Western Lands For Sale

Re E. 1-2 Section 19, Township 39, Range 17 W. 2nd M.

Location.—This half section is situated in the famous Quill Plains, about twenty miles north of Watton Station on the C.N.R. It is in the midst of a good settlement, chiefly of Canadians and Americans, with some Germans and Norwegians. It is about two miles from school, store, church, post office, etc. It is in a very fertile part of the West, which is claimed to be equal to the Portage Plains, one of the most fertile areas in the world. Besides immense yields of wheat, the neighboring farmers raised as high as 100 bushels of oats to the acre in some instances in 1909. The survey of the Thunderhill branch of the C.N.R. is near, and the road is already completed to within 70 miles of it. Water.—A fine spring creek runs along the East side, and cuts off the North-east corner of the half section. Water can also be easily obtained in wells almost anywhere in the neighborhood. The low land near the stream furnishes excellent hay and pasturage. Wood.—This is convenient and plentiful for fuel. A few miles distant good building timber can be got, and also timber large enough for sawing into lumber. Game.—Fish are abundant in the lakes, and game in the woods and on the lakes. Soil.—The soil is dark and deep, rich with vegetable matter, and in short, is a strong clay soil that is not too heavy to be easily worked. General.—This is a very desirable property, sloping gradually to the creek, the greater part of the farm commanding a fine view of the surrounding country. It is surrounded by prosperous and progressive farmers, one of whom has a fine steam threshing outfit, and steam plough. There is a little scrub on the farm, but nothing to hurt. Many consider a little scrub an indication of greater richness in the soil. Anything else you may require to know, I will be pleased to supply on request. If the aforesaid land is not what a buyer wants, I have several other sections at my disposal, some quite close to a railway station, and others entirely free from scrub.—W. L. DIXON, Dromore, Ontario. 62310

DANGEROUS DANDRUFF. Will Make Canada A Baldheaded Nation If Not Checked.

M. Pasteur, the great French physician of Paris, once said, "I believe we shall one day rid the world of all diseases caused by germs. Dandruff is caused by germs, a fact accepted by all physicians. Dandruff is the root of all hair evils.

If it were not for the little destructive germs working with a persistency worthy of a better cause, there would be no baldness. Parisian Sage will kill the dandruff germs and remove dandruff in two weeks or money back.

Macfarlane & Co. guarantee it. It will stop itching scalp, falling hair and make the hair grow thick and abundant. It puts life and lustre into the hair and prevents it from turning gray.

A large bottle costs only 50c at leading druggists everywhere, and in Durham by Macfarlane & Co. The girl with the auburn hair is on every package.

A WARNING.

The recent publication of the memoirs of a celebrated English university professor, Oscar Browning, recalls a famous epigram—said to be one of the most admirable ever composed. It was perpetrated by a brilliant pupil, J. K. Stephen, upon the professor, who was somewhat inclined to corpulency— O. B., oh be obedient To nature's stern decrees; For though you be but one O. B., You may be too obese! —Youth's Companion.

AN EXPLANATION.

EDITOR OF THE CHRONICLE: Dear Sir,—Many ask why the Swinton Park boys didn't go to Durham to run the races in the rink on the 18th of Aug. As the managers of the races state that it wasn't their fault we thought it wise to write a few lines to let the people know the reason.

On the 28th of June when the first races were run there, the managers asked the Swinton Park boys if they would come back to run again, and the boys agreed to do so, if they would put up money prizes. So the managers set a night for the races, but never stated what the prizes would be. One of the Swinton Park boys wrote out to put off the races for a couple of weeks as they were not through haying. This the manager did. Again one of the managers wrote W. Black one of the Swinton Park boys saying he wished the boys would stick to their promise. The boys again wrote asking for a bill and full particulars of the races, and stated if there was enough money put up for prizes they would certainly go; but we got no answer back what the prizes would be.

This is the reason why the Swinton Park boys didn't go to Durham. Don't you think we would be foolish to drive twenty miles or more to Durham and not know what we were going for?

Now any time they want races let them put up some money and state how much and let the Swinton Park boys know a couple of weeks ahead and they will be on hand and make it interesting for the other runners.

Yours truly, SWINTON PARK BOYS.

How the Corn... ONE of the most striking changes amongst the farmers in the vicinity of my old home," said the travelling agent of a large Canadian firm of agricultural implement manufacturers, upon his return from a visit to his birthplace in the State of New York, recently. "is the better and more permanent character of the buildings and various farm improvements." "I remember how, years ago, I took my father and all three of us boys one whole day to harvest a certain field. The present owner of the place says that his young son now does that work in a single day, and so far as he can see he never even has to mow his brow. Talking with some of the farmers in that section, he said that the methods of the present are compared with the past, and that a very great saving has been effected by the introduction of the use of cement. The price of this article, when I was a boy, was almost prohibitive. It had hardly ever been heard of, and at all, and when we did use it, it was more as a luxury than as a necessity. I remember how, years ago, I used to mend the dister in my mother's kitchen—rather than as an article to be used out on the farm. Now, nowadays, most of the boys have learned how to use it, and no matter where you go you are sure to see something made of it. "I was particularly struck with a fence which my brother put up on his place, some years ago. My brother and I, you must know, particularly hated looking after fences. We used to prop stones up mainly by the side of the posts, and when the stones would get removed, and down would come the fence. Father used to be a little hard on us sometimes we thought. When the other boys were off playing he used to get us at work repairing these fences. As the stones wouldn't hold the posts up, he made us dig holes deep in the ground, and drive the posts down into them. These holes fairly swarmed with snakes, and that the posts would rot. That did not matter so much then, for posts were scarce those days, for posts were scarce those days.
