BACON HOG PRODUCTION.

If the bacon trade of Canada is to continue to improve it is necessary that hog raisers adhere to the class of animals most suited to the requirements of the British market.

In the production of hogs of the lard type Canada cannot compete successfully with the United States. A visit to the Chicago stock yards and to Western cattle feeding centers affords ample evidence of this. A large proportion of the cattle are fed on snapped or shelled corn. Herded with these are hogs that thrive and fatten on the undigested corn left by the steers. These hogs constituting by a product of cattle feeding are produced at a cost much lower than pork can be raised in Canada. All United States hogs are not fed in this way but a large proportion of them have, at least, the advantage of cheap corn, than which, there is no better feed for producing fat hogs of the lard type. Let the Canadian farmer go back to the thick, fat type of hog, as some talk of doing because they feel they have a grievance with the packer, and it will not be long before the price of Canadian bacon will have fallen to a level with the United States product which is usually from ten to fifteen shillings per hundred and twelve pounds lower than the quotations for Canadian "Wiltshire" sides.

It seems to be very generally supposed that pork is more cheaply and easily produced from hogs of the thick, short American breeds than from the three English breeds which are favored for bacon production. Why such a belief should be so general is difficult to understand as repeated tests conducted at various experiment stations have shown that hogs of the Yorkshire, Berkshire and Tamworth breeds produce pork as cheaply as those of the Poland China, the Chester White or the Duroc Jersey breeds. In the opinion of Prof. Day, of the Ontario Agricultural College, who is foremost among authorities on bacon production, the lusty, growthy pig of the bacon type is the most economical pork-maker we have. Especially when reared, as bacon hogs should be, largely on such foods as roots, soiling crops and dairy offal.

There is much difference of opinion regarding the cost at which hogs fit for market can be produced, and there is probably as much difference between the cost to one feeder and the cost to another as between these opinions. Under general conditions the production costs in the neighborhood of five dollars per hundred pounds on an average. In summer under favorable conditions the cost may be somewhat lessened but in winter pork can hardly be produced at the figure mentioned. As in all other lines of production the cost will vary according to the character of the animals fed and the amount of intelligence exercised by the feeder.

Taking one year with another the Canadian farmer on good land who understands crop growing and hog raising, can undoubtedly raise hogs as cheaply as the figures quoted, and probably for less. He will keep only such sows as produce large lustrous litters of the right type. He will grow such pasture and soiling crops as clover, alfalfa, rape, vetches, mangels, sugar beets and such coarse grains as yield the greatest number of pounds of hog feed per acre. In other words he will manage his operations in such a way that will return him the greatest return in hogs per acre of land, and in so doing will learn to reduce the cost of raising hogs of the best type to a minimum.

The Happiness of Home.

Very largely depends on the mother's disposition; if she is animated and bright, everyone is happy; but if she is nervous, irritable and cross-everything goes wrong. Bright cheery women usually use Ferrozone, the greatest health-maker known. By acting through the blood Ferrozone is able to reach all the organs that need assistance; it establishes regular and healthy action of all functions, builds up the general health, fortifies the system with a reserve of energy that defies disease. Don't put off - Ferrozone costs only 50c. at any drug store; get it to-day.

The statement has been going the rounds of the papers that the cost of converting a man in recent revivals was \$7.50. That might be called the immediate cost. Tracing back, it costs vastly more than can be computed. But the above statement suggests what does it cost to execute a man? Dr. Schaeffer tells us that the first man in New York State who was executed by electricity was one Kemmler. He had murdered his wife. He was traced, tried and sentenced. The case went to the higher courts. In time Kemmler was executed. Investigations were made to find out the legal cost. Carefully figured, it was \$100,000. At the beginning a dead woman, at the end a dead man and \$100,000 of money, the taxpayers' money - that was the awful cost. It costs on that reckoning, nearly one hundred thousand dollars more to execute than to save.

Myself Cured of Oatarrh and Throat Troubles, by

PSYCHINE (PRONOUNCED SI-KEEN)

He is now anxious to save others.

Leger L. Hardy, St. Bazile de Portneuf, P. Q., writes as follows: "I suffered for two years with Throat Catarrh and an obstinate cough. PSYCHINE had a splendid effect in my case. I obtained the permanent cure I had so long desired, and shall do all in my power to increase the popularity for Dr. Slocum Remedies in this vicinity."

LEGER L. HARDY.

PSYCHINE (Pronounced Si-keen).

For sale by all druggists at \$1.00 per bottle. For further advice, information, or free trial bottle, write or call at Dr. T. A. Slocum, Limited, 179 King Street West, Toronto, Canada. Trial bottle free.

Traverston.

(Intended for last week.)

Mr. M. Burke, of the 4th con., had a stinging bee on Monday, preparing for the foundation of his new home in the spring.

Mr. and Mrs. John Hudson and family, of South Bentinck, visited the members of the Peart family at the close of last week.

Mr. and Mrs. John McDonald, of town, were guests at the old Mc Clocklin home, the first of the week.

Mr. and Mrs. S. Jackson, Master Clark and "Tootsie" spent a day lately in our humble cottage. A bright, vivacious young couple, they are.

Mumps on the 4th con., gripped on the 6th, courting on the 8th and divers troubles further north, have a tendency to keep the neighborhood in a humble mood.

Mr. Richard Jack is spending a few days in town.

The sudden call of Mrs. John Moffat, of Edge Hill, caused grief in this neighborhood, and many, very many are the kindly words spoken of her sterling virtues. In her own quiet way she was an angel of mercy, a friend to be trusted, a neighbor always helpful. She will be sadly missed in the home and neighborhood. We extend our sympathy in these dark hours.

