Hutton Hill.

Mrs. John Dunsmoor left for Hamilton last week to see her brother, Mr. Campbell, who is seriously ill. Mr. Patterson, foreman of the C. P. R. construction party, near Allan Park, called to see Mr. George Cuff, lately.

Mr. and Mrs. Geo. Noble's home was brightened Thanksgiving day by the arrival of a young son. Mr. Geo. is so delighted he is growing younger.

Mrs. Alex. Alexander attended the funeral of her brother, Mr. Warlock, of Hepworth, last week.

We are sorry to hear that Mr. Jno. Lawrence is suffering with a bruised finger. He got it smashed while working on the C. P. R.

We welcome Mr. and Mrs. Sam Lawrence to our neighborhood, and especially Mrs. Lawrence, formerly Miss Annie McKenzie, who spent her childhood days in our midst.

Mr. Wm. Armstrong is visiting his brother, Mr. Elijah, at his old home. Suppose you will be lonesome, Will, as your lady friend is in the West.

Mr. Johnston, teacher, spent one evening Thanksgiving week with Mr. George Hutton.

Some of the young people attended the Anniversary at Vickers and tell us the programme was good.

Mrs. Wm. Alexander left for Toronto last week, and after visiting her daughters and son there, she is going to Kansas to see her daughter, who is ill.

Mr. Geo. Noble attended Mrs. Noble's sister's funeral in Port Elgin last week.

Mr. Patterson was the guest of Mr. Thos. Mighton lately.

Well, Alf., you going south, too? We know the other two gentlemen are going to see the new house and barn, but you have not given us your reason.

LOCAL OPTION IS SUSTAINED

In the local option by law legal fight another round was finished yesterday in the decision of the Divisional Court in which the appeal of the town against the decision of Justice Mabee was granted with costs to the respondent Sinclair, and also the latter's petition to have the by-law set aside was dismissed with costs. The tension which has been in existence since Saturday last as to the result has been nerve racking, and there were not many who would take a chance on the decision. Yesterday's announcement was not unanticipated, and is a complete vindication of the view taken by Town Clerk Gordon that the vote was in the nature of a plebiscite in which only one vote should be allowed each voter, and not as the opponents have contended that a vote should be allowed at every polling sub division in which the voter owned property.—O. S. Times

WHEN THAT COLD COMES

How is it to be cured? This method is simplicity itself. Rub the chest and throat well with Nerviline, use it as a gargle and take some in hot water before retiring along with one of Dr. Hamilton's Pills. Next morning find you refreshed. Free from cold and bright as a dollar. These household remedies are wonderfully successful, and certainly won't fail in your case. For sale at all dealers.

THE GUN EXPLOSION.

On Saturday afternoon the twelve year-old son of Capt. John Nahrstadt of Brooke met with a very painful accident which might easily have cost him his life. He was out hunting along the north shore of the bay when a double barreled gun he was using exploded, the pieces flying in all directions. His left hand was badly shattered and sundry scratches received on his left arm. Some of the flying pieces grazed his scalp and knocked the hat off his head. On reaching home a physician was summoned who had the injured lad removed to the hospital where his injuries were dressed. He is now making good progress towards recovery.—O. S. Times.

A Police Officer's Evidence

INDIGESTION AND CONSTIPATION CURED

Mr. Alexander Gordon, a retired Police Sergeant, of Merry Street, Motherwell, says—"Up to two or three years ago I enjoyed excellent health. Then my bowels became disordered and I suffered most fearful pain. Indigestion also attacked me and eating became very unpleasant on account of the nauseous after-effects and bad taste in the mouth. I also suffered from weakness and terrible pain in the back. I was very ill when Bileans were brought to my notice. I decided to give them a trial. Obtaining a supply, I was delighted to find that soon after commencing the course I obtained relief. I persevered, with the result that the constipation and back pains were overcome, and the indigestion disappeared. I am now as healthy as ever and can eat my food with relish."

CHANGE OF SEASON AILMENTS

At this time of the year the body needs toning up to meet the demands that will be made upon it by the coming winter. Signs of this need are headache spells, a weakly "run down" feeling, biliousness, indigestion, etc. A short course of Bileans will have the effect of toning up and bracing up the whole system.

BILEANS FOR BILIOUSNESS CURE.

Headache, Constipation, Flies, Liver Trouble, Indigestion, Palpitation, Loss of Appetite, Flatulence, Dizziness, Debility, Anaemia and all Female Ailments of all Druggists, 50c per box, or post free from the Bilean Co., Toronto, upon receipt of price, 6 boxes for \$2.50.

DENATURED ALCOHOL

May Before a Great While Replace Coal as Fuel in Manufacturing Industries.

(Mail and Empire.)

It may seem a faraway cry, but there are several prominent coal men at Chicago who are taking quite seriously the experiments made by the Department of Agriculture and others by which corn stalks, corn cobs, potatoes and various other more or less starchy substances are converted into alcohol at remarkably small cost. Not long ago the highest possible attainments for the denatured alcohol, the manufacture of which will be encouraged by the recently enacted legislation, was supposed to be to displace gasoline and other high grade products of petroleum used in operating automobiles and providing other special forms of power. But these Chicago coal men are looking a little farther ahead than that and are investigating for themselves in a superficial way the possibility that the domain of old King Coal may also be invaded and partially overcome by this new and unexpected rival.

