Kill Flies and Save Lives

From Putrid Matter Flies Carry Disease Germs to the Baby, as Pictured Here. (From the "Fly Pest" Moving Picture Film.)

This striking picture was sent out by the fly fighting committee of the American Civic association, an organization of public spirited men who have devoted a vast amount of time and money to the work of improving the public health by destroying the disease bearing housefly.

They are doing their part. Do yours by cleaning up your premises, by destroying the breeding places of flies and by killing every fly you see.

Please Kill That Fly! HOUSEHOLDERS PLEASE READ BECAUSE

1. The fly is the most dangerous wild animal in America.

8. Flies breed in manure and other filth. Filth is the flies' food. Flies carry filth to our food.

3. Flies walk and feed on excreta and sputa from people ill with typhoid fever, tuberculosis, diarrhoeal affections and many other diseases.

4. One fly can carry and may deposit on our food 8,000,000 germs.

5. One fly in one summer may produce normally 195,312,500,000,000,000 descendants. Therefore kill the flies before they begin to breed.

6. A fly is an enemy to health, the health of our children, the health of our community!

A fly cannot develop from the egg in less than eight days. Therefore if we clean up everything thoroughly every week and keep all manure screened there need be no flies. Will you help in the campaign against this pest?

RULES FOR DEALING WITH THE FLY NUISANCE

Keep the flies away from the sick, especially those ill with contagious diseases. Kill every fly that strays into the sickroom. His body is covered with disease germs.

Do not allow decaying material of any sort to accumulate on or near your premises.

Screen all food and insist that your grocer, butcher. baker and every one from whom you buy foodstuffs does the same.

Don't buy foodstuffs where flies are tolerated

Don't eat where flies have access to food.

Keep all receptacles for garbage carefully covered and the cans cleaned or sprinkled with oil or lime

Keep all stable manure in vault or pit, screened or sprinkled with lime, oil or other chear preparations. as 98 per cent of the flies come from table manure and 2 per cent from garbage and other Little

Keep the streets and alleys clean.

See that your sewage system is in good order: that it does not leak, is up to date and not exposed to files

Pour kerosene into the drains.

Burn pyrethrum powder in the house to kill the files or use a mixture of formaldehyde and water, one spoonful to a quarter pint of water. This exposed in the room will kill all the flies.

Burn or bury all table refuse.

Screen all windows and doors, especially in the kitchen and dining room.

If you see flies you may be sure that their breeding place is in nearby filth. It may be behind the door, under the table or in the cuspidore.

Remove all refuse and filth from house, yard and outhouses and thus prevent flies from breeding on your premises.

If there is no dirt and filth there will be no flies.

IF THERE IS A NUISANCE IN THE NEIGH-BORHOOD WRITE AT ONCE TO THE BOARD OF HEALTH.

"Health is wealth," and "an ounce of prevention is worth a pound of cure."

There is more health in a house well screened then in many a doctor's visit.

The only safe way is to keep out the fies.

HAMPDEN.

The annual Sunday school picnic Rain is badly needed, as the exwas held on June 29th, and was as cessive amount of rain in May and great a success as ever. The at- the early part of June, followed tendance was very large, people by the very hot, dry weather latethe racing, which created a great results will follow if rain doesn't deal of laughter. Real Congratulations.

"Many congratulations Herr Zwenger! I hear your wife presented twins to you yesterday." "Oh, no; it wasn't I. It was the

other Zwenger." "Then I congratulate you very heartily."

Tactless.

"That man is the most tactless person I ever saw," said Maude. "What did he do?" inquired Mamie. "Met a lady in Reno and tried to be agreeable by telling her he hoped her husband was well."

The Governors and Premiers of Canada Since Confederation

There are lots of boys, and lots of men, too, who cannot name in order the Governors-General of Canada since Confederation. It isn't right that it should be so. We should take pride enough in our own land to know a little bit of its history, and something about the men who took a part in the making of that history. Last Saturday's Globe contains important information that every boy and girl should know. Would it be a surprise to find a teacher in South Grey unable to name the Governors-General since Confederation, or the Premiers of the Domion of Canada during the same period. Here they are:

Viscount Monck, Lord Lisgar, Earl of Dufferin, Marquis of Lorne, Marquis of Lansdowne, Lord Stanlcy, Earl of Aberdeen, Earl of Minto Earl Grey, and Duke of Connaught.

The following are the Premiers who held office since Confedera-

Sir John A. Macdonald, Conservative, 1867 to 1873.
