We want you to see the Steel-Ribbed Firepot in the

"Hecla" Furnace

The Firepot of a furnace being in direct contact with the fire, contains its most effective heating surface. Any increase in this surface therefore, greatly increases the

Oct. 15, 1908

efficiency of the furnace. That is why STEEL RIBBED FIREPOTS, which have three times as much radiating surface as any other style of firepot, enable the "HECLA" Furnace to save from 10% to 15% of your fuel bill.

This is only one of the many exclusive features of the "Hecla" Furnace. We want to explain them all to you-and prove, by actual tests, that the "Hecla" is the best and most economical furnace you can buy. Stop in any time for a "Hecla" talk and demonstration.
