SOME POULTRY POINTS

Selection and Mating Are Both of Much Importance

Does "Like Beget Like?"—The Question of Selection—Inbreeding and Line Breeding—Winter Egg Production—Points on Plow Adjustment.

(Contributed by Ontario Department of Agriculture, Toronto.)

There are two main points to be considered in poultry breeding. First, the selection of birds that have the characters desired; and secondly, a further selection from these of birds that can produce offspring as good as or better than themselves.

Does "Like Beget Like?"

Many are of the opinion that "Like never go broody but some do, and it is true for general and not for particular qualities. It is true that a male White Leghorn mated to White Leghorn females will breed chickens that are White Leghorns, or that have white plumage, yellow legs, and white earlobes. But of the offspring of these there will be no two chicks exactly alike. We find large and small Leghorns, most of them do not expect to get all daughters that will lay 200 or more eggs a year, but we do expect upon the average a better production than had no selection been made.

The Question of Selection. Selection is made on the basis that like will produce like, but experience has taught all breeders that to secure uniform superiority they must carry on the selection through generations of poultry. If we select birds that have laid better than 200 eggs in twelve consecutive months and mate these to a male of similar strain, we do not expect to get all daughters that will lay 200 or more eggs a year, but we do expect upon the average a better production than had no selection been made.

Inbreeding and Line Breeding. Having located a successful mating, one can perpetuate easily so long as the originals are breeding, but the problem begins after the first mating ceases. Shall one breed mother and son, or brother and sister, or cousins, or what is the best procedure. Our experience in breeding birds of very close relationship, such as mother-son, or brother-sister matings, would not warrant us recommending such a procedure. It is true that we have had some successful results, but it is likewise true that most of such matings have been very bad. If one is anxious to breed closely, our experience would suggest a trial of any relationship, so long as the birds are vigorous, but it is not wise to depend entirely upon such a mating. A good in-bred bird will likely be a valuable breeder, but such a bird is difficult to produce.

It is very doubtful if one can say what relationship will give the best results, for the average person it would appear to be good advice not to breed too closely, and to look for new blood from some source where the breeding has been similar.

Winter Egg Production. Many people appear to believe that the secret of getting eggs, particularly in winter, is in the feeds given and the method of feeding; others believe the whole problem is in the breed or strain; while others think that the housing is the problem to solve. All these are important, but the main reason for poor results is a lack of careful work months before the eggs are wanted. While you are collecting the high-priced winter eggs you should be making careful plans to secure the crop of pullets for next season.

Where eggs in winter are wanted the early hatched pullet is, without doubt, the one to depend upon. Yearlings hens and those older are very rarely good producers during November and December. They are uncertain even in January and February and really do not begin to lay well until March. Where the egg production falls below fifteen per cent, during the winter months, one is not making much profit. The age at which most pullets begin laying is from six to seven months; some lay at four and one-half to five months, and others not until eight or nine months of age. This means that if a fifty per cent egg yield is wanted in November, the pullets should be hatched during March or April; May hatched pullets will lay a little, but as a rule, not forty or more per cent daily.—W. R. Graham, O. A. College, Guelph.

Hints on Plow Adjustment. 1. Adjust the springs till the weight of the plow beams and bottoms are practically balanced. 2. Hitch plow at a point on tractor drawbar midway between horizontal centre of tractor and horizontal centre of plow. 3. Adjust vertical position of hitch so as to be substantially level in working position. 4. Set levers for first position and open first furrow. 5. Change levers to working position. 6. When plowing is finished, set the levers in transport position and take plow and tractor to nearest shelter.

The three outstanding features of Holland's dairy industry are cleanliness, efficiency and co-operation. Cleanliness is a national trait, efficiency has been developed, and co-operation has been learned and applied through long years of marketing huge surpluses in the face of the keenest competition. Inefficient cows are in the majority; they compete with one another, and all are unprofitable some or most of the time. They are a drag on the best cows, but the latter, despite that fact, are money-makers most of the time.

