THE HATCHING OF EGGS

Operating the Incubator and Setting the Hen.

Selection of Eggs for Hatchings—Do Not Keep Them Longer Than Ten Days—Justice to the Soil—The Lamb Market.

(Contributed by Ontario Department of Agriculture, Toronto.)

Operating an Incubator.

Given a suitable room, the first thing is to clean the machine before and after every hatch. Brush the machine clean, wash it out with hot water, then spray or wash it with a disinfectant. The next operation is to set the machine level. The thermometer must be accurate, and to assure accuracy it should be tested at least once, or better, twice during the year. The temperature given is usually 103 degrees Fahrenheit throughout the hatch. Our experience has been that it is better to take an objective of 102 degrees, and if the machine creeps up to 103 degrees we have no cause for worry; but given a temperature of 103 degrees, when the machine goes up to 104 or above, usually either the hatch is small or the chicks hatched are hard to rear. Low temperatures are not so fatal as are high temperatures. The amount of moisture required in an incubator depends upon the make and the room. Generally it is best to follow the manufacturer's directions.

Hatching by the Natural Method.

It is generally agreed that, in order to secure a good hatch, the hen must be placed where other hens are not, so she will not be disturbed by them. When other hens lay in the nest with the sitter. Some farmers do not set a hen until one becomes broody on a nest where no others lay, which often necessitates late chicks. The difficulty can be overcome by making a new nest for the broody hen. A box about twelve inches square and six inches deep; some earth, or an overturned tin in the bottom, with care to have the corners very full so that no eggs can roll out from the hen and get chilled; next, about two inches of straw or chaff, and then a few earthen eggs put into the nest. The nest should be placed in some pen where nothing can disturb the hen, and put her on after dark. Feed and water must be within easy reach, and a dust bath should also be convenient. If the hen is sitting quiet the next day, you will be safe in putting the eggs under her. In our experience we get ninety per cent. of the hens to sit by following this method. It should be remembered that the hen will be in better condition if dusted with insect powder when set, and also a few days before the hatch comes off. This will usually keep the lice in check, especially if some tansy or mint leaves are used in making the nest.

Selection of Eggs.

Select for color, size and shape the kind of eggs you want for market. Continuous selection, year after year, will give results. Do not select dirty eggs, nor handle eggs unless your hands are clean. The shell is porous, hence there is possible contamination. Eggs deteriorate in hatching quality with age. When you hold eggs for hatching keep them in a cool place about fifty to sixty degrees Fahrenheit. Be sure the place is clean and not musty. Eggs for hatching should be kept not longer than ten days. The eggs from late hatched pullets, or immature birds, seldom hatch as well as eggs from mature birds. Our best hatching eggs have been produced from early hatched pullets that laid well in the early winter and then went through a partial moult. The pullets hatched in early February have, the following spring, produced remarkably good eggs for hatching. Heavy bred pullets hatched in May have produced the poorest hatching eggs.

Eggs from birds out of condition, whether from feedings, or from management, produce eggs difficult to hatch. It is also true that the hatching power of eggs in a day or two will vary, the cause of which at times is difficult to locate.—Dept. of Extension, O.A. College, Guelph.

Justice to the Soil.

We can well close this discussion with a statement published years ago by the late Mr. Heard, for in it is the moving thought of all that has gone before. "In renting farms," wrote Mr. Heard, "there are three kinds of justice to be provided for: justice to the owner, justice to the tenant, and justice to the soil. Until these three are fairly considered in the bargain, there will be constant friction and dissatisfaction. It has well been said that the finest product of the highest civilization is plain, straight justice and common sense in all the relations of life."

The Lamb Market.

An investigation of the lamb markets was carried out by the Animal Husbandry Department, O. A. C. Guelph, and a study of the leading markets for the past twenty years. It is evident that the lowest prices occur in September, October and November, and anything that can be done to spread the lamb marketing period over a greater part of the year would be of value to the producers. Experiments at the Ontario Agricultural College, conducted within the past four years, show excellent results from seeding Sweet Clover alone in the month of July. The seedlings which took place later than July were unsatisfactory.

An account book helps locate the no-account cows and crops.

Problems of the Farm

Contributed by Grey County Department of Agriculture

Pig Clubs For Grey County Boys.

The Ontario Department of Agriculture, through the Live Stock Branch and Agricultural Representative Branches and the Dominion Live Stock Branch, Ottawa, are co-operating in association with the Ontario bankers to stimulate a greater interest among boys in swine production and to teach them to raise pigs of the bacon type and earn and save money.

