(Our own correspondent.)

**INCREASE IN MILK CONSUMPTION**

Twenty leading restaurant keepers in a large city in the United States testified that since prohibition came in their milk bill has doubled. Several hotel and restaurant proprietors in the busy centres of Canada have given testimony to the same effect. They say that many business men who formerly took an appetizer before meals, a glass of beer or wine with the meals, and a liqueur afterwards, now confine themselves to a glass of milk. In addition, a number of school teachers formerly satisfied themselves with a visit to the tap after lunch now bring small bottles of milk to school with them. The latter is in a large measure due to milk campaigns like that carried on at schools and promoted and fostered by the Dominion Dairy and Cold Storage Branch through its propagandist and lecturer, Miss Helen G. Campbell, who during the winter spent considerable time in fostering the movement in the Province of Quebec. Two noteworthy places that were visited on the invitation of the respective City Councils were Shawinigan Falls and St. Jerome, at each of which milk weeks were held and lectures delivered, both in French and English, to the children in the morning and to adults in the afternoon. At the Falls, 500 children and 350 women were present daily. At Grand Mere there was a like attendance. At Shawinigan also the City Council offered prizes for the best essays and posters bearing on the subject. These lectures, if might be mentioned, are given by Miss Campbell in response to invitations addressed to the Dairy Commissioner, Ottawa.

**LESSONS FROM HOG GRADING**

A few hours at the elbow of a hog grader at one of the abattoirs or stock yards in Canada would be time well spent. One may learn much about hog grading from reading and conversation but the lesson is much more impressive if one sees a shipment divided into separate lots according to grade, more especially if the shipment contains specimens from ones one farm.

A grader has three principal points to bear in mind weight, length and form. Many hogs, of ideal weight, are assigned to the thick-smooth group because they are too short for selection. Others may have the correct length and weight, but are so rough in shoulder as to put them outside the select section. One may doubt the justice of a grading report if he has never witnessed grading in practice, but he is unlikely to do so if he sees the work done by an official grader.

It is equally instructive to go through the packing plant and to be shown collections of sides made from hogs of the different market grades. The Wilshire side is of definite form, and of weights ranging between certain limits. The characteristics of the side that brings the highest price are well understood and the first grade of Wilshire is obtainable only from a select bacon hog. Like No. 1 barrel wheat, No. 1 cheese, No. 1 creamery butter or fancy fruit, the select hog is worth the higher price. A hog raiser will profit greatly by visiting a stockyard or an abattoir and seeing for himself the actual grading of a shipment of hogs.

**HISTORY'S REGULAR STUNT**

(Kincaidine Review.)  
 The Progressive party at Ottawa is at the parting of the ways. Its leader in the strength of an allusion in the Speech from the Throne has pledged consistent support to the Liberal government. It is well that the alliance should be open, and above board. It was always there, though never so fully avowed. It is history repeating itself. The members elected by the Patrons of Industry with a few solitary exceptions supported Mowat in Toronto and Laurier in Ottawa. The party split into pieces but the leaders were not able to convey the patrons in the constituencies over to the Liberal party.

Hon. Mackenzie King has made the observation that third parties always arise when the Conservatives are in power. Speaking generally the observation is correct but he would have more difficulty if he went on to explain why they are generally organized and led by Liberals. It was true thirty years ago with the Patrons of Industry and is now with the Progressives.

Third parties were never organized or maintained to benefit the Conservative party. Only when their leaders did the Conservative party receive any advantage.
