been drinking, Mr. Fleming?' and the sound of wheels disturbed them." look of r. 3e and malevolence she turned on Rose decided me to take the girl back to her aunt that night. "'I humbly apologize,' I said, recovering my hat and whip, 'I came to do Not even a rat or a shrewmouse came you a service, Mrs. Wycherly, but I am afraid I have only annoyed and the coppice. frightened you.'

"'Never mind,' she said, smiling a sweet, naive smile, 'I belabored you, so we are quits, and can afford to bury the hatchet between us."

an egregious mistake?" Paul asked. "There was no mistake, Mr. Farley; the child was there up to the time she heard and recognized my mare. She also heard the ball and watched Rose come out to me and close the door. She drew conclusions and acted swiftly. She had wit enough also to perceive that I was not taken in by the ruse, and loves me accordingly."

"Do you think there was ever a period during her widowhood when she contemplated becoming Mrs.

through the dusky stillness, awakening the game in the adjoining wood.

"No, Mr. Farley, no. Besides being clever, Rowena Wytherly has a vein of poetic romance and love of mys- ing to the inflamed membranes of tery in her nature. A common-place, simple-minded country Squire would not arouse her admiration. I can imaaltogether. A young man of native immediate. Their use with per- won a world-wide reputation by with a lofty impending brow, large brown melancholy eyes, and a ner vous, sensitive mouth which, unless cessation of the pains caused by when he forcibly compresses it, was apt to be tremulous, and-by Jove! I'm painting your portrait, Mr. Farley. Do you recognize yourself?"

"Scarcely," he laughed, looking apprehensively at the Squire's strongly handsome profile. "Please don't insinuate that I am likely to ensuare the affections of the beautiful widow. I have no ambition whatsoever in that direction."

"That's just the rash kind of statement a man makes in the heyday of youth. A very young man thrown into daily intercourse with a lovely, charming, clever woman, yields very readily to a well-regulated system of fascination. Wait till you are under the spell of Mrs. Wycherly's beautiful face, arrayed in bewitching smiles

"Are you speaking from experience, Mr. Fleming?"

"No. I am only saying what anyone may see in Nature's mirror." "You are kind enough to warn me

against Mrs. Wycherly?" "Well, perhaps that's putting it a little too strong. Say, rather, against a young man's unripe experience."

"Thank you for your kind interest," Paul said, watching the skilful handling of the reins. "I wonder how it came about that you never made a practical personal acquaintance with those matters, Mr. Fleming?"

"Force of circumstances had something to do with it, Mr. Farley. A few years ago I would have given a decade out of my life to have met my affinity."

"And now?" "Well-you see, Agnes is home, and the world does not seem quite such a dreary place."

"Have you never seen a woman you could like?"

"Certainly. I like most of the women with whom I come in contact, but the one dear woman who should play such sweet havoc with my bachelor heart has never crossed my path."

"What is your ideal woman like, r. Fleming?'

"I have none. Ideals are always such disappointing things," he laughed, cracking his whip in the air, "but whenever she comes I shall know her, whoever and whatever she is I shall take her and the happiness she brings to my heart, and not question the wisdom that sent her."

"The poet says

NO ONE STRONGER THAN HIS STOMACH

The celebrated Dr. Abernethy of London was firmly of the opinion ders of the stomach were the most prolific source of human ailments in ger recent medical writer says: "every feeling, emotion and affection repor stomach (through the system of nerves) and the stomach is affected acco. It is the vital center of the body * * * * * ." He continues, "so we said to live (through) the stomach." He goes on to show that the stom the vital center of the body. For weak stomachs and the consequent indige or dyspepsia, and the multitude of various diseases which result therefron medicine can be better suited as a curative agent than

Dr. Pierce's Golden Medical Discover

"Several months ago I suffered from a severe pain rig under the breast-bone," writes Mrs. G. M. MURKEN, Corona, Calif. "Had suffered from it, off and on, for se eral years. I also suffered from heart-burn, did not kno what was the matter with me. I tried several medicine but they did me no good. Finally, I was told it was n liver. I did not dare to eat as it made me worse. When ever I swallowed anything it seemed that I would faint—it hurt so. I grew very thin and weak from not eating. Was told to take Dr. Pierce's Golden Medical Discovery. I took for bettles of it and could feel myself getting better from five bottles of it, and could feel myself getting better from the first dose. I could eat a little without pain and grew strong fast. To-day I am strong and well and can do a big day's work with ease. Can eat everything and have put on flesh wonderfully. I will say to all sufferers write to Dr. Pierce. He has my undying gratitude."

are nearest him, lie close about his feet," Paul said smiling; "she may lie within your reach, though you are unconscious of her proximity."

The Squire shook his head. "I don't think so," he said with you to try them at our risk. "'He's very quiet now,' she said, a borhood is as familiar ground as the

Which is Your Choice?

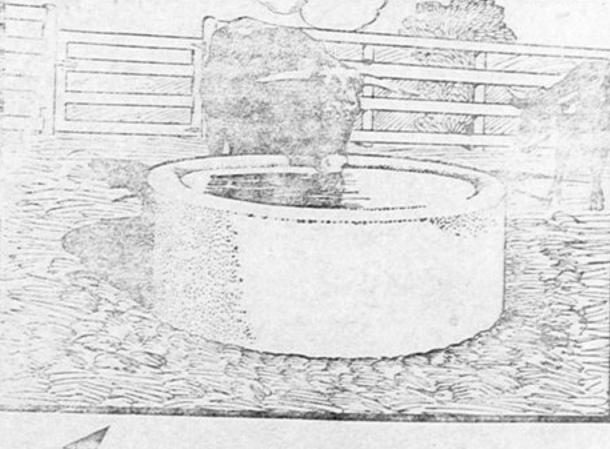

Sloppy, leaky wooden troughs, or clean, durable Concrete?

Wooden drinking troughs are about as reliable as the weather.

They are short-lived and require replacing every few years-not to mention continual patching to keep them in repair.

The best of wood cannot withstand, for long, constant dampness and soaking. Its tendency to rapid decay soon shows itself in loaks and stagnant pools of water around trough.

Contrast with this the durability, cleanliness and well-ordered appearance of Concrete.

The dampness which destroys lumber only intensifies the strength and hardness of Concrete. You can impair a wooden trough with

comparatively little use; but it takes a powerful explosive to put a Concrete water tank out of business.

Which

is your choice-expense-producing Wood, or money-saving Concrete?

We'd be glad to send a copy of our book, "What the Farmer Can De With Concrete,"-Free-if you'll ask for it. It tells the many uses of Concrete in plain, simple language—tells how to make
