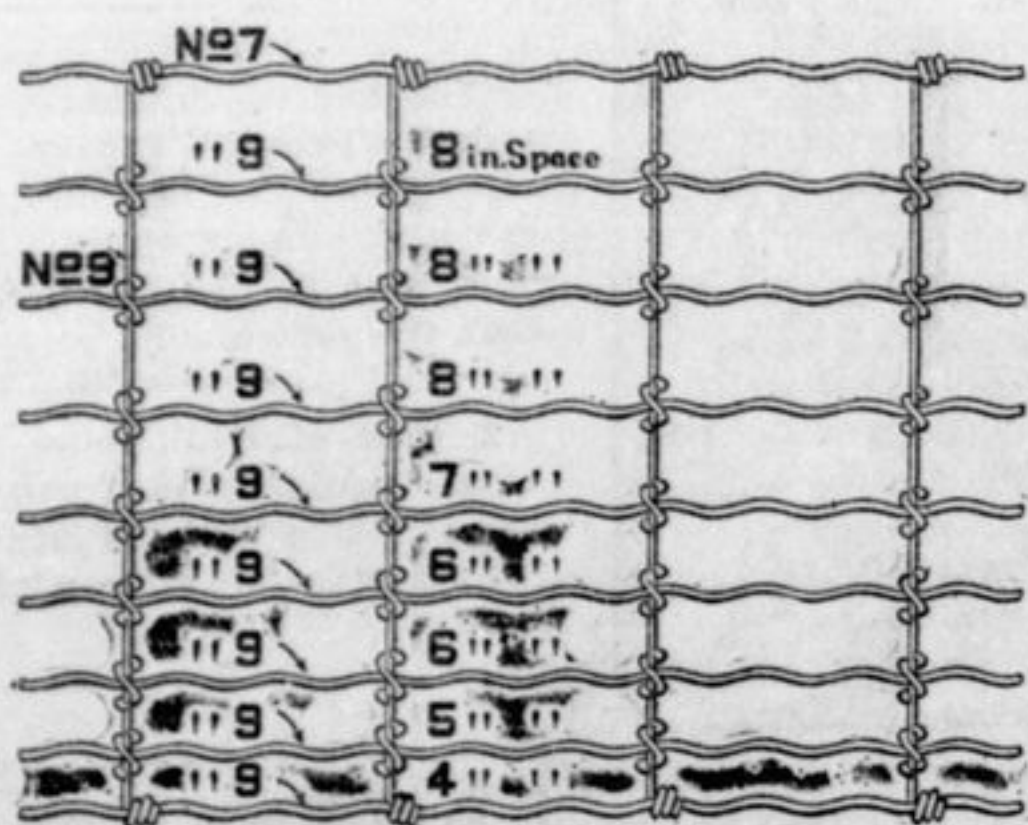

THE PRINCE NATIONAL

Six holes. For wood or coal. With or without high shelf.

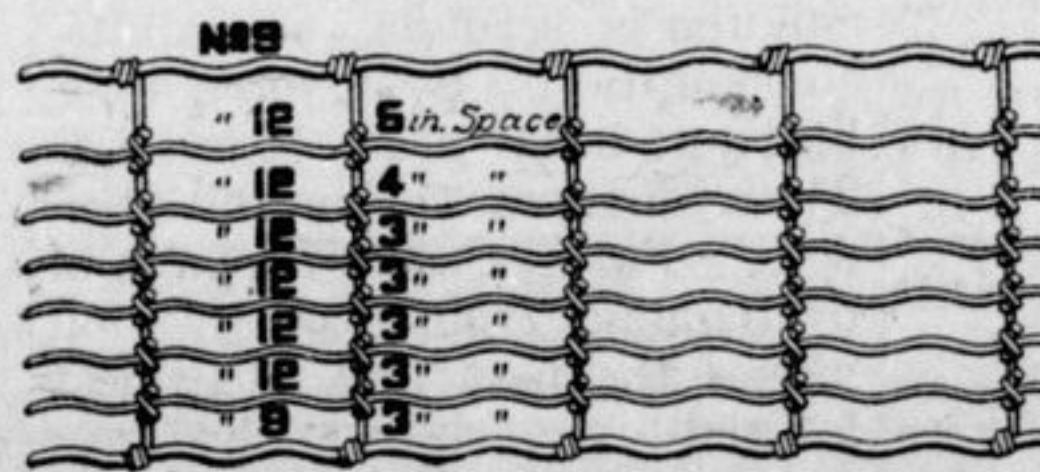

LAND ROLLER

Two or three drums. Has two-inch Steel Shaft right through the centre which runs in Roller Bearings. Angle Steel Frame. Ahead of anything on the market. Get our prices and terms.

