Concrete is the best building material

BROAD statement_Yet literally true. The aim of man from the beginning has been to make his building materials as nearly like natural stone as possible. The great labor required to quarry stone led him to seek various manufactured substitutes. The only reason he ever used wood was that it was easiest to get and most convenient to use. Wood is no longer easy to get. Like most building material, its cost is in-

The cost of concrete is decreasing. So, from the standpoint of either service or economy, Concrete is the best building material.

Canada's farmers are using more concrete, in proportion to their numbers, than the farmers of any other country. Why? Because they are being supplied with

Canada Cement -

Without this label it is not "Canada" Cement.

a cement of the highest possible quality, which insures the success of their concrete work. The secret of concrete's popularity in Canada lies in the fact that while we have been advertising the use of concrete, we have also been producing, by scientific methods, a cement so uniformly high in quality that the concrete made with it gives the complete satisfaction our advertisements promised.

Concrete would not have been in such universal use today, had an inferior grade of cement been supplied. Insist upon getting Canada Cement. It is your best assurance of thoroughly satisfactory results from your concrete work. There is a Canada Cement dealer in your neighborhood.

Write for our Free 160-page book "What The Farmer Can Do With Concrete" -No farmer can afford to be without a copy.

Montreal Canada Cement Company Limited
