### ITEMS OF INTEREST

In a single week, 35,000 Chinese cut off their pigtails in Hong Kong.

Accumulated in the mines of the world there is enough coal to create 15,000,000,000 horsepower for 12,000 years.

While a man's heart is beating 70 times a horse's is pulsating but 40 times, and an elephant's only 30.

A French chemist has invented a process for bleaching almost any color from silk, and dyeing it a more durable hue without injuring the fabric.

Because frosts do the most damage when the air is calm, a Paris scientist has advanced the theory that orchards and vineyards can be protected by electric fans to keep the atmosphere moving.

The capitalists of France have plenty of confidence in the state railways of that prosperous country. A loan of \$12,000,000 recently asked for these railways, was oversubscribed 32 times in four hours.

The use of motor wagons to carry parcels between London and Birmingham, England, has proved so successful that the postal authorities are about to make an extension of the service to Manchester.

Every German city of consequence has a number of palatial cafes, which are nothing else than huge club houses without membership formality. In any one of these cafes are hundreds of patrons glancing over domestic and foreign newspapers and magazines.

### DENIES GUESSES ON THE NAVAL POLICY.

The reports in circulation in London that Canada is prepared to recommend the expenditure of six million pounds in the construction of three Dreadnoughts, are unfounded. Interviewed Friday by the Canadian Associated Press, the Premier said: "You've my authority in stating that the reports are absolutely incorrect." Messrs. Borden, Premier; Hazen and Doherty, left last night for Paris, to join Hon. Mr. Pelletier.

### How Hail is Formed.

Limiting the observations to such compound hailstones as are the most destructive and are produced during a tornado or a violent thunderstorm, the following theory has been advanced as to how they are formed: When the winds gyrate rapidly round an axis more or less inclined to the earth the space at and about the axis is rarefied. When air charged with vapor is drawn into this rarefied space it may be condensed into cloud or rain or, at a greater elevation, into snow. Now, supposing the rain formed in the lower region to be drawn up by the ascending current into the snowy region and so held for a short space, the drops will be frozen and then, if propelled beyond the gyrations, will fall to the ground as a shower of ordinary hail. But if in the descent they are again drawn in by the inflowing current they will be again carried up into the cold region and so acquire another coating of ice. In this way the globe may make a number of ascents and descents and acquire a fresh coating each time.—Harper's.

### Munchausen.

Many a reader of the fictitious adventures of the famous hero of the "Munchausenaid" (which was first published in English at Oxford during the lifetime of this prince of all liars) has no conception that the hero was a real person. Baron Hieronymus Karl Friedrich von Munchausen was a Hanoverian nobleman, a subject of the first three Georges. He was born in 1720 and died in 1797. He took service in a Russian cavalry regiment, but retired in old age to his ancestral estate at Bodenwerder, in Hanover, where he became notorious for the magnificent lies about his military adventures with which he used to entertain his neighbors at his hospitable board. A collection of these stories, entitled "Vademecum fur lustige Leute," was published at Berlin in 1781 without the baron's permission. The English work, "Baron Munchausen's Narrative of His Marvellous Travels and Campaigns in Russia," was an expansion and improvement of the Berlin collection.

### Tact and Success.

Tact is a combination of good temper, ready wit, quickness of perception and ability to take in the exigency of the occasion instantly. It is never offensive, but is a balm allaying suspicion and soothing. It is appreciated. It is plausible without being dishonest, apparently consults the welfare of the second party and does not manifest any selfishness. It is never antagonistic, never opposes, never strokes the hair the wrong way and never irritates. Tact, like a fine manner, eases the way, takes the jar out of the jolts, oils the bearings, opens doors barred to others, sits in the drawing room when others must wait in the reception hall, gets into private offices when others are turned down. It admits you into exclusive circles, where wealth abounds, even though poor. It secures the position when merit is turned away. Tact is a great manager. It easily controls people, even when combined with small ability, when genius cannot get along.—Leslie's Weekly.

### FIFTY THOUSAND MEN REQUIRED.

The wheat crop of 1912 will be the greatest ever harvested in Manitoba, Saskatchewan and Alberta, thus requiring the farm laborers of the East to recruit and assist in harvesting the World's greatest bread basket. The Governments of the respective Provinces state that fifty thousand men will be required for this year's harvest. These will have to be principally recruited from Ontario, and the prosperity of Canada depends upon securing labor promptly. The Canadian Pacific, on which Company will fall practically the entire task of transporting the men to the West, is already making special arrangements for this year. Excursions from points in Ontario to Manitoba, Saskatchewan and Alberta, will be run, and special trains operated, making the trip in about thirty-six hours, and avoiding any change of cars or transfers. This will be a day shorter than any other route. Dates, rates and conditions will be announced in a few days. Consult any C. P. R. Agent for full particulars.
