Fall Lines Now Ready

Up-to-date styles in Men's Clothing. The kind of clothing we sell is the kind that wins favor with the best dressed men in town. It is DIFFERENT ENTIRELY from the hum-drum sorts to which you have been accustomed. If you want something really distinctive in a fall suit or overcoat, this is your store. Men's Suits, \$10 to \$15. A few Men's Odd Suits to clear at \$5 to \$8.

Fall Overcoats

We're showing the handsomest line of overcoats we ever offered—ready-to-wear garments that have good fabrics, graceful proportions, character in every line, and fine tailoring to make them thoroughly distinctive. Come and see what we call value in Overcoats at \$10 to \$15.

Ladies' Fall Coats

These garments solve the coat problem for ladies of refined taste, for they are assured of being as correctly dressed and as up-to-date as any of those residing in the great centres of fashion. Ladies' semi-fitted Coats, very stylish, beautifully trimmed with self-strapping, velvet and silk braid, the cloth is kersey, in a beautiful finish, \$13.50. Ladies' loose Back Coats, kersey cloth, black, navy, green, brown, handsomely trimmed, \$12.50.

Girls' Dressy Coats

These are handsome models to fit girls of 14, 16, and 18 years of age—just the style of coat the girls want. Children's Coats—for girls 6, 8, 10 and 12 years of age—very warm and serviceable, made of goods that will stand any amount of wear and tear.

JAMES IRELAND

Hardware

The city exhibitions and the best fall fairs are a thing of the past, and we are again settled down to business. We assisted all we could to make the South Grey Fall Fair of 1908 the best fall fair ever held in South Grey and we accomplished our point. We now intend to give you the best bargains in hardware ever given you in South Grey, and we will accomplish our point.

We are still selling the "Penn Esther" Range, the cheapest reliable range on the market—find us a dissatisfied customer and we will give you a handsome present.

Our store is never without a fine line of Heating Stoves and we can suit you in price, also quality.

You can have your choice of Stove Boards, Coal Hods, Ash Sifters Stove Pipes and elbows.

Now is the time to clean your stove pipes. Try a bottle of Black's "Special" Stove Pipe Varnish.

Do not forget that we have a great line of Cutlery to offer you. Every woman should see our odd pieces.

W. BLACK

Sample Boxes Free!! The most powerful healer in the world is Zam-Buk, and we offer you a free trial box. Zam-Buk combines the knowledge of the ancients with the science of the moderns. The charioteers, gladiators, and wrestlers of ancient Greece seldom emerged from their contests without some gaping wound or severe bruise, and to anoint their injuries with secret balms was part of the day's program. In Zam-Buk you have the modern representative of these ancient healers. Ordinary ointments contain mostly rancid animal fat or poisonous mineral substances. Leave the lid off these ointments for a few days and note the result. Zam-Buk, on the contrary, is absolutely free from any trace of animal fat or mineral poison. It is made from purely herbal essences, is so concentrated and purified that it is suitable for the delicate skin of children, and yet so powerful as to be equal to the most stubborn sore, ulcer, or chronic wound. Zam-Buk never goes rancid. It always keeps clean, fresh, and sweet. Nature has given man the instinct to rub a place that hurts. She has also given him Zam-Buk, Nature's own herbal healer with which to rub. Apply Zam-Buk to a sore, a cut, a scratch, a poisoned wound, a patch of eczema, and at once the healing process begins. It prevents suppuration, blood poisoning, and pain and smarting, and heals. The best test is a personal test. Send in for a free box and let Zam-Buk prove its own case. See coupon below.

DOMINION ELECTIONS. 1908.

TO THE ELECTORS OF SOUTH GREY: GENTLEMEN.—The Dominion Election will be held on the 23rd of October. I again respectfully ask for your vote and influence.

When Alexander McKenzie went out of office in 1878, the public debt of Canada was \$140,302,096. When Sir Wilfrid Laurier took office in 1896, the debt had increased to \$258,497,432, an annual average increase for eighteen years, under Conservative rule, of \$10,503,075, in our public debt. When Sir Wilfrid Laurier had been 10 1/2 years Premier of Canada, his Government had altogether, for the 10 1/2 years, only increased the public debt \$5,174,427, or considerably less for 10 1/2 years than under the former Government for one year. And the public debt of Canada, per head of the population, was on the 31st of March, 1908, only \$12.84, while, when the Laurier Government went into office in 1896, the public debt was, per head of the population, \$50.87; and this notwithstanding the fact that the present Government has spent such large sums for the development of the country.