The following are the regulations:

- 1. Club members must be 14 years of age and under 20. 2. All pigs entered for competition in car load lots must be fed by a member of the club for at least three months previous to the date of the shipment. Parent or guardian must sign a declaration to this effect and this will be called for at car load competitions. Entries for membership must be made before June 1. 3. Each club will select pigs the sizes of which are all one bacon breed. No prizes will be awarded unless they conform to this provision. 4. Club owners must enter not less than two nor more than six hogs except in such cases where a club member may wish to feed the entire litter of any one sow. 5. Hogs should be within the bacon weights—180 to 230 pounds at country points at time of marketing. The special marketing day and club judging competition will be held during the last week of October. Pig Clubs may consign car lots of hogs through the marketing points at any time when the majority of hogs are the proper weight and finish. 6. Car load entry shall consist of not less than 60 hogs of which 30 per cent. shall officially grade-out before in order to be eligible for car lot competition prize money. 7. All prize money won in car lot competition will be divided equally among contributors in proportion to their contribution and quality. 8. The Department of Agriculture reserves the right to limit the membership and make any additional rules they deem advisable for the satisfactory conduct of the club. The car lots are shipped to Toronto when the following prizes will be awarded by the Dominion Live Stock Branch: Five to 10 entries, \$100.00; 2nd, \$90.00; 3rd, \$80.00; 4th, \$75.00; 5th, \$70.00; 6th, \$65.00; 7th, \$60.00; 8th, \$55.00; 9th, \$50.00; 10th, \$50.00.

What He Was Doing.

Little Willie, in a playful mood, was caught by his mother when he was chopping playfully with a hatchet on the old grandfather clock which stood in the hall. "Willie, what are you doing?" asked his mother. "Just whittin' away the time," was the calm reply.

School Fair Material.

The Department at Markdale regrets that the School Fair material has not been delivered to date. The delay was caused by the deep snow on the roads in the Markdale District. Unfortunately, the Easter holidays will further delay delivery for another week, but we hope to have all material sent to the children so that the teachers will have it when they return after the holidays. Ontario Grown Alfalfa Seed.

The following is a letter received from the Kellogg Seed Company, of Milwaukee, Wisconsin: A special message to our friends and customers. This is an Alfalfa year. Act quick. Big Demand. A limited supply Canadian Variegated Alfalfa. We are specializing this season on a very hardy strain of alfalfa known as Canadian Variegated Alfalfa, Grimm type, grown in the Province of Ontario, Canada. We think this seed under the following description and conservative shippers: This special stock of the same type as Grimm's, being more or less var-

iegated, varies from top roots with spreading secondary to a decidedly spreading root system and the crop would pass for that variety, in fact, it has really more claim to be called Grimm's than seed which is often sown under that name. Trial plots in Canada show a very decided superiority over all others in every way, both in stand of plants and healthiness of growth. Hardier seed cannot be obtained. Growers preferring Grimm's, but hesitating at the price will make no mistake in securing this variety. Grey County farmers! This is an alfalfa county. Wonder if it would not be possible to supply this big market with seed grown in this county? Would it not be advisable for you to get together and look into the merits of an organization such as Grey County Alfalfa Growers, which would look after the sale of seed to companies which are advertising your own produce unknown in many cases to yourselves? What think you of the idea? You alone must answer. Your local branch will certainly give you any assistance required. Peel County Alfalfa Growers have united and are doing a big business. In fact, we are informed that many Grey County farmers are buying their seed through this association. Grey County seed if it is properly cleaned is just as good. We trust that you may think over the proposition suggested here.

THE NEW VILLAGE STORE

(Knoxville Express.) The village store has changed a pile or so it seems to me. It's different in stock and style. From what it used to be: The cracker barrel's vanished now. There's nothing left around, I vow. To tempt your appetite. There is no place for us to sit. Who used to haunt that store. Our wisdom and our native wit. Aren't heard there any more: The place now is all spick and span. And citified and smart, It's simply broken up the clan. And cracked each loaf's the heart. I know it's making money fast. Since it has changed in the past— It never made much in the past— But those were good old days! It was the meeting place, the hub, In the glad time of yore; It was the forum and the club— And now—it's just a store!

PUTS HEALTH AND VIM INTO WOMEN

So Says Mrs. MacPherson of Lydia E. Pinkham's Vegetable Compound

Brantford, Ontario.—"I was always tired and the least exertion would put me out for a day or two. I had a pressing pain on the top of my head, pain in the nape of my neck, and when I stooped over I could not get up without help, because of pain in my back. I did not sleep well and was nervous at the least noise. I keep house, but I was such a wreck that I could not sweep the floor nor wash the dishes without lying down afterwards. A friend living near me told me what Lydia E. Pinkham's Vegetable Compound had done for her so I began to take it. With the first bottle I felt brighter and got so I could wash dishes and sweep without having to lie down. Later I became regular again in my monthly terms. I have taken ten bottles all told and am now all better. I can truly say that your wonderful medicine cannot be beaten for putting health and vim into a woman."—Mrs. JAMES H. MACPHERSON, 309 Greenwich St., Brantford, Ont.

If you are suffering from a displacement, irregularities, backache, or any other form of female weakness write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women."
