Station Destroyed.

Lightning struck the wires and entered the station during the storm on Taesday night, set the building on fire and completely destroyed it. The fire happened just before the arrival of the late train, and there being plenty of help on hand the contents were all removed. The Grand Trunk has been having hard luck during the recent storms. Any farmer troubled with weedy filds can rid hmself of these pests by turning sheep onto them for two consecutive seasons. Wild mustard one of the greatest pests of a farmer can be killed in this way, as sheep have a liking for them. In the win ter at the barn, the seeds of weeds are killed by being thoroughly mas ticated by the sheep which consider them a great dainty.

Where steel and cast-iron come together, the metals are fused or welded, so that they practically become ONE. This fusing (a Clare patented process) makes the "Hecla" absolutely dust, smoke and gas, tight.
