THINGS WORTH KNOWING.

When mixtures have been burned in graniteware, half fill the utensil with cold water and add a little washing soda or soap powder. Heat slowly to the boiling point, then empty and wash as usual.

When a broom is beyond use for sweeping it will be found excellent for scrubbing the kitchen floor. Go over the floor with the broom and hot suds, then mop with clear water. Never use a good broom for this purpose.

A plumbing hint is never to put rock salt in traps. It is true that the salt, by absorbing moisture from the atmosphere, will keep the traps full of liquid, but the strong salt solution will attack brass couplings and trap screws and injure the glaze of porcelain.

Before you plunge into the midst of your preserving and canning, wash all the labels off your fruit jars and write out a new set. They will then be ready for use immediately, when the jars are filled, and you will not have to stop at the wrong moment to prepare them.

It is often difficult to keep plants in the windows watered properly without making white spots on the window sill. If one will water them with a long necked bottle, the trouble will be obviated. A bottle of this description takes up much less room than the little watering pots with the long spouts.

A small pad of tissue paper sprinkled with methylated spirits will give a brilliant polish to mirrors, picture glasses and crystals. The pad, used without the spirit, is excellent for burnishing steel, rubbing grease spots off furniture, polishing silver, etc. For packing glass, china, and ornaments, a roll of tissue paper is invaluable.

The World's News.

R. L. Aikens is the newly-appointed electrical engineer of Toronto.

The new Public Library building on College street, Toronto, will cost over \$260,000.

West Toronto is negotiating with the Toronto City Council for annexation to the latter place.

The body of Miss Mamie Remke was found in the Detroit river, and foul play is suspected.

While attempting to shield a companion, Norman Thetford, of Toronto, was killed in Mills City, Mont.

The Deseronto Iron Company's plant was struck by lightning and destroyed on Tuesday night.

Washouts on the C. P. R. between Kenora and Keewatin have considerably tied up traffic on that line.

Niagara Falls hotelmen have been heavily fined for selling liquor during prohibited hours.

Wm. Cook, a farmer living near Chatham, had all his barns, together with all this season's crop, destroyed by fire.

Frank Arnold, of Leamington, was killed by a C. P. R. train in Chatham on Tuesday. He was twenty-seven years of age.

Andrew O'Melia, a St. Catharines carpenter, fell from an eighty foot building in New York and was instantly killed.

John Miller, of Ottawa, a Grand Trunk Railway yard inspector, was run over by a shunting engine and killed.

W. Phelps, of London, has been engaged as organist at the Bridge st. church, Belleville, succeeding Prof. V. P. Hunt, now of Edmonton.

Dr. Milton L. Hersey, of Montreal, has given \$10,000 to endow a fellowship in the department of chemistry of the Kingston School of Mining.

A clerk in the employ of the Metropolitan Bank at Harrowsmith has disappeared and bank bills amounting to \$1200 have gone with him.

James Somerville, Montreal, second vice-president of the International Association of Machinists, was fined \$3 and costs for calling a strike-breaker a "scab."

Mrs. Emma A. Stuckman, of Napanee, Ind., has just completed her fifty-sixth year teaching school. She has been teaching since 1851, and started when 14 years of age.

Don't be afraid to give Chamberlain's Cough Remedy to your children. It contains no opium or other harmful drug. It always cures. For sale at all Drug stores.

Lightning struck the residence of Mrs. Vorden, Brookville, on Tuesday, and descending through the chimney, tore up the carpets and injured the walls of the house. No one was injured.

Samuel Gompers, president of the American Federation of Labor, is on the stump for Bryan, Democratic candidate for President of the United States, and asks all Labor men to vote for him.

Belgium has a Sunday postage stamp, issued for those who do not wish to have their mail delivered on Sunday. All mail having the Sunday stamp is held over by the carriers for delivery on Monday.

The law prohibiting the wanton killing of native song birds for their plumage for millinery purposes is to be rigidly enforced in Illinois this year, and all dealers will be prosecuted.

Miss Margaret Young, of Niagara Falls, was fired upon by an unknown man on Tuesday while out driving alone. She ducked as she saw him draw the revolver, and whipping up the horse, escaped.

