They were cheerful as grigs tour, unless, indeed, matters pro- over it. gressed between Stanhope and Enid to the point of an early marriage.

He had toreseen that Stanhope would probably ask Enid to be his wife. He knew the youngster well, and liked him. For the opposition that Lady Margaret might offer he cared not a jot. He smiled inwardlyas the convenient phrase has it-when he reviewed the certain outcome of any dispute between himself and her ladyship. He would surprise her. Brand, the lighthouse-keeper, and Brand urging the claims of his adopted daughter, would be two very different grabs.'

Of course, all Penzance knew that he was a gentleman, a scientist in a small way, and a man of means; otherwise Constance and Enid would not in local society. Those unacquainted comfortable. Now I will leave you in an occasional shiver as the granite with English ways ofttimes make the mistake of rating a man's social status lock up." by the means he possesses or the manner of his life in London. No greater error could be committed. The small, exclusive county town, the community which registers the family connections of many generations, is the only reliable index. Here, to be of gentle birth and breeding-not bad credentials even in the court of King morning." Demos-confers Brahminical rank, no matter what the personal fortunes of the individual.

Brand it is true, did not belong to a thoughtfully: Cornish county family, but there were those who conned him shrewdly. They regarded him as a well-meaning crank, yet the edict went forth that his daughters were to be "received," and received they were, with pleasure and admiration by all save such startled elderly mammas as Lady Margaret Stanhope, who expected her goodlooking son to contract a marriage which would restore the failing fortunes of the house.

All unconscious of the thoughts flitting through his brain, for Brand was busy trimming a spare lamp, the two girls amused themselves by learning the semaphore alphabet from a little hand-book which he found for them. When the night fell, dark and low-

ering, the lamp was lighted. They had never before seen an eight-wicked concentric burner in use. The shore lighthouses with which they were better acquainted were illuminated by electricity or on the catoptric principle, wherein a large number of small Argand lamps, with reflectors, are grouped together.

orgy of the reef, he explained to them though they had learnt these things in school they had not realized the exactness of the statement that oil does not burn, but must first be converted into gas by the application of heat. On the Gulf Rock there were nearly 3,000 gallons of colza oil stored in the tanks beneath, colza being used in preference to paraffin because it was safer, and there was no storage tion. accommodation apart from the light-

"What a vigil!" He was making new entries in the weather report when she remarked,

"It is high-water about half past one, I think."

He nodded, pretending to treat the question as of no special import. "From all appearances there will be a heavy sea,' she went on. said coolly.

"Do the waves reach far up the lighthouse in a gale?' she persisted. Then Brand grasped the siituation "So that your slumbers may be

peaceful," he said, "I will call your kind attention to the fact that the Gulf Rock light has appeared every night during the past twenty-five years, or since a date some four years before you were born, Constance. It contains 4,000 tons of granite and is practically monolithic, as if it were carved out of a quarry. Indeed, I think its builder went one better than nature. Here are no cracks or fissures or undetected flaws. The lowest course is bolted to the rock with wrought-iron clamps. Every stone is dove-tailed to its neighbors, and To interest them, to keep their eyes clasped to them with iron, above, beand ears away from the low-water low and at the sides. If you understood conic sections I could make the capillary action of the oil. Al- clearer the scientific aspect of the structure, but you can take it from me you are far safer here than on a natural rock many times the dimensions

> "That sounds very satisfactory," murmured Enid, sleepily. "I am overwhelmed," said Constance, who grasped the essential fact that he had not answered her ques-

About "Is this sort of thing normal, or a five o'clock the wind increased to a special performance arranged for our hurricane and the sea became more benefit?" said his daughter, with a violent than I have seen it during five fine attempt at a smile. years' experience of this station. Judging solely by the clouds and the Enid. "Why does it howl so?" flight of birds, I should imagine that the cyclonic centre passed over the Scilly Isles and the Land's End." Then, next day:

"A steady northeast wind stilled the sea most effectually. Within twentyfour hours of the first signs of the hurricane the Channel was practicable for small craft. A fisherman reports that the coast is strewn with wreck-

