

WHEN PAW WAS A BOY.

I wish 'at I'd been here when My paw he was a boy; They must of been excitement then—

When my paw was a boy; In school he always took the prize. He used to lick boys twice his size—

I bet folks all had bulgin' eyes When my paw was a boy. They was a lot of wonders done

When my paw was a boy; How grandpa must have loved his son. When my paw was a boy; He'd git the coal and chop the wood.

And think up ev'ry way he could To always just be sweet and good—

When my paw was a boy. Then everything was in its place

When my paw was a boy; How he could rattle, jump and race

When my paw was a boy; He never, never disobeyed; He beat in every game he played—

—S. E. Kiser in Chicago Times-Herald.

Wounds, Bruises and Burns.

By applying an antiseptic dressing to wounds, bruises, burns and like injuries before inflammation sets in, they may be healed without maturation

THEY WANTED A FOWL SUPPER.

Three Young Men of St. Vincent Were Heavily Fined on Friday for Robbing a Farmer's Hen Coop.

George Brown and Chas. Gilchrist, of St. Vincent, had occasion to visit Meaford on Wednesday last, and while on their way home they appear to have been suddenly seized with a longing for a fowl supper.

George Westinghouse, whose air brake has yielded such a golden harvest, was the son of a mechanical engineer in a small way of business, and John W. Mackay, the "silver king," was the son of a destitute Irishman who emigrated to America

FATHERS OF THE RICH MEN.

It is an interesting and instructive fact that at least four out of five of American multi-millionaires are sons of men who in their most flourishing days, probably never knew what it was to enjoy an income of \$15 a week;

The father of Andrew Carnegie, though he toiled early and late as a damask weaver at Dumfermlin, was barely able to supply the humblest necessities for his small family; and when steam looms came to supplant hand weaving he was compelled to sell his looms and his few sticks of furniture and take his boys to America, where he found employment as a weaver in one of the cotton factories of Allegheny City, and where one of his sons, little though he dreamt it, was to amass one of the most colossal fortunes the world has ever known.

The father of J. D. Rockefeller, whose wealth to-day is said to be at least double that of even Mr. Carnegie, cultivated a few barren acres in Tioga County, New York, and added a little to the family exchequer (scanty enough at best) by sending out his boys to hoe and plow and husk corn for neighboring farmers.

The father of W. S. Stratton, the Colorado gold king, was a small boat builder at Jeffersonville, Ind., with so many children and a purse so ill filled that he was compelled to take his son away from school at 14 to apprentice him as a carpenter.

Commodore Vanderbilt, founder of one of the wealthiest families in the world, was cradled in the direst poverty, and between the ages of 6 and 16 earned his own living by performing any odd jobs that came his way, from selling newspapers and holding horses to farm labor and porter's work; and Jay Gould, who accumulated a fortune of \$60,000,000 before he died at the age of 58, was the son of a struggling farmer, who found so much use for his son's services that he practically received no schooling at all.

Sir Hiram Maxim, the millionaire inventor, had for his father a small miller, whose business was so unprofitable that his son had to eke out the family income by farm work and wood-turning before, at the age of 14 he was apprenticed to a coachmaker at East Corinth.

George Westinghouse, whose air brake has yielded such a golden harvest, was the son of a mechanical engineer in a small way of business, and John W. Mackay, the "silver king," was the son of a destitute Irishman who emigrated to America with his family in search of fortune and after two years of terrible struggle died leaving a penniless widow to support herself and her young children as best she could.

DIET NOT THE WHOLE THING.

Your table is loaded with food—digestible and wholesome, yet you never gain strength. What's the trouble? Look within, and what do you find? A lazy liver, stomach overloaded with work—useless work because the bowels and liver are not sufficiently active. Relief is quickly supplied by Dr. Hamilton's Pills. They make weak folks strong by removing the cause of the weakness. Digestion improves, constipation leaves, liver takes new life, kidneys wake up,—the whole system is enlivened by Dr. Hamilton's Pills. No better medicine for the sick or well, 25c at all dealers.

THE BACHELOR'S SOLILOQUY.

To wed, or not to wed; That is the question; Whether 'tis better To remain single, And disappoint a few women—

Only part of the wheat berry is fit for food. Yet much that isn't often gets into flour. You cannot see it or taste it, but it's there. It is simply a case of the miller getting more flour from his wheat and your getting less nourishment.

Royal Household Flour

is so milled that nothing goes into it except the part of the wheat that is food. You get just what you pay for—the best and purest flour made. It goes farther because it is all flour. Your grocer can supply you.

Ogilvie Flour Mills Co., Ltd. 156 Montreal.

Darkie's Corners.

(Intended for last week.) On deck again, Mr. Editor, after a long silence.

We were reminded on Wednesday and Thursday last that winter with its white mantle was again coming. Snow fell to a depth of from four to six inches.

The construction work on the new C. P. R. line is progressing favorably in this part at time of writing. The material for making a fill through Mr. James Wilson's property is being hauled on cars made for that purpose and handled by horses.

Mr. Wm. Weir, who took a trip to Dauphin, Man., this summer, arrived here a week ago Friday. He happened with an accident while out there, having had one of his legs badly scalded by an engine.

Mr. James Atkinson is adding to his stock of horses lately, having purchased a mare and colt from Mr. David Davis for the handsome figure of \$175.

Mr. Thos. McGirr, of Lambton St., disposed of his house and a lot of eight acres to the C. P. R. Company for the reasonable sum of \$2200.