Prof. Adam Shortt, who has been professor of political science in Queen's University, Kingston, since the chair was founded, has been appointed to the Civil Service Commission, and will resign.

W. F. Nickle, M. P. P., Engineer Har, and Roadmaster Irwin, were injured on the Kingston and Pembroke Railway on Tuesday by a gasoline lorry on which they were riding colliding with a hand car left standing on the tracks. None were badly injured.

D. C. Clinch, a prominent broker of St. John, N. B., has been indicted for embezzlement on charges preferred against him by Capt. Chas. Morrissey, of Liverpool. Morrissey sent him nine thousand dollars to invest in United States stocks, which was appropriated by the defendant.

To cure hicoughs take three swallows of water in one breath.

It is well to keep hanging back of the stove, holders made of padded squares of gingham, neatly bound, with which to lift hot kettles and pans from the stove. This will prove an economizer of towels, many of which are burned by such use.

Before using new gas mantles soak them in vinegar and hang them up to dry. When quite dry put them on the burners. In this way a brilliant white light is obtained and the burners will last twice as long as usual, even in draughty places.

Arthur Enterprise Sold.

The Arthur Enterprise changed hands with the last issue, Mr. H. E. Byewater, who has ably conducted the paper during the past six years, having disposed of the business to Mr. Rixon Rafter, B. A., of Arthur Township. Mr. Byewater conducted his paper from an independent standpoint, but when occasion arose was not afraid to express his convictions with no uncertain sound.

The new proprietor's venture into the journalistic field will be watched with interest by his confreres in this district, and is characteristic of his industry and ambition. When a mere child he had the terrible misfortune to lose the sight of both eyes, but by hard work and perseverance educated himself and succeeded in taking the degree of B. A. at Queen's University. He has had special training in newspaper work, and has an ingenious system of shorthand by which he overcomes his blindness in reporting speeches, etc. The type writer enables him to supply printer's copy that will be much more legible than the written copy of his more fortunate brethren in the work, and we trust he will be heartily supported and encouraged by the liberal patronage of the residents in his territory. —Listowel Banner.

Catarrh Now Curable

But Never by Medicine Swallowed, Snuffs, Sprays or Douches.

Catarrh is not a blood disease and that is why it cannot be cured by any medicine taken into the stomach. Catarrh is a germ trouble contracted from the germ-laden air you breathe inward. These germs fasten themselves in the tissue and air cells of the breathing organs, multiply by millions, cause sneezing, coughing, raising of mucus, discharge from the nose, difficulty in breathing, hoarseness, dryness and stoppage of the nose, tickling in the throat and other symptoms that can only be reached by the dry air principal of Hyomei.

It mediates the air you breathe with the curative properties of the Australian Eucalyptus Forests where catarrh is unknown.

The reason you get relief in a minute or two from Hyomei is because it destroys every catarrhal germ in the air you breathe, and its dry penetrating aroma will reach the innermost recesses of the air passages, killing millions of germs a minute. Their destruction means freedom from oppressed respiratory organs. Macfarlane & Co. sell Hyomei under a guarantee of satisfaction or money back. Price \$1.00.

Feed Cows After Milking.

"My practice has always been to feed after milking," said a speaker at a dairymen's meeting. In the morning when we go into the cow stable the first thing is the brushing off the udders and the preparation for milking. The cows get up lazily, expecting to be milked, as they are used to the habit. When they have once been trained to the idea of milking before feeding, it does not worry them.

"At milking time they always have their attention riveted on the business in hand. A cow being fed and milked at the same time usually has her attention on the feed, and very often kicks out quickly if the milker approaches unwarningly. The rattle of the pail on any slight touch of the hand while she is being fed will cause her to kick. As soon as all cows are milked we notice a general movement among them for their feed. Each one seems to know when the milking is finished, and they are restless until the feeder has gone the rounds. All this is habit on the part of the cows, and to throw them out of it might mean a loss of milk flow.

"Give the grain ration after feeding—that is my advice. To feed it twenty minutes before feeding is also poor practice. No half dozen cows are through feeding at the same time. One will step back and forth continually to reach the last bit of grain, and this is very annoying to the milker. Feed after milking. It saves time and temper."

