

CANADA MUST ECONOMIZE

Depression Will Come With Peace—Economy Imperative
Economy is not being practised extensively in Canada. We are sharing the prosperity which war has brought to the American continent.

SCREENING GRAIN

It is certainly not economy to ship dirty grain as the farmer hauls from the threshing machine to his car at expense of his man loading and unloading and his team drawing; pays freight on same to the terminal elevator, and then gives it away.

Old Customs Explained

There is no good reason nowadays why the bow or other ornament on a man's hat should be confined, as it usually is, to the left side; but in the days when every man had to be prepared to battle for his life there was a very good reason for this custom.

When Motor Misses

If motor persists in missing when only a light load is being carried, before resorting to adjustments of the carburetor try making spark gap a little wider, presuming, of course, that the magnet is being used.

Why Fowls Need So Much Air

Fowls are obliged to throw off much of the waste of the body through the lungs, they do not sweat in the sense that do other animals, but instead breathe several times faster than sweating animals when heated.

There is almost as much difference between different families or strains of each breed, as between the different breeds of fowls. Therefore, receive with some allowance the praise or condemnation of any breed.

To decrease the number of accidents a French city is building a street with a separate roadway for each kind of traffic, motor, horse and foot.

Solidified alcohol in the cube form is coming into use in Germany for cooking and other purposes for which small amounts of heat are sufficient.

A cooking utensil on the double boiler principle has been patented in which the inner and outer sections are permanently attached together.

An Englishman has invented combs to be sewed to women's hats to hold them in place without the use of pins.

BUYS HUMAN BRAINS

Scientist Wants to Know Why Clever Men Are So

Why is a man different from his fellows? Science would like to know, and Science purposes to find out. So from France, the home of great scientists, Dr. August de Castellane Seymour crossed the Atlantic to get options on the brains of great and near-great men.

"I'm buying up brains," acknowledged Dr. Seymour. "Science must have material with which to work out the great problem of brain force. I pay well for brains of extraordinary people."

"When I hear of a man who is doing remarkable things—building railroads or pitching baseball—I go to him. I say: 'When you die, give science your brain. Will your brain now to science, and I'll pay for it.'"

"In time his brain will reach the University of Poitiers, the scientists will assay it, with scalpel and scales

DR. AUGUST DE CASTELLANE SEYMORE

they'll test the 'gray matter,' and by such tests they hope to be able to prove why one man is a genius and another man is a ninny."

Dr. Seymour closed contracts for the brain of an extraordinary man in New York. He has three arms, and science is curious to know if he has a triple brain. He picked up a rare bargain in Memphis, where a railroad man's brains were bought for \$1,000, half down, half on delivery.

HYMENEAL

CRIPPE—TORY. A quiet but pretty wedding took place on October 25 at four o'clock at the home of Mr. and Mrs. Wm. Torry, when their youngest daughter, Lillian Jane, was united in marriage to Mr. Robert Crippe, son of Mr. and Mrs. Crippe of Owen Sound. None but the immediate friends of the contracting parties were present. The ceremony was performed by the Rev. Mr. Wnaley of Durham. The bride was given away by her father, and was becomingly dressed in a gown of white silk, trimmed with pink rosebuds. She carried a snowier bouquet of bridal roses and maidennair fern. After congratulations and best wishes, all sat down to a dainty supper. The young couple will take up residence in Hanover.

EDGE HILL. Born.—On Wednesday, October 25, to Mr. and Mrs. Thos. Morrison, a son. Miss Nellie Collier returned to Toronto on Wednesday, after a

pleasant holiday at the parental home.

Mr. and Mrs. W. H. Moffat and Mr. John Moffat of Narva, Bruce county, spent a couple of days with friends here. Miss Kate McFayden is visiting friends in Toronto. The telephone was installed in the homes of Messrs. Thos. Ritchie and Arthur Edge, on Thursday. Our Sunday school has closed for the season. The average attendance this year has been 23. One of the most successful Red Cross sewing bees yet held in this vicinity was that of Mrs. Adam Anderson on Thursday. Several of Mrs. Anderson's neighbors from the 4th concession were present, and altogether, 29 ladies were at work. A dozen shirts were made and three pairs of socks knit. The collection amounted to \$4.40.
