H. H. McDONALD, Clerk. R.R. 1, Durham, May 22, 1924. 52221

ON FEEDING CHICKEN

Heptin. Course. From a Wide y Known Poultry Expert.

Don't overfeed at the Start—Feed Sprouted and Cracked Grains—Give Them Plenty of Grit—Feed Less Frequently Later—Millets Sown at Different Dates.

(Contributed by Ontario Department of Agriculture Toronto.)

No feed is given until the chicks are nearly three days old. Water may be given to drink if the chill is taken off. The chicks are given the feed upon clean boards about eight inches wide. There must be plenty of boards so that there is room on the board for every chick. A board three feet long and eight inches wide will give room enough for fifty chicks on the start. So says Prof. W. R. Graham. The chicks for the first few weeks should be fed about six times daily at regular intervals. Give the first feed in the morning as early as the chicks can see to eat and the last at night as late as possible. If growing chicks in February one feed may be given at night using artificial light. Don't overfeed at the Start.

Many chicks are overfed on the start. We have adopted the plan for the first day or six days in the brooder of weighing the feed. An experienced feeder may not need to weigh the feed, but the beginner generally does better by weighing it. We allow one ounce of the dry mixture for every fifty chicks at each feed; that is, no chicks, for their first five days in the brooder, get more than six ounces of dry feed to fifty chicks in one day. The plan followed is to moisten the first feed with canned tomatoes, the second with eggs, and the third with minced liver, and then begin the series over again. The above amount will not satisfy the chicks' appetite. They will create a great noise at every feeding time, but it gives a chance for the chick to absorb completely the yolk in the body. After the first period one should feed two or three times each day all that the chicks will eat.

We begin giving a drinking vessel each of water and sour milk when the chicks are about a week old. Many give sour milk to drink at the start, but it has obtained slightly better results by not giving the milk for the first three or four days.

Feed Sprouted and Cracked Grain.
When the chicks pass the second week, sprouted grains may be fed, also a little cracked grains. The change should be made gradually from tomatoes, eggs and liver over to sprouted grains, tender green grass, if available, and a little grain.

If leg weakness is noted, the tomatoes and sprouted grains should be increased or the chicks put out of doors on clean tender grass.

It is best to rear the chicks on new ground each year, and never to brood two lots of chicks on the same ground in any one year. Many chicks are sent in for examination each year that have troubles due to land infection.

It also will be found advantageous if feeding chicks from trough or broods out of doors to move the boards or troughs a little every feed. Likewise it must be remembered, when the chicks are fed indoors, to keep the feed boards clean.

Give Them Plenty of Grit.
Grit is always in easy access of the chicks. It is advisable and necessary to add a little oyster shell, just or fine particles to the ration daily. A certain amount of lime is necessary. Moulds kill large numbers of chicks. Be sure your house is clean and the litter not musty. Do not use cut barley or rye straw as litter for baby chicks, because the beards may get into the chicks' eyes. Good clean alfalfa makes the best chick litter we have used. When it gets soiled or dirty remove and replace it with clean litter.

Feed Less Frequently Later.
As the chicks get older the number of feeds per day may be reduced, so that at an age of seven weeks three or four feeds per day are sufficient; in fact, after the second week hoppers of crushed oats or dry mash may be placed in the pen. The feeds of moist mash are continued at what ever amount the chicks will clean up.—Dept. of Extension, O. A. College, Guelph.

Millets Sown at Different Dates.
The question is frequently asked regarding the best dates for sowing millet for hay production. For several years in succession an experiment has been conducted at the Ontario Agricultural College by sowing millets on each of six different dates, starting on May 15th and finishing on August 1st, allowing about two weeks between each two dates of seeding. The average results have shown the highest returns from sowing on June 1st. Naturally, varieties like the Japanese Barnyard and the Japanese Panic require to be sown earlier than the Hungarian Grass, which requires a shorter season for development.

Keep the brood sow in good thrifty and healthy condition. Allow her plenty of exercise. Feed her green food in the winter. She is very fond of alfalfa hay and mangel beets with one feed per day of middlings and milk. Give her a dry comfortable straw bed, also plenty of fresh water, and she will winter in prime condition.

Someone has said that the best teacher in a community isn't always the one in charge of the school as superintendent or teacher, but may be some progressive farmer who wakes up the community to new possibilities and who develops a new line of thought and starts a new enterprise.

Problems of the Farm

Contributed by Grey County Department of Agriculture

Club Hog Inspection.

During the past week Mr. Dan Lerch, Preston, one of the most successful breeders of Yorkshire hogs in Waterloo County, was in the County on a tour of inspection of the various Bacon Hog Clubs of Grey County. There are now thirty clubs. The majority of the members of the hogs were condemned. These will be replaced by others of better type at no cost to the clubs. Surely such service commends itself to the farmers of Grey County.

Two new clubs have recently been organized, one at Dromore, and one near Boggor, in Sydenham. Others are in process of organization, but many more might be started.

The regulations are as follows: Any ten farmers having at least twenty sows can secure a hog or approved bacon type free of charge. The requirements are not at all impossible to perform as is shown by the results of the clubs now organized. The good sires will be retained but they will be transferred to other clubs upon request of the members.

Grey County could with profit go into this bacon club work more extensively. Perhaps if co-operation were given a Hog Fair could be arranged in some district where there was interest sufficient to assure a goodly number of entries. It is for Grey County farmers to say.

