**ABOUT ENSILAGE CORN**

**Choose Best Varieties For Live Stock Fodder.**

**Should Ripen at Least a Few Ears—The Grain Is Nourishing—Frozen Corn Preferred to Immature—Harvesting Root Crops.**

(Contributed by Ontario Department of Agriculture, Toronto.)

The highest grade of corn silage is made from those varieties of corn that produce a large proportion of grain in the total weight of crop. Large growing southern varieties of dent corn that give an immense green weight of fodder per acre will as a rule produce a very poor silage under Ontario conditions. Many dairymen prefer flint varieties and the smaller stalk varieties of early maturing dents for silage purposes. From such a rich sweet silage can be made. The weight per acre may not be nearly as great as with the late maturing large growing dents, but when the silages are compared on the digestible dry matter basis the smaller growing earlier maturing dents and flints have the advantage. Use Corn Ripening Some Ears.

The experience of the past has shown that only such varieties as will ripen at least a few ears should be used. In early years of silo experience in Ontario the practice was to grow big corn. Little attention was paid to the grain yield; much poor silage resulted from the twelve to fourteen-foot stalks that went into the silo without the very necessary two pound well glazed ear. Hard experience has demonstrated that there is more milk, beef or butterfat in a cubic foot of silage made from corn that would hush out one hundred bushels per acre, than from a corn crop that consists of big juicy stalks only.

**The Best Varieties.**

Golden Glow, Essex Dent, Wisconsin 7, Baily, North Western Dent, Compton's Early, Longfellow, Salsar's North Dakota and King Philip are varieties well suited to Ontario conditions. These varieties will ripen in the southwestern counties of Ontario, and they will generally reach the roasting ear stage over the greater part of the dairy section of the Province. The greatest quantity of digestible dry matter is to be obtained from a corn crop when it has reached the condition to cut for husking, ripe enough to complete maturity in the shock. Another advantage in growing the earlier maturing varieties is that such can be ensiled early in September and the land prepared for autumn wheat, an important factor now that the European Corn Borer has become a menace to corn growing.

**Frozen Corn Preferred to Immature.**

The freezing of corn after it has reached the denting or early glaze stage does not materially injure it so far as silage making goes. It is always advisable to run the risk of frost, rather than ensile the corn in an immature state.—L. Stevenson, Sec. Dept. of Agriculture, Toronto.

**Harvesting Root Crops.**

Roots crop should be taken up before the weather becomes too wet and disagreeable in the fall if in any quantity. It is slow work at any time, and becomes much more so under cold damp conditions. Lift the roots with a digging fork and twist off the tops, putting them in piles and covering with the tops. If a large area is to be lifted, and one is expert with a sharp hoe, he can very quickly remove the tops, but they will not keep quite as well. The roots should be ploughed out, throwing them as much as possible on the top. Bins with slatted sides and bottom should be used for storage where possible, as this gives the roots a chance to sweat. If the storage room temperature is above 40 deg. F., cover them with sand. Carrots should not be deeper than two feet in a bin, others may be four feet. Where cellar storage is not available use pits. These should be three feet wide, two or three feet high and of any length. Run the pits north and south where possible and have them on well-drained ground. Put a layer of straw on the ground and cover first with straw six inches deep, then six inches of earth, and as the frost gets harder cover with fresh straw manure. Have ventilators every 15 or 20 feet, as all roots sweat in storage. These may be filled with straw during cold periods.

**All roots should be as free from dirt as possible when put in storage.**

It is often advisable to leave a few days in small piles so that the second lifting any adhering will be moved.—A. H. MacLennan, O. A. College, Guelph.

**Freemartin Heifers.**

Twin calves—both of the same sex—will breed with just as much certainty as though they were born singly. When twins are born male and female the female is known as a freemartin and is usually sterile. There have been cases where freemartins have conceived, but they are rare. Probably not over one out of 100 will breed. It is just as unusual for the bull of male and female twins not to breed.

**A Good Whitewash.**

Slake one-half bushel of fresh lime with boiling water, covering the receptacle to keep in the steam. Strain the liquid through a fine sieve, and add seven pounds of fine salt, previously dissolved in warm water; three pounds of ground rice, boiled to a thin paste and stirred in; one pound of white glue, soaked first in cold water until swollen, then carefully melted over fire.

To this mixture add five gallons of hot water and let it stand covered for a few days before using.