About a score of lusty, willing fellows, gathered in the woods of the late W. J. Edwards on Tuesday of last week and sawed, split and piled enough fuel to last for a twelve month.

WHEN RUN DOWN, "DRAGGY," USED-UP.

You Lack the Vigor, Courage and Staying Power that "Ferrozone" Can Supply.

Night comes and it's hard to sleep. Morning dawns and the anxious, tired feeling is still there. Don't neglect this gradual decline; it can't cure itself. But by forming rich, pure blood, Ferrozone will quickly supply the nutrient and building material your system craves.

Instantly you are aware that some powerful force is building up your depleted energies. At once you feel braced, toned, strengthened. Search the world over and you won't find anything to tone up a weak system like Ferrozone. Physicians claim it is the most strengthening, uplifting medicine ever discovered.

No more spells of tiredness, but bounding, joyful health when you take Ferrozone, of which Mrs. H. S. Gold, of Bowsman, Man., speaks in the following words of praise:

"I state my case because I think it may assist other women to health. A year ago I was almost a wreck. I was pale and emaciated, suffering from nervousness and hysteria. Little things going wrong in the house bothered me. The doctor advised different treatments but they didn't help. He said my low condition was due to weakness that might never be cured. I am now strong and vigorous and was made so by Ferrozone."

Why not cast aside the chains of sickness and enter the bright, happy life of robust health. Let Ferrozone Let Ferrozone help you - let it cure you once and forever. Price 50c. per box or six boxes for \$2.50. at all dealers, or N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

THE OUTLOOK FOR SHEEP HUSBANDRY.

The rise and fall of prices, the ebb and flow of the tide of trade is a recognized fact of commercial life. With a finger on the pulse of the market, the ability to relate one's business to the demands of the present and the courage of patience and resourcefulness to prepare for the demands of the future is a talent that should assure success in the life of any man be he a farmer, tradesman, or manufacturer. A stockman who takes advantages of a dull year to strengthen or improve his breeding flock and refuses to breathe the atmosphere of discouragement and impatience under which his neighbors are going down to failure, is wise in his day and generation. The sheep owner and breeder who, not despairing of the revival of the sheep industry, has during the past few years, by judicious selection and breeding, maintained or increased the quality of his flock, is now reaping the reward of his hopefulness and is in a position to take the largest advantage of the brisk demand and high prices of the present time.

"Record marketings at record prices" is the reporter's summary of the situation at the Union Stock Yards, Chicago, for 1905. In all during the year 4,738,748 sheep were marketed which, in a grand total is 234,000 more than in 1904. The top price for wethers was \$6.25 per cwt. The demand for breeding ewes throughout the states has, during the past year, fully doubled and there were by no means enough feeder sheep to supply the demand in the corn-belt and on the range. One feature of the Chicago market was the presence of Canadian lambs. One lot selling in November last for \$7.25 per cwt. The past year has also been a profitable one for the wool grower, present prices being abnormally high. With the impetus given to the sheep industry by the active demand for wool and mutton and because of the general prosperity of the country, the opinion prevails among high authorities that the breeding and feeding of sheep will be a profitable business for the next two or three years at least. For breeding purposes, sheep selected from Canadian flocks are particularly popular in the United States and Canadian farmers ought to be in a position to reap a rich harvest through trade with their cousins across the line. The presence of sheep on the farm free from weeds and in maintaining the fertility of the land. Finally, the prospect of profit in the sheep trade is better now than it has been for years, and the outlook is promising to those who have retained their faith in the sheep as the Farmer's Friend.

A GUARANTEED CURE FOR PILES

Itching, Blind, Bleeding, Protruding Piles. Druggists are authorized to refund money if PIAZO OINTMENT fails to cure in 6 to 14 days. 50c.

How Four Leaved Clovers Are Made.

Four leaved clovers may be grown in abundance on lawns or in flower beds. The raising of four leaved clovers has been made possible by Professor De Vries, of Amsterdam, who has found a plant bearing six or seven four leaved clovers, capable of being transplanted. He first sowed them, and since then he has had a new generation each year. Each time he chose his seeds from a fourth of the best plants; that is from those which had the most four and five leaved clovers. It was the third generation which began to be rich in the desired form of letters, but only with four and five leaflets, and these only in the adult plant. During August and September of the same year he remarked a very few with seven leaflets. At this point he reduced his selection to a severe standard. He chose for progenitors only those plants having two thirds of all their leaves with four or more leaflets. But he discovered a curious fact that much simplified his selection from then on. In sowing clover one may observe that the first leaf on each young and subsequent leaflets have regularly three leaflets. This knowledge made it possible for him to make his selection much more quickly. He had only to choose the young clovers with compound leaves and transplant them from his glass house to his garden, leaving the others to perish. Thus he did not need so many hundred individuals as before, though each year he still selected some thousands of seedlings from their sowing pots. At last after eight years of effort, the new variety of clover came into existence. Of this crop nearly all young plants had their first leaf compounded and all, with few exceptions, were five leaved.

Rheumatic Pains Quickly Relieved.

The excruciating pains characteristic of rheumatism and sciatica are quickly relieved by applying Chamberlain's Pain Balm. The great pain relieving power of the Balm has been the surprise and delight of thousands of sufferers. The quick relief from pain which it affords is alone worth many times its cost. For sale at Parker's Drug Store.

Losing Your Hair?

And doing nothing to keep it? Most women like thick, heavy hair; long, luxuriant hair. Don't you? Then use Hall's Vegetable Sicilian Hair Renewer. You save what hair you have and get more at the same time. For the whiskers and moustache we make BUCKINGHAM'S DYE. It colors a rich brown or a soft black. R. P. HALL & CO., Nashua, N. H.