Come, if you please, to my meetings and hear public questions discussed. It is generally admitted that I have done for South Grey and its people, without making any difference between Liberals and Conservatives, more than any other Member the Riding ever had. If I have so helped the Riding, is it not fair and reasonable that the people of the Riding should give me their hearty support? I believe they will, especially that I have now the advantage of four years' experience.

I am, gentlemen, Yours sincerely, H. H. MILLER.

HYMENEAL. RYAN—SUTHERLAND.

On Wednesday afternoon the marriage of Miss Bessie Roberta Sutherland, daughter of Mr. and Mrs. Alexander Sutherland, Bradford, to Mr. Frederick C. Ryan, Unionville, took place at the home of the bride, which was prettily decorated with asters and palms for the occasion. The Rev. Charles Ryan, Novar, brother of the groom officiated. Mrs. W. Pringle, Beeton, cousin of the bride, played the wedding music. The bride, unattended, was given away by her father, and wore an empire gown of palest pink striped silk voile over chiffon taffeta, with trimmings of fillet and gold lace, and carried a shower bouquet of white roses and lily of the valley. While the register was being signed, Miss Florence Strong, of Bradford sang "O Fair, O Sweet and Holy." The guests were the immediate friends of the families. The dining-room was decorated in autumn tints, and here the wedding breakfast was served. Mrs. Ryan's going away gown was a smoke blue cloth, with touches of Persian, and hat to match. Mr. and Mrs. Ryan left for Detroit on their return they will reside in Unionville, where Mrs. Ryan will be at home after November 1st.—Toronto Globe.

Invented Safe Headache Cure.

Away with headaches, be done with dizziness, bad stomach and biliousness. A cure has been found—use Dr. Hamilton's Pills and enjoy the health they so surely bring. Nothing but healthful vegetable extracts in Dr. Hamilton's Pills. They cleanse and purify the whole system, act as a perfect tonic. Safe for children, women and men. Sold in 25c. boxes by all dealers.

AROUND THE FARM.

Ropy Milk.

D. H. Jones, Lecturer in Bacteriology.

During the past few weeks we have had brought to us for investigation several bad cases of ropy milk. Each case was presented by a farmer whose farm was situated near a city in which he peddled the milk of from twenty-five to thirty cattle, each having a good business and each rapidly losing his customers because the milk, if kept a few hours, would become viscid, slimy, or ropy, apparently altogether unfit for use, and disgusting to handle. This condition of their milk brought about a serious financial loss to these farmers, a loss which was increasing from day to day, and after trying their utmost to solve the problem, they were almost in despair of finding a remedy when they brought the matter before the Ontario Agricultural College authorities to see if we could do anything for them. We are able in each instance to find the cause and suggest a simple remedy, which, if put into practice, would entirely go away with the mischief.

Although it is possible for this condition of milk to occur at any time of the year, this is the season when it is perhaps most prevalent; and so, thinking that probably other farmers or handlers of milk may be so troubled, and entirely in the dark as to the cause and the control of such an unsatisfactory state of things, we take the liberty of sending to the press a few lines on the subject.

Although it is possible for cattle suffering from inflamed udders or garget, to produce slimy milk, we proved conclusively in each case investigated, that it was not any disease in any of the cattle that was the cause of the ropy milk. In fact, this kind of ropy milk is not caused by a disease producing germ, but by one that lives in water, and is not at all dangerous from a health standpoint, either for animals or man. So that this kind of ropy milk is not caused by a diseased condition of the cow, nor will it cause any disease in man, but owing to its disgusting appearance, the slimy, ropy stuff is thrown away by the housekeeper, and the milkman who supplies it is told that his milk is not wanted any more.

The germ that cause the trouble is known to bacteriologists as Bacillus lactis viscosus,—that is, the germ which makes milk viscid. It lives indefinitely and multiplies in water containing organic matter. Some districts are troubled with it and others are not. We may liken it to a bad weed which may be prevalent on one farm or throughout a whole neighborhood, and other districts may not be troubled with it at all until it spreads to them from the infected areas in one or more of the many ways that everybody knows weeds spread. The germ, though small—it has to be magnified a thousand times before it can be seen, has a comparatively thick, gelatinous covering when it grows in milk; and as one germ dropped into milk will increase into millions of its kind in twenty-four hours, we can easily see how the milk becomes sticky or ropy: it is simply because millions of these germs with their sticky, slimy coverings have developed in the milk, until the milk is practically nothing but a mass of them.

