THE maxim of many housewives is, "When in doubt blame the flour." This is unfair.

If your baking goes wrong, investigate—find the cause. Look to your stove, your yeast, your baking methods.

If you succeed in pinning the trouble down to the flour—if you clear yourself—then take up the flour question in dead earnest.

Consider that flour, to be successful from a baking standpoint, must be fine to produce light bread or pastry, pure to make that bread or pastry wholesome, and rich in nutriment to make it nourishing.

The good housewives all over the country are learning that

Ogilvie's Royal Household

has these three qualities in the greatest degree.

Ogilvie's Royal Household is milled by the most modern methods, purified by the only process that makes for absolute purity and made only from Manitoba Hard Wheat which contains the highest percentage of nutriment.

Royal Household Flour, in competent hands, never disappoints. Your grocer will guarantee this and gladly furnish the flour.

Ogilvie Flour Mills Co., Limited Montreal.

Priceville.

The 24th May came out beautiful and reminded us of the birthday of our late noble Queen Victoria. How beautiful it is to look at the scenery caused by the works of Nature. The face of the universe is clothed with a mantle of beauty.

The hoary and the aged are reviving after the severity of the winter and by the glorious rays of the sun they receive new strength and vigor. But alas when we visit the resting place of the dead the many new graves made during winter tell a tale that many a dear friend had passed from the scenes of action during winter, for the aged, the middle aged and the youth all alike had been summoned by the grim messenger.

The time for mosquitoes has arrived and they make quite an impression whenever they apply their sharp sting on man or beast. Mr. Hugh McKinnon south line, lost a valuable mare last Sunday.

Mr. John McArthur, merchant of this town, spent a few days in Toronto last week on business.

Mrs. Smart, (nee Annie R. McKee) and family of the Soo, are visiting at her mother's, Mrs. Donald McKee's of this town at present.

Mr. Donald Graham was in Toronto lately attending the funeral of a close relative.

We met old Mr. Reid, of Durham, on his wheel the other evening and he can use his feet yet at paddling as good as a 20-year-old boy.

We are sorry to notice the death at Durham of an old resident a few miles west of this place, in the person of Mr. Samuel Scott one of the pioneers of the old Durham Road.

vouch the feeling of all his old acquaintances in forwarding condolence to his widow in her time of trouble and bereavement.

We are pleased to notice our corner friend has a leniency towards Liberalism and we hope to find him yet restored to his former stand in politics by casting his ballot in favor of the Reform candidate and we will pronounce him a jolly good fellow.

Pomona writer comes out occasionally with some of his spicy items. Why not come oftener, as he has a large territory to work upon. Experience teaches us that it is a hard matter to collect news, more especially out in the country. To get up a decent looking budget perhaps at the noon hour or any other spare time a person has on a farm is utterly impossible.

Spring Bank.

Mr. John Whitmore left last week for Rainy River district where he is likely to remain for the summer with his two stalwart sons of that place.

Mr. Jas. Ritchie is at present busily engaged with Mr. J. W. Lawrence erecting a brick implement shed and hog pen.

Mr. and Mrs. J. Long are employed as man and maid servant with Mr. David McKelvie this spring.

Mr. Allan Kennedy is a busy man erecting wire fences on his farm this spring.

Miss Mary Brown, after spending a number of months in Toronto is at present brightening the parental home with her cheerful presence.

Mr. Robt. Henry is in very poor health at present. Old age is creeping on but we hope the intelligent old man may be spared for many years yet.

Mr. Peter Reid was recently operated on for cancer of the lip, but regarding health and wound he is as well as usual.

The exceedingly wet weather which was so prevalent in the fore part of seeding time was a kindness to some of the farmers situated on low lying lands, from getting their crop in early as they would like, but nevertheless it has put a bottom in our meadows that evidently prove of worth when haying time comes.

The Rev. Mr. Jamieson of town, visited in this neighborhood on Saturday last.

Mr. Joe Brown invested in a nobby new top buggy recently. Joe will knock the shine of the best of 'em now.

Mr. T. Orchard of Holstein was up this way and bought a few head of cattle recently. David McKelvie and G. A. Watson were among dispersers.

Thin as a Rail Are You?

Every day spending as much energy as you make—if the balance goes a little further well, you get thinner. On the danger line to day,—to-morrow may be too late! Better use Ferruzone, it builds up—a little gain the first week. Not quite so thin. Keep right on, lots of fat won't hurt at all. Your blood is enriched, cheeks grow rosy, your heart and nerves grow strong and you don't tire so quickly. Joyous robust health, a sturdy frame and a cheerful mind—all these come with Ferruzone. You'll try it, only 50c. at all dealers.

What does science say about ploughing, anyway? She says, in the first place, that Nature runs the biggest plough of all, and that we had better watch her at the trick and see what she is doing and how she does it. Well, the glaciers and the streams of the pre historic world did the first ploughing—they ground and tore over the surface of the rocks, grinding off and depositing the top dressing of silt, which we call soil, but the clays were fearfully hard-packed—"close-textured" science calls it—so hard they resisted the soaking of water almost like rock; so Nature set the angleworm to work, burrowing, chewing, sifting, digesting the hard soil. What for? To break them up, so the roots can go down and fetch the cream to the top, and when man comes along with his plow, what is he doing but skimming the cream off the top, or rather feeding the cream to his crop to be skimmed in the harvest? I do not vouch for the statement or I should have all the scientists of the world down on me; but the greatest scientists of the world do vouch for the statement that within a single acre of ground there annually passes thru the bodies of angleworms ten tons of earth.—From "The New Spirit of the Farm," by Agnes C. Laut, in "The Outing Magazine for May."

Going Into Consumption?

When your throat rattles, your lungs and chest are sore, your throat is stuffed with cold—don't fear consumption—use Catarrhzone and get well. It clears the throat, cures hacking, relieves tight chest and soreness in the bronchial tubes. To clear away Catarrh of the nose nothing could be better. Catarrhzone is Nature's own remedy,—it heals and soothes—cures every form of throat, lung or bronchial trouble. Prescribed by many specialists and used by thousands every day. 25c. and \$1.00 at all dealers.

Bybolt—"What do you call good weather, anyway?"

Tightweed—"The kind that makes a man's wife prefer her own home to a trip down town."

"You made a mistake in your paper," said an indignant baker, entering the editorial sanctum of a daily journal. "I was one of the competitors at an athletic entertainment last night and you referred to me as 'the well-known lightweight champion'."

"Well, are you not?" inquired the sporting editor.

DARLINGS' DRUG STORE.
