HALK dust is fine and white, but it won't make good bread. Fine, white flour is all right as far as it goes, but if it lacks nutrition its other qualities amount to nothing as far as baking is concerned.

Royal Household Flour

is not only the finest and purest of flours but also the most nutritious. It is milled by a process which gives you all of the nutritious properties of the wheat in the best form for your use. You can get it from your grocer.