**Railway News**

Mr. Edward Everett Beck, who since the death of Mr. Jackson has been acting manager of the Vancouver Hotel for the Canadian Pacific Railway, has been appointed manager. Mr. Beck has been connected with this hotel ever since he entered the service in 1907, first as clerk, then as rooming clerk, and since June 16th, 1920, as assistant manager.

Calgary—For the first time in two years the car department at the Canadian Pacific Ogdens Shops worked full time. This was the official announcement made at the offices of the general superintendent of the Alberta Division. The department mentioned is one of the largest at the shops and will effect carpenters, car repairers and helpers. It is stated that the heavy movement of grain is the cause of the increased work. The announcement has been received with much satisfaction by the men concerned.

Sherbrooke—Three years in the St. Vincent de Paul penitentiary was the sentence on Joseph Couture, of the township of Lingwick, for placing a bolt and a spike on the Canadian Pacific Railway track. The case was heard before Judge J. H. Lemay, in the District Magistrate's Court, when the accused was charged with placing obstacles on the railway track with intention to destroy valuable property and endanger human life. The accused immediately pleaded guilty and, after receiving the usual warning from the court, was committed for trial. He asked for a speedy trial before Judge Lemay. Counsel for the plaintiff advised the court that the accused had a rather bad record and claimed that he had previously served one term of two years and two separate terms of four years in jail.

The court commented upon the seriousness of the offence insofar as valuable property and scores of lives were threatened, and pointed out that he was liable for a term of five years, or even a term for life if it were proven that the obstacles had been placed there intentionally.

Regina—"There is so much wheat in some parts of Southern Saskatchewan that it will take until next summer to get it shipped out of the country," said J. H. Chown, superintendent of the C.P.R. at Regina, last night.

Mr. Chown made this statement upon his return from a trip over the southern lines of the Regina district, the trip including the Arcola line as far south as Stoughton, through to Weyburn as far west as Assiniboia and thence up the Soo line to Moose Jaw.

"The wheat crop in some of the districts in this area is as good or better than 1915," said Mr. Chown, "and now that threshing is well under way some remarkable yields are being demonstrated. Where people expected to get 15 bushels to the acre the threshing machine is registering 25 bushels, where 25 bushels were anticipated they are getting 35 bushels and where 30 bushels were estimated the yields are running close up to 50 bushels to the acre.

"At Vantage," continued Mr. Chown, "I walked up to a threshing outfit operating not far from the station and engaged the thresherman in operation. He told me the field he was threshing was running 48 bushels to the acre. The grain was uniform, well ripened, a good color and an excellent sample of wheat in every respect."

Edmonton—A good harvest and the existence of a plentiful supply of foodstuffs in all parts of Canada is the basis upon which C. E. E. Ussher, general passenger traffic manager of the Canadian Pacific railway, with headquarters in Montreal, makes the encouraging prediction that business is bound to show considerable improvement during the next few months and soon to reach the level of the best of pre-war times.

Mr. Ussher was a visitor in Edmonton in the course of a tour which took him as far west as Vancouver.

Passenger traffic business is a worthy barometer in the testing of general business conditions, and Mr. Ussher announces that the year, from a passenger traffic standpoint, has been an excellent one, while it is felt certain that the coming winter and spring will see still further increases. Tourist travel during the past season has been almost as good as it ever was, while reservations made for winter traffic, including ocean cruises, are exceptionally numerous at this time.

Then, again, traffic to and from the old country during the past few months has taxed accommodation to capacity, while steamers plying between the west coast and the Orient have also been doing great business. Mr. Ussher is a strong enthusiast for an open door policy of immigration into Canada, and in speaking upon the topical subject he declared that there would come a time before many months had passed when Canada would be setting up a cry for labor.

**DUNDALK THIEVES ON TRIAL**

(Dundalk Herald.)

In connection with the theft of auto tires and shot gun from the McMillen garage, Dundalk, a couple of weeks ago, Roy and Melville Campbell are under arrest at Owen Sound charged with the crime. The trial will take place at the county capital next Tuesday. It appears that a gun in their possession when they were placed under arrest on a charge of rum-running, was identified as one taken from the garage here.

**WHAT WE MARRY**

(Ruth Cameron, in Free Press.)

"But he will do anything in the world for me. He is absolutely different with me than he is with other people."