PILES 8 OUT OF 10 persons suffer at some time or other from Piles!

So says a great medical authority. There is no disease causes more pain and wretchedness than piles; and by giving almost immediate ease Zam-Buk has won the praise of thousands of sufferers. If you are suffering let Zam-Buk cure you. Neil Devon, Webbwood, Ont. suffered with piles eight years. A few boxes of Zam-Buk cured him. He says:—"I have had no return of the trouble so that I know the cure is permanent."

Mr. C. B. Frost, Lennoxville, P.Q., writes: "I have proved Zam-Buk a great cure for piles from which I suffered acutely for a long time."

It is believed by the members of the Academy of Science of Paris that an effective cure for consumption has at last been found. After a long series of experiments on patients in various parts of the earth and at different altitudes, they have declared in favor of establishing captive balloons at heights where germs, dust and smoke never penetrate. To cure consumption they state it merely necessary to give the sufferer plenty of absolutely pure air, but nowhere on the face of this earth is pure air so saturated with gases and polluted with dust and germs that it is a wonder the human lung even of a healthy person can breathe it. In the country the air is much better, but by no means pure. On the high mountain-side improvement is still greater, but even there germs are more or less common. There are dust, pollen, and flying matter from the distant cities.

Impure Thin Blood Clogs the Kidneys Slows the Heart Fags the Brain

Weakens Every Part of the Body Causes Organic Diseases. Just as strength is the natural outcome of pure blood, so is debility and sickness the result of impure blood. To know how quickly how surely Ferrozone cures, to see how it rebuilds and restores, you have only to read the following letters—read them carefully—see if the symptoms resemble yours.

Miss Evelyn M. Gaetz, of Kingston, writes: "I have had an attack of blood disorder which broke out in horrid looking pimples. They were ugly, red disfiguring blotches that ruined the appearance of my face. I tried all sorts of medicines but the pimples didn't leave. I was recommended Ferrozone and gave it a trial. I noticed an improvement after the second box, and kept up the treatment which finally cleared my skin. As the result of Ferrozone I have a clear, healthy complexion, and can recommend it to all other young women similarly affected."

Another young lady well known in society circles of Springfield, who derived exceptional benefit from Ferrozone, says: "I felt it my duty to make known the value of Ferrozone. My trouble was poor weak blood, and as a consequence my lips were pallid, and my cheeks had no color. I wasn't at all strong and required a bracing tonic. Ferrozone soon brought color to my cheeks, improved my appetite, and made me stronger than I had been in years. I favor Ferrozone because it is so simple to take and works so quickly."

No blood remedy exists that has the power to cure, to heal, to restore like Ferrozone; try it, 50c. per box at any drugstore.

"BIG TREE" GROVE IS BURNING.

Monsters of California Forest are in Danger of Destruction.

The Calaveras group of big trees in California, one of the natural wonders of the world, is in danger of destruction by fire. Starting from sparks thrown off by an engine used to haul logs, on Monday last, the fire spread to the heavy timber a mile west of the north grove of big trees.

The forest rangers, together with the settlers, many visitors living in camps around and in the grove, and the employes of the Big Tree Hotel, have been fighting the flames. Already "the mother of the forest," a great dead hulk at the edge of the grove, is aflame, and like a great glowing torch, is threatening its living neighbors. "The mother" is 327 feet long, with a trunk seventy-eight feet in circumference, and it will take perhaps weeks for the flames to consume it.

Old Resident Dead.

Mr. Alexander Dow, probably the oldest man in this section of the Province, died on Monday morning after a brief illness at the residence of Miss Chamney, with whom he has been boarding for some years. On the announcements the age of the deceased was given as 90 years, but in conversation he has often been heard to claim an age near the century mark. However, Mr. Dow was in Minto and kept a store long before Harrison was on the map, and men now approaching the sixties remember him as a middle-aged man when they were very small boys. Mr. Dow was a reticent but friendly old man, well informed, especially on historical subjects, and will be missed from our streets, as he was a great walker and almost constantly abroad in fine weather.—Harriston Review.
