WILL HAVE TO COME IN.

Purchasers of new suits after the present season are warned by the National Association of Clothiers of New York, in a circular just sent out, that if the garment fades they must learn to accept the situation as one over which no mill, manufacturer or retailer can exercise control.

"The complete cessation of imports of coal tar dyes," the letter, which is sent to all retail clothing merchants in the United States, continues, "the rapid exhaustion of domestic supplies, and the inadequacy of American production have caused most woollen and worsted mills to refuse color guarantees of their fabrics for the fall and winter season. Surely, the American public can be trusted to meet this condition cheerfully, if everybody is frank about it."

Alas for the intellect when the the size of the feet.

E Bellamy and Pte. R. paid Markdale Masonic lodge an to produce large yields of uniform potatoes free from disease and of high table quality. Varieties of potatoes differ greatly, not only in yield per acre but also in freedom from rot and in cooking qualities. For instance, in the trying season of 1915, the varieties of conditions at the Ontario Agricultural College varied in yield per acre from 13 to 366 bushels, in to over 70 per cent., and in table To clean white enameled wood- quality from 36 to 83 out of a maximum of 100 points. Some kinds are found to be very sus-Old nightdresses make excel- ceptible to rot and others to be almost immune. The table quality of potatoes varies far more than many people realize when mealiness, flavor and appearance of different varieties are taken into consideration and are carefully

In each of four years an experi-For instance, 18 lots of Empire State potatoes were secured from eight different sources-five in the province of New Brunswick and three in Ontario. Seed potatoes grown about 140 miles north of Guelph, in the Muskoka district, near the Muskoka lakes, have given a higher yield per acre than those obtained from any other source in each of the four years of this experiment. Seed potatoes, grown in a cool, moist climate which prevents maturity, are often superior to those which have ripened in a hot, dry climate Immature seed potatoes are usually inferior for table use but furnish excellent seed. Potatoes grown in Ontario in a comparatively cold, wet season, like that of 1915, are likely to be of good quality for planting, providing they are free from disease. Tubers showing discoloration or signs of rot on the outer surface, or when cut, should not be used for plant-

There are far too many varieties grown on the farms of Ontario. This is one of the greatest weaknesses of the potato industry of the province. It is a defect understanding is limited only by that should be remedied as soon as possible. If Ontario would confine herself to a few of the best varieties of potatoes the annual crop would be increased in yield, in quality, and in commercial

There are over 1,000 named vargantly advertised; some are old amidst ideal -surroundings, while per cent. of the kinds now under travelling on the Canadian Pacific. cultivation, better results would be obtained, whether the potatoes were produced for home use or for commercial purposes.

Some of the varieties of potatoes which have been prominent in the experiments at the Ontario Agricultural College and in the co-operative experiments throughout Ontario are the Empire State, the Davies' Warrior, the Rural New Yorker No. 2, the Green Mountain and the Carman No. 1 of the late and the Extra Early Eureka, the Early Ohio, and the Strav Beauty or Bliss Triumph of the early varieties. In appearance there is a similarity between the Green Mountain and the Delaware varieties and also (between the Extra Early Eureka and Irish Cobbler varieties. In experiments at Guelph, however the Green Mountain and the Extra Early Eureka gave the best results in yield per acre, in table quality, and in freedom from rot. The three varieties of potatoes which have made particularly good records in the co-operative experiments throughout Ontario in productivene,ss, table quality and popularity with the experimenters are the Davies' Warrior and the Empire State of the late, and the Extra Early Eureka of the early varieties.

In the average results of all the varieties grown in the years 1905, 1906, 1910 and 1915, in which there were more or less rot in the potato crops at the college, the Davies' Warrior, the Extra Early Eureka and the Stray Beauty produced the smallest, and the Early Rose, the Beauty of Hebron and the Early Ohio the largest percentages of rotten potatoes of all the varieties grown under uniform

conditions. It has been found to

INTERNATIONAL STOCK FOOD TONIC

is a mixture of ten medicinal roots, herbs, barks and seeds, forming an excellent tonic and blood purifier. It stimulates digestion and enables the hogs to be forced for rapid growth and fattening without fear of indigestion scours or disease. It costs only three feeds for one cent-less than a cent a day per hog.

It is not what a hog eats but what is digested and assimilated that gives strength, rapid growth or quick fattening. International Stock Food Tonic gives good appetite, pure blood, perfect digestion and assimilation, good health and quick growth. It has always had the largest sale in the world for preventing disease in hogs and for helping to make pigs, shoats or hogs grow amazingly. It is not to take the place of grain but is mixed with grain for better health and larger profit, by improving the digestion and assimilation of all animals.

The mere fact that International Stock Food Tonic has successfully stood the practical everyday test of farmers and stockmen all over the world for a quarter of a century is absolute indisputable proof to any fair-minded intelligent man that it must possess very superior merits. The increasing sale for over twenty-six years can be explained by no other basis. The largest seller in the world can be built up only on merit. The sale of International Stock Food Tonic has constantly increased during the last twenty-six years until it is sold and used all over the world. It is now used and endorsed by over three million practical farmers. It is without a doubt, the most popular, most reliable and most successful tonic preparation in the world. For sale by dealers everywhere in 50c. and \$1.00 packages and 25 pound pails. FREE-Write for our new book "International Veterinary Digest" giving
