ITEMS OF INTEREST.

First Surgeon in St. Louis.
Dr. Antoine Francois Saugraine settled in St. Louis in 1800 and was the first surgeon to locate west of the Mississippi river. He spent all of his leisure time in experiments in chemistry and with electricity. The Indians were frequent visitors at his laboratory and, not understanding the mystery of his experiments, held him in great awe and wanted to worship him as a god. Before the village of St. Louis was incorporated Dr. Saugraine acted as postmaster. He tied the mail up in a blue silk handkerchief and left it on the doorstep. When any citizen wanted to know if he had a letter he untied the handkerchief, looked the mail over, paid for the postage in a piece of coon-skin, which was legal tender, and walked on. The first lucifer matches ever made in this country were made by Dr. Saugraine. The small wooden sticks were dipped, one at a time, in the combustible substance and then lit by friction, as at the present time. He also made the first thermometer used in the west.

The Angler Fish.

A singular superstition about the angler fish is entertained in some parts of Sweden (Bohuslan), according to Malm and Smitt. "It is so feared by many that the tackle is out as soon as the 'monster' reaches the surface, and its captor hurries home in order to get there, if possible, before the misfortune pretended by the monster overtakes him." The extreme of misfortune—death—is believed by some to be indicated. Nilsson tells that the Swedish fishermen on the banks "believe that on board the vessel on which an angler is taken some one is doomed to die soon. They therefore never or hardly ever take the angler on board, but prefer to cut the line and thus lose the hook with the fish."

An anemometrical faculty is attributed to the angler in Massachusetts. According to Storer, "among the fishermen in some parts of the bay there is a common saying, 'When you take a goosefish, look out for an easterly storm.'"

Wedding Gifts

Our stock for the wedding season silverware is now complete and everything up-to-date. This store has the name for high-class goods, and always will so long as there is such a thing as a jewelry business.

Wedding Engagement Rings

We have always in stock, at least, three dozen wedding rings to pick from, every style, and about one hundred engagement rings, including Diamonds, so you have no reason to go away disappointed.

FARM IMPROVEMENTS

IDEAL FENCE

Will make a great improvement to your farm if placed along the front, near the house, or any place where appearance counts. It adds more value to your farm than its cost because it is made to last. High-Class in everything but price.

Martin-Senour Paint will make your farm buildings look better and worth more. For sale by **A. S. HUNTER**

Hecla Furnaces are fuel savers.

Because the cast iron combustion chamber is corrugated in such a way as to add about 2/3 to the heating surface, with the result that from the same fire a "Hecla" will extract a proportionately greater amount of heat than will a furnace built with a smooth combustion chamber.

The corrugations serve another purpose in relieving the strain of expansion and contraction.

Send me a rough plan of your house, and I will make you an estimate of the cost of installing a "Hecla" Furnace. I will also send you the new "Hecla" Catalogue. Write now—while you think of it—to "Clare's Furnace Builder," care of