SOMETHING TO BOAST OF

There are many in this Northern country who are too prone to regard the South as a land of laziness, hot weather and malaria fever. A good many Northerners would be surprised to learn that the South in a great many ways is similar to the North. They have their steel mills, blast furnaces, and industries of various kinds just as we do in this country, and a man to prosper there must adapt himself to circumstances and hard work just as we do in this Northern clime. According to recent statistics,

NOTICE TO CREDITORS

In the matter of the estate of Mary Ann Nichol, late of the Town of Durham in the County of Grey, Widow, Deceased.

Notice is hereby given pursuant to R.S.O. 1914, Chap. 121, Section 56, and amending Acts, that all persons having claims against the estate of Mary Ann Nichol, late of the Town of Durham in the County of Grey, Widow, Deceased, who died on or about the twentieth day of May, A.D. 1924, are required to deliver or send by post prepaid to Lucas & Henry, Solicitors for the Executor of the Estate, on or before the 5th day of July, 1924, their names and addresses, a full description of their claims, in writing, and the nature of the security, if any, held by them.

And take notice that after such last mentioned date, the Executor shall proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which he shall then have notice, and the said Executor will not be liable for the said assets, or any part thereof, to any person or persons of whose claim notices shall not have been received by him at the time of such distribution.

Dated at Durham this 18th day of June, A.D. 1924.

LUCAS & HENRY, 6193 Solicitors for the Executor.

The Thoroughbred Stallion OLD KOENIG (1306)

will make the season of 1924 as follows, health and weather permitting: MONDAY will leave his own stable, Lot 5, Con. 15, Proton, at 12 o'clock noon and proceed by way of Hopewell to the Grand Central Hotel, Dundalk, where he will remain until noon on Tuesday.

TUESDAY, will proceed along the Toronto and Sydenham Road to Flesherton for night.

WEDNESDAY, will proceed to Markdale for noon, where he will remain until Thursday morning.

THURSDAY will proceed by way of Town Line, Artemesia and Glenelg, to the Commercial Hotel, Priceville, for noon, thence along Home Stables, Durham, where he will remain until Friday noon.

FRIDAY, proceeds south along the Provincial Highway to Varney, then East by way of Pollock's Corners to John Nelson's, on the 18th Con. Egremont, for night.

SATURDAY, proceeds by way of Dromore to his own stable for noon where he remains until the following Monday noon. Old Koenig is bay in color and a grand big horse throughout. He stands 16 hands on best of legs and feet. He is a capital race horse, and won upwards of \$18,000 during his racing career from 3 to 7 years of age, thus proving his soundness and stamina. There has been a great demand on the Jockey Club for suitable sires. The horse is given free, but a nominal fee of \$10.00 is charged to cover expenses. The fee for Old Koenig has never been less than \$50.

ENROLMENT NO. 1358 PASSED FORM I. Certificate of Enrolment and Inspection.

of the Purebred Thoroughbred Stallion, Old Koenig, registered in the Canadian Thoroughbred Stud Book as No. 1306, owned by the Canadian Racing Association of Canada, foaled in 1913, has been enrolled under the Ontario Stallion Act, inspected on the 12th day of July, 1923, and Passed. The Ont. Stallion Enrolment Board Robt. McEwan, R. W. Wade, Secretary, Chairman. Dated at Toronto, May 22, 1924.

MOTHER OF TWIN BOYS

Tells How Lydia E. Pinkham's Vegetable Compound Relieved Her of Inflammation and Great Weakness

West St. John, N. B.—"I was in a general run-down condition following the birth of my twin boys. I had a great deal of inflammation, with pains and weakness. Finally my doctor recommended Lydia E. Pinkham's Vegetable Compound. He said that your medicine would be the only thing to build me up. I am sure he is right, for I am feeling much better and am gaining in weight, having gone down to ninety-three pounds. I was in bed for over a month, but am up again now. I have recommended the Vegetable Compound to my friends and give you permission to use my letter."—Mrs. EMER A. RICHIE, 82 Rodney St., West St. John, N. B.

There are many women who find their household duties almost unbearable owing to some weakness or derangement. The trouble may be slight, yet cause such annoying symptoms as dragging pains, weakness and a run-down feeling. Lydia E. Pinkham's Vegetable Compound is a splendid medicine for such conditions. It has in many cases relieved those symptoms by removing the cause of them. Mrs. Richie's experience is but one of many.
