A WOMAN'S QUEER JOB

The "Woman With the Mangle" Dries Clothes For Unlucky Youngsters

There were so many cases of unexpected duckings among the boys and girls who go pleasureing at Brockwell Park Lake, London, that an official was named by the London county council just to dry their clothes. She is known as the "woman

with the mangle!" Here is a picture showing her at work, drying the clothes of a boy who took a header when he didn't mean to do it. The woman with the mangle has been renamed "the lady of the lake" by the boys and girls who have come to look upon her as a sort of second mother. The mangle is to be seen at use at all hours from sunrise to sunset.

Ontario's Patricia

The district of Patricia lies in the extreme northwestern portion of the Province of Ontario and constitutes that vast new country handed over to it by the Dominion. Up to the last few years it was an unorganized and practically unknown portion of Canada directly under the control of the central Government at Ottawa. It has an area of 150,000 square miles, more than three times the size of New York State.

A Profitable Industry

In Whittier, California, is a famous walnut tree which has been leased for a term of years at \$500. Orchards seven and eight years' old bring all the way from \$1,000 to \$2,000 per acre and are a fine investment, yielding from 15 to 125 per cent. according to age. The total cost of producing and harvesting an English walnut crop is about one and a half cents per pound. English walnuts are used for making pickles, catsup, oil and other culinary products.

Premier Has no Seat

So far as Parliamentary law goes not even the "Prime Minister has an actual right to any definite place in the House. Indeed, it is on record that in the first reformed House of Commons Cobbett took possession of the accustomed seat of the leader of the Tory party, Sir Robert Peel, and that nothing could be done to evict the intruder.

Hatboxes on Autos

A new hatbox for men is narrow enough to be strapped on the running board of the automobile. In it there is room for six hats, including the top and crush hats. Flat hat brushes slip into straps in the cover

Overleeping Extraordinary

A young Lancashire overlooker in a factory went to live with a workmate. On going to bed the young man noticed the absence of blinds on the windows. "Hast no blinds for th' windows, Bill?"

Bill: "No, I never trouble about blinds; but if th'art so particular about it I'll blacklead th' windows for thee." So they blacklead the windows.

During the night the young man awoke, and finding the room in darkness he went to sleep again. This continued in turns until the elderly man said: "I say, Jack, I'm sure we're going to be late for work."

To their amazement they found it was 7.30 a.m. "Now we've done it; we're late."

The first person they met was the manager. "Halloo, where have you two been?" The elder man said: "Well, I have worked for th' last twenty year, an' surely you're not going to make a row for being an hour an' a half late this morning?" "I'm saying nowt about this morning," said the manager, "but where were you yesterday an' th' day afore?"

1. Don't beat your hogs, bruises mean immense losses to farmers, drovers and packers.

2. Farmers should bed wagons well and not overload when bringing hogs to town.

3. Don't stuff or overfeed your hogs when shipping. It is a dangerous practice and often results in suffocation, especially in warm weather.

4. Bed cars during warm weather with sand; straw and sawdust will heat.

5. Partition off all weak, crippled and vicious animals.

6. Do no market thin unfinished hogs. A thin growing pig will produce dollars to the farmer, and is worth little to the packer. Most desirable weights, 175 to 220 pounds.

Why "Anuric" is an INSURANCE Against Sudden Death.

Before an Insurance Company will take a risk on your life the examining physician will test the urine and report whether you are a good risk. When your kidneys get sluggish and clog, you suffer from backache, sick-headache, dizzy spells, or the twinges and pains of lumbago, rheumatism and gout. The urine is often cloudy, full of sediment; channels often get sore and sleep is disturbed two or three times a night. This is the time you should consult some physician of wide experience—such as Dr. Pierce of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y. Send him 10 cents for sample package of his new discovery, "Anuric." Write him your symptoms, and send a sample of urine for test. Experience has taught Dr. Pierce that "Anuric" is the most powerful agent in dissolving uric acid, as hot water melts sugar; besides being absolutely harmless it is endowed with other properties, for it preserves the kidneys in a healthy condition by thoroughly cleansing them. Being so many times more active than lithia, it clears the heart valves of any sandy substances which may clog them and checks the degeneration of the blood-vessels, as well as regulating blood pressure. "Anuric" is a regular insurance and life-saver for all big meat eaters and those who deposit lime-salts in their joints. Ask the druggist for "Anuric" put up by Dr. Pierce, in 50-cent packages.