There have been published recently many opinions respecting this new fuel, some of which ridiculed the possibility that it could even worst its nearest neighbor, gasoline. But the experiments that are being made by the Department of Agriculture and others, are demonstrating the possibility of making alcohol at a very low cost. Moonshine whiskey has sold in the South as low as 20 cents a gallon, and the production of the denatured alcohol probably costs no more than the surreptitious manufacture of distilled spirits by primitive contrivances. One bushel of corn, it is asserted, will make five gallons of whiskey, and in the large distilleries the actual labor cost has been put as low as five cents a gallon.

In the manufacture of denatured alcohol the cost of material is in some instances absolutely nothing, being the waste products of the farm. In a report issued a few days ago by the Department of Agriculture the results of recent experiments of making alcohol from corn cobs and from corn stalks at Hoopseton, Ill. were given. A large cannery is located there, and the conclusion reached by the experimenters is that the erection of a distilling plant in connection with the cannery, in order to use up the waste products of the cannery, would prove profitable. From a ton of green cobs, 11 gallons of alcohol were obtained, and from a ton of green stalks, 6 gallons. Previous experiments showed that a ton of stalks from common field corn produced 15 gallons of alcohol.

That there will be a livelier interest in the subject after the Denatured Alcohol Bill takes effect Jan. 1, seems certain.

But the production of the denatured alcohol, it is thought, will not be

confined to large distilling plants. The region of its greatest activity will be the distinctively agricultural districts, where fuel is relatively expensive, and where there is a superabundance of waste products. There are coal men who are inclined to the view that in the strictly agricultural regions, if no farther, coal may sooner or later be displaced to a considerable degree.

FALL WORK AGAINST INSECTS.

(By C. J. S. Betume)

The time of year has now arrived when most of our insect foes have ceased their active work and are withdrawn from observation and consequently most people come to the conclusion that the season's fight is over and that nothing need at present be done. But this is very far from being the case. There are many destructive insects that can be more easily dealt with now than at any other time of the year.

First and foremost the pea-weevil. The losses from this insect have been very much lessened during the last two seasons in Ontario, but this does not mean that we have got rid of the trouble. The insect is still with us, but being in greatly reduced numbers can be more easily dealt with. If there is the least suspicion of the tiny beetle in the newly harvested peas, they, and in any case peas intended for seed should be at once treated with bisulphide of carbon which will kill every one that is exposed to its fumes. The method is familiar enough; put the peas in an air tight cask or bin, and place in an open pan on top of them one ounce of the bisulphide to every 100 lbs. of peas (a bushel weighs about 60 lbs.) cover up tightly and leave for 48 hours. Then open up either out of doors or where there is a thorough draft of air; do not allow any breeze or light to come near it, as the vapour is very inflammable and explosive; every weevil or other insect among the peas will be dead and non-infested seed will be available for next year. This same treatment should be used for the Bean-weevil, which is a serious pest in some parts of the province.

In addition to this treatment of the peas themselves, the pea-straw and rubbish should be cleaned up and burnt and all refuse where threshing has been done should be similarly got rid of. This will destroy any weevils that have already come out and are hiding away for the winter. It will pay to do this whether the insect is known to be present or not.

This brings us to the next important matter, namely clean farming and gardening. All sorts of insects find their winter quarters in refuse. Many that infest grain take refuge in the stubble, others are sheltered by loose rubbish, others again hide in tufts of grass, among the weeds in fence corners, under bark, where ever in fact there is shelter of any

From Forest to Patient.

ALL modern science goes to prove that herbal medicines are vastly superior to those containing mineral ingredients.

The herbs of the field and the trees of the forest constitute nature's "medicine chest," and the highest benefit which science can confer on man is the discovery of nature's medicinal balms and essences, and their preparation in form suitable for use by the people.

Bileans for Biliousness—the great Australian cure for indigestion, headache, debility, liver trouble, etc.—are purely vegetable. They are entirely different and superior to ordinary liver and stomach medicines. It is well known that liver medicines hitherto in use mostly contain bismuth, mercury, and other harmful mineral products, and rely upon these ingredients for their temporary effects. These mineral constituents are very injurious if taken for long, and produce such effects as that of loosening the teeth, causing the hair to fall out, etc. Bileans are entirely superior. They are compounded from extracts and juices of the finest known medicinal plants. In taking them there is no fear whatever of any harmful secondary effects. They cure that which they are taken to cure, and do not leave behind them evils worse than the original ones. They do not merely purge and weaken, like the old-fashioned medicines, or do the work which the liver and stomach should do. They tone up and enable these organs to fulfil their proper functions, so that when a cure is effected and Bileans are left off, the organs remain strong and healthy. Users of Bileans need therefore never fear their use will lead to the contracting of the terrible "pill-taking" habit.

FREE BOX

Bileans FOR Biliousness CURE.

prevented from finding on the premises the shelter they need during the winter and will either perish or go somewhere else for a hidingplace, and thousands more that are in the egg or chrysalis stage will be destroyed. Many, no doubt, will think all this too much trouble, but if they faithfully try it, they will soon find that it pays. A GUARANTEED CURE FOR PILES Itching, Blind, Bleeding, Protruding Piles, Druggists are authorized to refund money if PAZO OINTMENT fails to cure in 6 to 14 days. 50c.
