## For The Quiet Hour

HYMN FOR THOSE IN PERIL IN THE AIR Cora B. Evans. Eternal, Father, strong to save, Whose arm doth bind the restless wave, Who holdest in thy vast control The winds that sweep from pole to pole: Hear us, we pray, for those who dare The perils of the trackless air!

O Christ, incarnate Son of God, Who once for us earth's pathway trod, Who marks the sparrow's downward fall, And hears the ravens when they call: Hear us who pray for those who dare The perils of the trackless air!

O Trinity of love and power, Our brethren shield in danger's hour; From rock and tempest, fire and foe, Protect them wheresoe'er they go: And hear our prayer for those who dare The perils of the trackless air! -"The Living Church.

The Board of Bishops of the Methodist Episcopal Church adopted a who died October 11 at the age of reply to the Lambeth Appeal at their meeting at Syracuse, N. Y., two years. This is the fourth death last November. Agreement was expressed as to the Appeal except in the matter of ministerial orders, upon which the bishops said:

"But respecting the condition of union laid down in the Appeal with reference to ministerial orders, we are compelled, with all due regard for the earnestness of the proposal and in full view of the tremendous issues was Miss Jessie Black, formerly of at stake, to register our dissent. We are not unacquainted with the history of ministerial orders. Holding that the ministerial orders of the Methodist Episcopal Church are fully valid and divinely sanctioned, we cannot consent to make them secondary to any other. Nor can we, even for the sake of a united church, cast any shadow of doubt, of invalidity, or of irregularity on them or on their ministrations, which have been so

In a general intelligence test in a school one of the questions was "What is the longest day in the year?" One child answered: "Sunday."

God keeps the upper lights burning brightly as ever, but He has left us down here to keep the lower lights burning. We are to represent Him here as Christ represents us up yonder. Let us have our loins girt and our lights brightly burning, so that others may see the way and not walk in darkness .- D. L. Moody.

While rejoicing fully with all the innocent and pure joys that come to our boys and girls in these days of playgrounds and institutionalism of every kind, one sometimes feels that herein lies also a great danger. It is this: Children are often missing completely the companionship of the parents. And the Creator never intended this almost utter absence of a close fellowship between parent and child. It is certain also that some daughters are out upon the playground now that are needed by the overworked mother at home. It is, of course, true that multitudes have no such environment as a home connotes. About everything is absent to Glenroadin. Immediately a conveymake a real home except some furniture-no honor, no moral rectitude, no affection, no chivalry, no family life, and certainly no recognition God or spiritual things. And then, assuredly, institutions and playground oversight are vastly better than their "home." He prayed, in that child-like way of his, to be shown how to order the day. The guidance came not to speak to her of sacred things, but to give her the merriest, happiest day possible. And so he did, for he was pastmaster in the art of making sunshine. Another Conference is to be held within a period of twelve months, the understanding being that it is to be held away from the great centres of population and is to be preceded by a half-day of prayer and spiritual communion.

The Paris Gaulois publishes the following figures, professedly taken from the reports of the Extraordinary Commission printed in the Soviet newspapers. Since October, 1917, there have been executed, says the Gaulois, 28 bishops of the Greek Church, and 1215 priests, 6,775 professors and school-teachers, 8,800 physicians, 54,650 army officers, 260,000 soldiers, 10.500 police officers and 48,500 privates in the constabulary forces, 12,950 landowners, 325,250 other members of he "intelligentsia" and of the middle he says: class, 193,350 workingmen, 815,100 peasants.
