## JASPER PARK LODGE IS A REAL HOME AMONG THE MOUNTAINS

Jasper Park, embracing 4,400 square miles of the most magnificent virgin mountain scenery in the world, has long been known to the sportsman, alpinist and tourist, but this summer it calls to holiday seekers with a new voice. It now offers ideal accommodation in Jasper Lodge, the first of a series of Alpine chalets to be built in the Jasper and Mount Robson districts, and was formally opened to the public on June 15th.

The lodge is beautifully situated among the singing pines and cedars on the shore of Lac Beauvert, while towering in solemn grandeur on all sides rise the rugged snowy domes, sometimes gleaming like opals in the shimmering sunlight and sometimes lost amid the low-hanging clouds. It consists of a group of log rustic buildings blending with the rugged surroundings. A spacious lounge building with an ample stone fireplace, an airy dining-room, a dance pavilion and a number of separate sleeping cabins, each containing four

bedrooms and a sitting-room, are electric-lighted and fittingly furnished throughout.

Here in the Northern Canadian Rockies the tourist will find all that makes a worth-while holiday. The joy of adventure in exploring and mountain-climbing, boating on Lac Beauvert, fishing in the wild mountain torrents, riding through the valleys with the fresh mountain breezes in your face, dancing with the guardian purple mountains keeping watch—all offer a most interesting variety of recreation. The best of accommodation has associated with it congenial companionship and scenery rivalling even that of the Swiss Alps.

These lodges not only tend to make Jasper Park one of the great travel centres of the Dominion thereby increasing the revenues of our Canadian National Railways, but also add their share toward ultimately placing Canada on the map as one of the outstanding meccas of the world traveller.

### SERIOUS ACCIDENT AT ELORA

(Elora Express.)  
A rather serious accident happened on the farm of W. J. Scott of the 15th Concession of Peel, the first of last week. Mrs. Scott's mother, Mrs. H. Small of Arthur, together with a little boy, a visitor from Toronto, were guests of Mr. and Mrs. Scott. The little fellow was greatly interested in the working of a manure spreader, an implement he had never seen before. Though warned not to get too near the machine, the boy, while stooping to fix his shoe lace, came in contact with the hind wheel of the spreader, which knocked him down, and evidently caught him, as the bone at the thigh-joint was broken. He was taken to Guelph Hospital, where an X-ray examination was made, and the bone set. He is making as good progress as can be expected.

Quite Right.

His Wife.—The doctor says I must have a change of climate.  
Mr. Nicklepinch.—Well, where can you find a more changeable climate than this?

### LOOKS DON'T COUNT

The hen loafing on the job has a yellow beak and yellow legs. The busy hen uses color in touching up the yolks of eggs and her legs and beak become pale. The birds with pale legs and beaks may not look so well or so healthy as the others, but they are the ones it pays to keep. In fact, the hen that is most beautiful in summer and fall should always be under suspicion. Further, the loafer has a scaly and shrunken comb, while the busy hen will have a plump comb of a bright red color.