Mr. S. Ritchie is preparing to burn another lime kiln.

A very severe electrical storm passed over this section a week ago Tuesday night accompanied by very high wind but little rain. No damage reported in our burg.

Mr. J. H. Dean intends starting the butchering business again this winter. Mr. Jas. Atkinson is also.

Threshing and potato digging have been the order of the day for the past few weeks, and are pretty well finished up. Both grain and potatoes turned out fairly good.

We are very much pleased to report that Mrs. George Aljoe is improving in health.

Mr. Arthur McNally, of the 8th con., accompanied by his mother, visited at the home of Mr. and Mrs. Thos. McNally Sunday last.

Mr. Albert Davis arrived home from the West last Saturday night looking as if that country agreed with him.

Mr. M. J. Staples spent Sunday last with friends in Lime Kiln Valley.

The boys of this section who work on the C. P. R. at Priceville had to strike the Darkie's Corners for a couple of days last week on account of the wintry weather.

R. J. Hewitt spent Sunday last with friends near Kingston Heights, Glenora.

Sunday, 14th inst., born to Mr. and Mrs. John Bell, a little girl. Congratulations.

STOP LIMPING, CURE THE CORN

Quickly done by Putnam's Painless Corn Extractor. Acts in one day, causes no pain, removes every trace of soreness. Fifty years of success proves Putnam's is the best. Refuse substitutes.

THE STORY OF EUGENIA FALLS.

(By E. W. Barry.)

Situated about the centre of Grey county, off the track of the regular tourist, though justly popular among the residents of the vicinity twenty miles around, are the beautiful Falls of Eugenia. They form a pretty little cataract, where the water foams and sparkles down a sheer drop of eighty feet. As they are now threatened with extinction, it may be interesting to the lover of Nature to read the simple story of the Falls.

The first white man to cast eyes on the Falls of Eugenia and the beautiful scenery of rock and cliff around it was a hunter and trapper named Brown-tree. During the year 1850 he one day wandered from his home on the Toronto and Sydenham road rather far than was his wont, in pursuit of a deer. The stag eluded him, but he was attracted by the peculiar vibration and rumbling in the ground, and following it up, came upon the Falls of Eugenia. He told a friend of his discovery on his return home, and afterwards took him to see it. They gazed upon the scene for a while, and then fell to minutely examining the rock around. They noticed in the crannies of the limestone a yellowish substance, which they took for gold. Brown-tree swore his companion to secrecy, and they went back to obtain supplies for a mining camp.

They hoped to have the treasure to themselves, but somehow the story leaked out, and in a day or two hundreds of people from the more settled parts along the Toronto and Sydenham road were encamped in the neighborhood of the falls. They worked with pick and shovel, and were armed with revolvers and bowie knives, as in the palmy days of California and Australia. An old miner who happened to be living near Shelburne at the time was consulted, and when informed that the gold was situated in fissures of limestone, shook his head for gold and limestone are not found together. His conclusions, however, were scouted by the treasure-seekers. A sample of the "ore" was sent to Toronto to be assayed. Communications in those times, before even the "narrow gauge" was heard of, were slow, and ere the report confirming the old miner's opinion could arrive the crowd of would-be gold kings was considerably augmented, and there was much disappointment when they were at last convinced, One man alone made money out of this bonanza. During the fever he sold a sack of the stuff to a neighbor for five dollars.

These "miners" dispersed to their former occupations, and the next workers to find employment at the falls were the Government surveyors. Their labor was hard and exacting, but they were conscientious men, and performed their duty to the letter. Their instructions were to survey a road every mile and a quarter. Accordingly when they came to the falls, as they found that it was the right place, they demarked the boundaries for a road across the brink of the chasm, up the steep hill beyond and down the cliff on the other side of it, a sheer drop of four hundred feet! Of course no one ever attempted to drive over such a route as this, but the falls thus became and still remain the property of the township.

Following the surveyors, the settlers started to take possession of the district, and as early as 1862 the water power began to be utilized. A mill dam was built above the falls, thus depriving them of some of their supply. Later another mill-dam was erected, and a few years ago an electric plant for lighting the villages of Eugenia and Flesherton still further curtailed the flow of water.

The town of Owen Sound has long coveted the power which might be produced at Eugenia, and it is reported that engineers are now preparing plans of a plant to supply this Georgian Bay port with electricity from Eugenia. One of the schemes under discussion resembles on a smaller scale the engineering feat that is nearing completion at Vancouver. It consists of a tunnel through the hill rising above the left of the falls, by which water would be diverted to the cliff on the other side of the hill, where there would be a drop of some three hundred feet. This would be the end of a picturesque piece of scenery, but who will bewail the little Eugenia Falls while the mighty Niagara is threatened with a similar fate.—Globe.

RHEUMATISM ALMOST KILLED HER.

For years Mrs. S. Stahlschmidt, of Humberstone, Ont., was martyr to rheumatism. "I was so stiff and lame I could scarcely walk," she writes. "An attack striking my limbs made walking impossible. Friends and doctors gave prescriptions but I only got relief from Ferruzone. I took twelve boxes and gained from the first. To-day I am well, feel stronger, weigh heavier and look the picture of health." Whether muscular or inflammatory, chronic or otherwise, Ferruzone does cure rheumatism and sciatica, 50c per box at all dealers.

House and Lot For sale

ON BRUCE ST., DURHAM, NEW brick house, 30x32; 2 1/2 storeys high; double cellar, cement floor in one half, furnace in the other half. Small barn with stone stable underneath.
