**Not a Factor.**  
**Word and Works Magazine**

The O. S. Times has heard something about the Eugenia waterpower. It says: "On most reliable authority The Times has it that Eugenia Falls electric power development need not now be regarded seriously as a factor in Owen Sound's industrial activities. When Messrs. McLaughlin and Reesor were here in the early spring they expressed themselves as quite confident that with modern water power construction, there could be developed from the falls and the adjacent storage facilities fully four thousand horse power. To meet the cost of development the proposition was to issue bonds for the necessary amount. It is stated that the financial interests which would have readily taken the bond issue first sent an expert engineer to estimate the possibilities. The result was that the financial assistance was not forthcoming from that source as the possibilities indicated only about ten per cent of the estimate claimed for the power when the gentlemen interested were here last spring. This is practically the estimate the estimate of local engineers and it remains to be seen whether or not the owners of the power will secure capital else where and demonstrate their claims."

With regard to the above. Mr. Reesor, the engineer of the company who is on the ground this week, authorizes us to make a general denial of the Times' scare article. "If" says Mr. Reesor, "they say we cannot come, we deny it; if they say we will not come we also deny that. We are on with the project and the financial end is assured." Mr. Reesor also points out the absurdity contained in the latter part of the item quoted to the effect that there is only ten per cent of the power claimed, horsepower! Mr. Reesor thinks the Times has been imposed upon by interested parties from some unknown motive. All the same, he says the Eugenia development is assured.—Flesherton Advance

**VARICOCELE CURED**  
NO NAMES USED WITHOUT WRITTEN CONSENT.  
Confined to His Home for Weeks.  
"Heavy work, severe straining and evil habits in youth brought on a double varicocele. When I worked hard the aching would become severe and I was often laid up for a week at a time. My family physician told me an operation was my only hope—but I dreaded it. I tried several specialists, but soon found out all they wanted was my money. I commenced to look upon all doctors as little better than rogues. One day my boss asked me why I was off work so much and I told him my condition. He advised me to consult Drs. Kennedy and Kergan, as he had taken treatment from them himself and knew they were square and skillful. He wrote them and got the New Method Treatment for me. My progress was somewhat slow and during the first month's treatment I was somewhat discouraged. However, I continued treatment for three months longer and was rewarded with a complete cure. I could only earn \$12 a week in a machine shop before treatment, now I am earning \$21 and never lose a day. I wish all sufferers knew of your valuable treatment."
