## EGREMONT FALL FAIR

Holstein Fair was held on Tuesday and Wednesday of this week, and much interest is taken in it, as usual. The weather on both days was excellent, and the attendance good. Owing to the wet season the exhibits in grain were below the average, both in quality and quantity. Root exhibits were good, and quite numerous. The fruit show was comparatively small, but there were some good samples. The dairy products were well represented, and the butter was excellent. The ladies' work department was well displayed, apparently well filled, and pronounced good. The following is the list of prize-winners on Tuesday:

## HAPPY THOUGHT

**There is One Most Important Thing About a Stove**

And that is this,—What heat value will it develop from the fuel you put into it?

Mind you, heat in the firebox does not count for anything. The heat must be in the oven or at the holes—where you need it for cooking.

So, when we say that from every ounce of fuel you put into a HAPPY THOUGHT you get the full return in heat value, we mean that you get something more than you get from other stoves.

A small fire in a HAPPY THOUGHT is equivalent to a big fire in a less efficient stove. It does more work. It saves you the difference in fuel.

That is the kind of saving that it pays you to invest in. A good stove is not a cheap article. It should be carefully selected. It should be chosen chiefly on this one point of greatest importance.

That is why a Quarter Million Canadian women use the HAPPY THOUGHT every day.
