"MR. HARVEY is an entertainer seldom seen outside of the large cities in Canada or the United States, his character songs and artistic make-up being entirely different from anything ever seen in the West. Will appear in Rink June 21st at Oddfellows' concert.

WE are pleased to report the success of Mr. Roy Gordon who recently passed his first year in medicine at the Western University, at London. Two or three years ago Roy went west and hung out his shingle in Weyburne as a watchmaker and jeweller, having served his apprenticeship in this town. Through strict attention to business and honesty in his dealings with the public he saved considerable money despite a serious drawback from sickness. Last fall he visited his parents here and not only they but his friends and acquaintances in town were surprised, to learn of his intention to go into medicine. Some, of course, thought the change was not a wise one, but Roy was not to be moved from his purpose. Entering the University late in the term he had naturally an uphill climb, but the results of the examination recently published show what pluck and determination will do in an ambitious young man. He succeeded in passing in every subject, carrying off first-class honors in Physics and second class honors in Zoology, Botany, Inorganic Chemistry Physiology and Practical Anatomy. We tender our congratulations on so good a start and wish him success throughout the whole course.
