### Deafness Cannot be Cured

by local application, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition hearing will be destroyed forever. In cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Remember our big annual exhibition will be held in Durham on Monday and Tuesday, the 28th and 29th of September. Though we may go to other places and see bigger shows and greater attractions, we should always remember that the home show is just what we make it.

Lost.—Either in Durham, or between Durham and Edge Hill, a canvas backed time book, containing tickets from "Bank St. Market" and return, also Bank of Commerce depositors' book. Finder will be rewarded by returning above to Wm. Bovingdon, Edge Hill, or the Chronicle office, Durham.

Business men should be very careful to write their ads. very plainly. They must remember that no one in a country print shop from the editor to the devil, is acquainted with all the technical terms of all the different lines of business. Sometimes we put ourselves to much inconvenience to find out an unintelligible word, but when we're rushed, and the advertiser has no phone, we have to just guess at it.

## THE MARKET SITE

During the recent discussion of the market site we had very little to say one way or the other. For years the site on the hill has been condemned by farmers and stockmen. One complaint was the necessity of having to unload and re-load hogs and such animals before taking to the station to ship them, but what was most found fault with was the climbing of the hill and the inconvenient way of getting in and out of the weigh scales. The ideal weighing place would, of course, be one from which the stock could be turned from the scale into the shipping yard, but with two railroads as far apart as ours are this would be difficult unless the roads were brought together in some way and a common stock-yard acquired. This seems at present to be somewhat impracticable without infringing on private rights for the enforcement of a right of way from one railroad to the other, and, moreover, the cost of a railway track is high even if the ground be comparatively level. In Holstein and Pricerville, there is one railway and we understand the scales are owned by private persons. The disputed site was just where it is for years and to our knowledge there never was, till lately, any serious thought of converting it into a park and keeping it up as a park should be kept. Personally, we would rather see a park than a weigh scale and stock yard, but we must be consistent.

Some two or three years ago when the jangle was going on for the selection of sites for the armory, market and town hall, we favored the Edge property as the most desirable for a town hall alone. If a hall and market were to be placed in combination, our opinion then was, and still is, that the "Violet property, near the foot of the hill, and by the way, directly in front of our residence, was the best location in sight, and for a clerk's office and weigh scale along we regarded the McKechnie property a suitable location. We thought it a suitable place then, and we see no very strong reason for changing our opinion. As far as we can remember, Mr. Calder and Mr. J. H. Brown were amongst the chief advocates for the McKechnie property for weigh scale and town hall. We did not like the location for a hall then, nor do we think yet it is as good as either of the other two places. Mr. Calder, we understand, was a party to purchasing the disputed property for a site for a weigh scale and clerk's office. To the purchase, there was no objection, but beginning the work without the vote of the people was objected to from the first by Mr. Calder, and there is good ground for believing that he was quite right in his contention.

The idea of a park was an after consideration, and now since the site was purchased for a weigh scale, and considerable expense is already incurred, with no better location in sight, it seems to us that the best thing to do is to support the By-law, erect the office and scale, and show the farming community as well as others interested, that Durham, as a town, is willing to go to considerable expense for their general convenience.