I suppose you can guess the sex and condition of the person who made this statement. A woman in love. Or, perhaps, I should, a woman who has a man in love with her.

Some one had warned her that the man who was so much in love with her and wanted to marry her was very selfish and bad-tempered, and had told her certain things to prove it.

Whereupon she made that triumphant answer.

Poor, foolish girl! If what she was told is true, it simply means that she is putting her trust, not in the character of the man she is to marry, but in his present feelings towards her.

I say present, you see. Not because I think this man is fickle. I don't. But simply because I think that the intense feeling which swings people into matrimony simply cannot last with anyone. Life couldn't go on if it did. Would the work of the world ever get done if we were all lovers mooning about, thinking of loved ones instead of our work? That intense, all-devouring feeling may become transmitted by years into a glorified tenderness and friendship, or it may disappear, leaving only habit and tolerance in its place.

But, in either case, you can no longer depend upon it as a motive power to govern the actions of the other party towards you.

What you have left to deal with is simply his original character.

If people could only realize that before they married instead of after we might be wiser in our choice.

If, instead of being influenced by the way her lover acts toward her, a girl would be watching to observe how he acts towards his mother and sister, towards people who serve him, towards casual strangers; what his ideas of honor are; whether he pays bills promptly; what kind of a sport in the matter of games he is; whether he is fair-minded in an argument; she would know what she would have to deal with five or ten years afterward, when the original illusion had died down.

And, likewise, if a man would try to discover how much courage and patience and common sense and maternal instinct and sense of honor and the innumerable other virtues it takes to make a successful wife, lay behind the determination to please him of courtship days, he would know what he is getting into.

For it is always the character you are marrying and not the love.

And that means you who are saying to yourself: "That may be true of common people, but our case is different. We are so much in love that we shall never get over feeling just this way."

Poor, foolish woman! And this time I mean myself. For I might as well try Canute's trick and stand on the shore and tell the waves not to come in. Love is the veil that nature throws over character in order to make ordinary people fancy each that the other is extraordinary and that they cannot be happy unless they marry, and therefore unintentionally serve nature's supreme end. And who am I, to think I can pull that veil aside?

**BRUCE COUNTY BOY MAY**

**LOSE SIGHT OF ONE EYE**

(Owen Sound Sun-Times.)

Barie McKenzie, 14-year-old son of Mr. and Mrs. William McKenzie, 2nd of Bruce, met with a peculiarly painful accident one day last week, by which he is in danger of losing the sight of one of his eyes. He has been attending Kincardine High school. While on the ball ground with a bat in his hand a fellow pupil tossed a glass bottle to him, which he struck with the bat and smashed to atoms. A small piece of the glass struck him on the ball of the eye, penetrating rather deeply into the lens. He is now at his home under the doctor's care.

**Beware of SORE THROAT**

**PEPS Your Best Safeguard.**

**BECAUSE** the throat is "the highway to the lungs" you should take Peps immediately it feels tender, sore or inflamed.

Peps are the wonderful healing and infection-killing medicine which you breathe from pleasant dissolving tablets down the air-passages into every nook and corner of the bronchials and lungs. Peps quickly relieve pain and irritation. They

**Exterminate Germ Trouble,** strengthen and protect the throat and bronchial tubes, and prevent the development of winter cough, bronchitis and asthma.

Peps are safest for children and adults. They contain no opium, chloral or other nerve-depressing drug, nor any formalin or similar throat-parching chemical found in common tablets.

**Peps**

**INFECTION-KILLING TABLETS**

PEPS are recommended in the highest terms by Dr. Gordon Stables and other eminent medical men. They provide the pleasant, speedy and safest of remedies for bronchitis, throat and chest affections. Make yourself secure against germ attack. Provide yourself with a box of Peps today! 15c. all drug stores.

**Durham High School**

The School is thoroughly equipped to take up the following courses:

- (1) Junior Matriculation.
- (2) Entrance to Normal School
- (3) Senior Matriculation.
- (4) Entrance to Faculty of Education.

Each member of the staff is a University Graduate and experienced Teacher.

Intending pupils should prepare to enter at beginning of term.

Information as to Courses may be obtained from Principal.

The School has a creditable record in the past which it hopes to maintain in the future.

Durham is an attractive and healthy town and good accommodation can be obtained at reasonable rates. C. H. Danard, B.A., Principal.

R. Ramage, Chairman.  
J. F. Grant, Secretary.