At the farms at which investigations were carried on, the cattle on inspection appeared to be all right, and samples of their milk tested were proven to be free from the trouble. Samples of water from the wells, cisterns and cooling vats proved these to be the source of the trouble in every instance. In one case, the barnyard well proved to be badly infected, and from this well the cooling vats were filled, and these were badly infected. Just one spot of this water accidentally splashed into a can of milk would cause it to become ropy. If this water splashed on to the floor and then dried up, the dust on the floor would be infected, and if this dust blew into the milk the milk would turn ropy. If any of this water got on to the milkman's hands, he would be liable to smear it on the

ens when he was putting them into the vat, or when he was putting on the can lids. The result would be ropy milk. In many other ways it would be possible for a little of the water to get into the milk. Then if the cans, pails and strainers were not thoroughly scalded after they had once had infected milk in them, the milk that was put into them afterwards would become ropy. As it takes from twelve to thirty-six hours for the ropiness to develop, the milk has usually left the milkman's, or farmer's hands, before it gets ropy, and these men know nothing about it until they hear from their customers about it next day.

Such, then, is the nature of the trouble and its cause; now for the remedy. When once milk is infected, it cannot be prevented from becoming ropy unless it turns sour. The souring of the milk by the lactic acid germ will prevent the development of the ropy milk germ, and we have known farmers prefer to have their milk turn sour rather than have the reputation of being retailers of ropy milk, and so they did not put their cans into the cooling vats. The remedy for the trouble then is to prevent the germs from getting into the milk, and to prevent them from getting in, we must know how they get in and where they come from. A simple way of ascertaining where they come from is to take a series of vessels, such as tumblers, cups, bottles or jugs, thoroughly scald these and put into them some milk immediately after milking. Then into one of these put about a spoonful of water from the cooling vat, into another the same quantity from the well or cistern, into another a little dust from the stable or milk house floor, and so on, putting into one of these vessels of milk a little of the water or other material which may be suspected to be the source of the infection. Then cover these over with a plate or saucer, or anything else that has been scalded, and put them away where they will not be disturbed for twenty-four hours or so. Then using a different spoon or fork for each one test them for ropiness, and in this way one can find out where the germ is coming from. All cans, pails and strainers should be thoroughly scalded or steamed before use each time. If the source of contamination be a well or cistern the water from these places should not be allowed to touch the milk cans, pails, etc. Or if no other water is to be had for filling the cooling vats, there may be put into these vats a little potassium bichromate at the rate of one part potassium bichromate to one thousand parts of water. This will prevent the growth of the germs in the water. This is however, a poison, so care must be used to prevent its access into the milk. The floor and walls of the milk house should be thoroughly disinfected with a five per cent. solution of sulphuric acid (oil of vitrol) which may be sprinkled around with an old broom, as, if applied with a spraying machine the acid will injure the machine. To put the remedy in a nutshell, find out, in the manner described, where the infection is coming from, and then by taking particular care prevent any of this infected material from getting into the milk or in the cans, pails and strainers, etc., or hands and clothes of all who have anything to do in the milking operations. If this is carefully attended to, there will be no trouble from ropy milk.

Do You feel Used up?

You're discouraged and played out, scarcely enough energy to think, and less to work on. The reason? You are run down, blood is thin, nerves are like India rubber, not like steel as they ought to be. Use Ferrozone and the tired feeling will go—it can't stay because rich nutritious blood and the bodily vigor Ferrozone makes, crowds out weakness of every kind. Use Ferrozone and you'll feel like a fighting king—full of energy—filled up with ambition—ever ready to work. No strengthening tonic so potent. Neglect not a day longer. All dealers sell Ferrozone in 50 ct. boxes.

POISONED WOUND COMPLETELY HEALED!

MR. WILLIAM MUMFORD of 12 Louise Street, Stratford, writes: "While walking about in a park I trod on a rusty nail, which penetrated the flesh deeply, leaving an ugly wound. I bathed the well and applied a lotion, but next morning my foot was in a shocking condition, very much inflamed and swollen, and I suffered acute pain. I had to lay off work, as I could not bear to put my foot on the ground. I feared blood-poisoning. For six days I suffered intense pain. Just at this time a friend brought me some Zam-Buk, and after using it a few days my foot was wonderfully improved. I persevered with Zam-Buk, and it soon worked a complete cure. It is a wonderful balm."

Zam-Buk heals sores, eczema, skin eruptions, ulcers, ringworm, itch, barber's rash, blood poison, bad leg, salt rheum, abrasions, abscesses, cuts, burns, scalds, and all skin injuries and diseases. Of all stores and druggists, 50c box, or from Zam-Buk Co., Toronto, for price.