STRENGTH AND BEAUTY

Come with Dr. Pierce's Golden Medical Discovery. This is a blood purifier and alterative that starts the liver and stomach into vigorous action. It thus assists the body to manufacture rich red blood which feeds the heart, nerves, brain and organs of the body. The organs work smoothly like machinery running in oil. You feel clean, strong and strenuous instead of tired, weak and faint.

Easily rocked are the three-bar grates which smash up clinkers easily and last longer because each grate is three-sided.

McClary's Pandora Range

The man who designed the Pandora knew his job. I know that and that is why it carries my guarantee as well as the makers'.

EXAGGERATED EGO

Nothing Like Having a Good Admixture of Self-Conceit

John Jay McDevitt of Wilksbarre, Pa., who at one time became a millionaire-for-a-day and went broke after spending \$2,500 trying to brighten Broadway, New York, is a man who is quite conscious of his own importance. His deeds of greatness are not known to the general public, but McDevitt believes they are sufficient to merit lasting recognition. To make sure that his fame would go down to posterity John Jay had made at his

John J. McDevitt

The McDevitt Statue, and (Inset) a picture of John Jay himself.

own expense a life-sized statue of himself which he presented to Congress at Washington. Not content with paying \$700 for the statue, he journeyed to Washington in a private train and hired a brass band to meet him at the station and accompany him to his hotel, while a committee of his friends attended to the presentation.

THE FOX AND THE FLEAS

How Sly Reynard Got Rid of His Unwelcome Guests

Once there was a fox—a sly, sly fox, with a glossy brown coat and eyes that shone like little brown beads as he sat dozing in the sun before his den among the rocks.

Willie Flea had found much comfort in Mr. Fox's sleek coat. One day Mr. Fox, finding that Willie's cousins and sisters and uncles and aunts were all taking advantage of his fine fur, decided he would once and for all get rid of the colony. So he went into his den and thought long and hard of the matter. Finally, with a sly wink he started towards the river nearby. On the way, Mr. Fox paused under a

chestnut tree and selected a twig of the chestnut tree wood. This he held tightly in his teeth and started for the river which ran deep and clear at the foot of the hill.

Willie Flea grew unhappy and frightened as Mr. Fox started to wade into the water. Step by step Mr. Fox descended the bank until his face only protruded. Then Willie Flea, seeing he must surely drown, called all his relatives, and they scooted out on the stick of wood which Mr. Fox held above the surface. It was just what Mr. Fox wanted! When Willie Flea reached the furthest point of the stick, Mr. Fox suddenly let it go, and the whole flea family including Willie tumbled into the water and drowned!

Then Mr. Fox waded back to shore and sat laughing at his own cleverness, and ever afterwards that's the way all the toxes got rid of their Willie Fleas.

A REAL BURGLAR ALARM

"Burglar! Somebody's breaking in through the back door!"

That's the alarm which will ring out to your ears if you equip your door with this automatic bell and if a burglar ever does attempt to break into your house thereafter. Or, if you don't think your house needs a burglar alarm, there are several other uses for the device here described. You can put it on your office door or on the kitchen door so mother can leave it unlocked and yet be warned when the delivery boys come in.

It will cost you only about 70 cents for a bell and a dry battery. You'll

The above diagram shows how simply the open-door alarm is constructed. In fastening the strips of tin, the use of screws would be preferable to nails.

need also two strips of tin, inch wide by 5 long, which you can probably get for nothing at the tinner's or the hardware store, and a little bit of copper wire.

The two pieces of tin (A and C) are fastened by nails or screws to the door frame, and under each is secured the bare end of a bell wire, which connects, as shown, to a bell and battery. Brass may be used in place of tin if desired.

By shaping the strips as indicated, the top of the door strikes the lower tin, closing the circuit for only a moment. As the door opens farther, the strips spring apart, breaking the circuit automatically.
