WAR LOAN DOMINION OF CANADA

As with the previous Loan, we predict a great success for this issue. During this period of stress our Government needs our help and counts upon our patriotism. But a chance is given investors of placing their money in securities of the highest grade, upon terms the liberality of which will, perhaps, not be fully realized until the return of normal times.

If this Loan were issued to yield 4%, instead of about 5.35%, the price would be 105.41 instead of 97.50. A 4% yield, (the basis on which Dominion Government bonds sold so recently as 1914) would mean a price of 111 for the present issue.

We will forward your application, procure your allotment and render other services free of charge to you.

Defies the Frost King

King Winter is armed with countless millions of ice-hard snow-crystals, driven by the full force of winter winds; his destructive work is aided by rapid changes in temperature, which freeze tiny particles of water in the pores of unprotected woodwork, tearing the wood fibres apart as freezing water splits a wrought-iron pipe. In the course of a long Canadian winter he can cause irreparable damage to an unprotected silo, barn or home. He attacks in vain, however, the building protected with

B-H "ENGLISH" PAINT

The pure white lead (70%) and pure white zinc (30%) which it contains, serve as a thin but effective metallic armor-plate, defying all the forces of natural decay for many years.

The superiority of B-H "English" Paint is due both to the purity of its ingredients and to our special methods of manufacture. These produce a paint, which on account of its smoothness and marvellous fineness, spreads easily and penetrates far into the fibres of the wood.