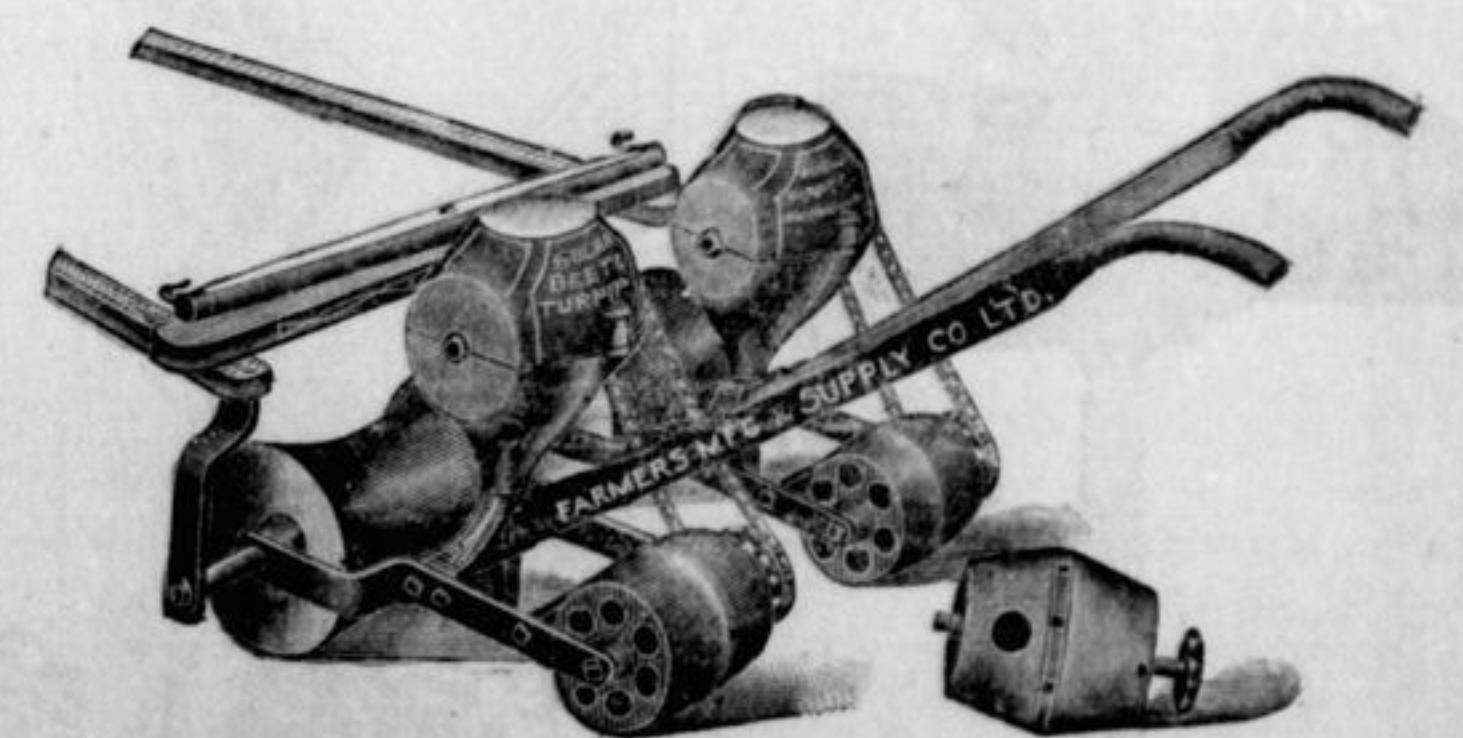

STOCK FENCE

HOG FENCE

We use only the best galvanized wire for this purpose. All laterals are HIGH CARBON wire, which is the best for retaining the spring, and standing the great tensile strain that a wire fence is subject to. All verticals are hard steel wire, of one straight piece from bottom to top, and of large size—giving the fence greater support than a small or soft wire could do. Provision is made for contraction and expansion in the way of a continuation of springs throughout the entire length of the fence.

BET AND TURNIP DRILL

You may need something now; if so, consult us before buying.