Brand mused over the entries for a With his night glasses he peered long into the teeth of the growing storm to see if he could find the double flash of the magnificent light on the Bishop Rock, one of the Atlantic breakwaters of the Scilly Isles. It was fully thirty-five miles distant, but it flung its radiance over the waters from a height of 143 feet, and the Gulf Rock lamp stood 130 feet above high-water mark. A landsman would not have distinguished even the nearer revolutions of the St. Agnes light, especially in the prevalent gloom, and wisps of spindrift were already striking the lantern and blur-

ring the glass. Nevertheless, he caught the quick flashes reflected from clouds low, but unbroken. As yet, there was a chance of the incoming tide bringing better so bald? weather, and he bent again over the record of the equinoctial gale in 1891. pulled it all out. Soon he abandoned this hope. The growing thunder of the reef as the tide advanced gave the first unmistakable warning of what was to come. roared its loudest at half-tide. He working only half-time now."

across the Atlantic in an frregular track. Howsoever the winds may rage the tides remain steadfast, and the great waves now rushing up from the west were actually harbingers of the fierce blast which had created

Of course, the threatened turmoil in no wise disconcerted him. It might be that the rock would remain inaccessible during many days. In that event the girls would take the ed and they must learn to endure the monotony and discomforts of exis-Enid, whose turn it was to bring up tence in a storm-bound lighthouse. the pirtes of tapioca, pleaded guilty They would be nervous unquestion- splendid barns, splendid soil, good water, "I could not help remembering," nervous-but Brand was a philofelt as if something were creeping up curious blend of circumstances which quickly behind to grab me by the resulted in their presence on the rock dwelling and \$4 600 stock.

"You should go up and down three Ha! A tremor shook the great piltimes in the dark," was Brand's re- lar. He heard without the frenzied cipe. "When you quitted the door shriek of the first repulsed roller level for the third ascent you would which flung itself on the sleek and cease to worry about impossible rounded wall. Would the girls sleep through the next few hours? Possibly, if awake, they would attribute "Only eight o'clock! What a long the vibration of the column to the wind. He trusted it might be "You must go to bed early. Sleep Shut in as they were, they could not where you are; each of the bunks is them would be a confused hum, with charge of the lamp whilst I go and braced its mighty heart to resist the

Now-he looked at the clock, 50 p.m. Don't stir until I wake you in the after midnight-there was a sustained screech in the voice of the tempest "Poor old dad!" sighed Constance. which he did not remember having heard before. At last the explanation dawned on him. The hurricane was there, a few feet away, shut off from him by mere sheets of glass. The lighthouse thrust its tall shaft into this merciless tornado with grim steadfastness, and around its smooth contours poured a volume of un earthly melody which seemed to CANADIAN PACIFIC RAILWAY surge up from the broad base and "Just an ordinary bad night," he was flung on into the darkness by the outer sweep of the cornice.

The wind was travelling seventy eighty, mayhap a hundred miles ar lows, until further notice:hour. Not during all his service, not Read down in earlier travels through distant AM PM lands, had he ever witnessed a storm of such fury. He thought he heard 706 something crack overhead. He looked 7.14 aloft, but all seemed well. Not until 128 next day did he discover that the 750 4.17 wind-vane had been carried away, a 8.00 4:30 wrought-iron shank nearly two inchet R. MACFARLANE, - Town Agent. thick having snapped like a piece of worsted at the place where the tem pest had found a fault. He tried to look out into the heart

of the gale. The air was full of fly ing foam, but the sea was beaten flat If the growling monster beneath tried to fling a defiant crest at the tornado the whole mass of water, many tons in weight, was instantly torn from the surface and flung into nothingness, incharge: by the reef, hit the lighthouse with greater force than many a cannon-ball mar, Book-keeping and Writing. Some of these adventurers, forced up fired in battles which have made history. Time after time the splendid structure winced beneath the blow.

If Stephen Brand were ever fated to know fear he was face to face with the ugly phantom then. The granite column would not yield, but it was quite within the bounds of possibility that the entire lantern might be carried away, and he with it.

He thought, with a catching of his breath, of the two girls in the tiny room beneath. For one fleeting instant his mortal eyes gazed into the the lamp. Its ardor must be checked. little brass screws. They were so superbly indifferent to all this pandemonium. Just little brass screws, doing their work, and heeding naught beside. Suddenly there came to him the triumphant knowledge that the ant without as calmly and fearlessly