Wool Market.
The year 1924 promises to be the banner year in the amount of wool which will be shipped to the Canadian Co-operative Wool Growers. More applications are being received than ever before. Special loading days in Grey County will be held as heretofore.

In 1921 over 26,000 pounds of wool were shipped, in 1922 there were 208 farmers shipped 38,633 pounds, and in 1923 approximately 225 farmers shipped 30,000 pounds.

The prices this season are higher than for some time. The markets seem firm, so that prospects are ideal. This, in addition to a decreasing handling cost, makes the co-operative sale of wool a real attractive proposition to sheep farmers in Grey County.

The Department of Agriculture have always handled the paper twine and sacks which the Canadian Co-operative Wool Growers supply. This year the supplies can again be secured from the local office.

Paper twine is used to tie each fleece. It is preferable to any other cord used as there are no threads to become detached, which will not break down. Sisal strands from ordinary binder twine will not scour from the wool, hence will be carried into the cloth. Better to leave each fleece untied than to use binder twine.

Farmers having wool for sale should try the selling to the Canadian Co-operative on the graded basis. If you have never shipped before, why not send a few fleeces for a trial. It will not cost anything and the results will usually be quite gratifying.

O. A. C. Semi-Centennial.
The semi-centennial celebration of the O.A.C. has been completely arranged for. The special day set apart for Grey County farmers is Friday, June 13. It is hoped that a large number of representatives from Grey County will be on hand. Special arrangements may be made by the Grey County branch of the Department of Agriculture. If any are interested it is hoped they will communicate with the Grey County office. Some desire to motor, some wish to go by train, while others prefer to motor to the nearest C.N.R. station and go by train from that point. Which do you prefer?

SHIPPING EVERY SATURDAY
Arnold D. Noble will ship Hogs from Durham every Saturday for noon. Highest prices paid. 11231f

STRAY CATTLE
Yearlings, steers and heifers, came to the premises of the undersigned on Sunday night, the 18th of May. Owner required to prove property, pay expenses and take them away.—John McGowan, Durham. 5223

COMPENSATION SIDE OF TEACHING RARELY CONSIDERED

A teacher in one of the Public schools in the city is of the opinion that, while much is written of the trials of teaching, too little is said of its compensations. She told the following amusing case in instance the other day:

An Italian boy in one of the lower grades made such progress with his studies, especially with English, that his grateful father felt it incumbent on him to call in person at the school building and express his gratification. His speech was not all intelligible, but there was no doubt of his sincerity, for he concluded with this generous offer:

"Missa Teacher, I havva de barbi shop ona de corner. You bringa me your hair ana day, an' I givva you de shampoo, or cutta de bob. Costa you netta de cent."

COMPENSATIONS IN FARMING
(Lindsay Watchman-Warder.)
Farming has its attractions even though it has never yielded high profits as a business enterprise. Evidence of this may be seen in almost any part of the country. One man's farming has not made him rich, but he still keeps the homestead and takes a pleasure in going out regularly to see how the crops are coming along. Almost every owner of land realizes that if he were to sell out, invest the proceeds in bonds or stocks to return him 6 per cent and would be sure of a greater income. Yet he prefers to remain his own master and work long hours. There are compensations that account for this choice of what seems to be a harder life.

CARD OF THANKS
We desire to thank our friends and neighbors for sympathy expressed and help generously given during the recent illness and death of our beloved mother, Mrs. Thomas Nichol. We also desire to thank those who so thoughtfully sent floral tributes.—The Family.

IN MEMORIAM
Everett.—In loving memory of G. R. Everett, who departed this life May 29, 1923.

It's hard to break the tender cord When love has bound the heart. It's hard, so hard, to speak the words We must forever part. Now, dear loved one, we must leave thee. In thy lonely grave embraced, But thy memory shall be cherished Till we see thy heavenly face. —Sadly Missed by His Wife.

A Good Shot.
The new night-watchman at the observatory was watching some one using the big telescope. Just then a star fell. "Bogorra," he said to himself, "that fell sure is a crack shot."

EXCRUCIATING PAINS, CRAMPS

Entirely Remedied by Lydia E. Pinkham's Vegetable Compound

Eberts, Ont.—"I started with cramps and bearing-down pains at the age of eleven years, and I would get so nervous I could hardly stay in bed, and I had such pains that I would scream, and my mother would call the doctor to give me something to take. At eighteen I married, and I have four healthy children, but I still have pains in my right side. I am a farmer's wife with more work than I am able to do. I have taken three bottles of Lydia E. Pinkham's Vegetable Compound and I feel that it is helping me every day. My sister-in-law, who has been taking your medicine for some time and uses your Sanative Wash, told me about it and I recommend it now, as I have received great relief from it."—Mrs. NELSON YOTT, R. R. 1, Eberts, Ont.

Lydia E. Pinkham's Vegetable Compound is a medicine for ailments common to women. It has been used for such troubles for nearly fifty years, and thousands of women have found relief as did Mrs. Yott, by taking this splendid medicine.

If you are suffering from irregularity, painful times, nervousness, headache, backache or melancholia, you should at once begin to take Lydia E. Pinkham's Vegetable Compound. It is excellent to strengthen the system and help to perform its functions with ease and regularity.
