Fulfilling the demand for a low priced Quality Car

To-day more than ever before, careful buyers of motor cars are buying on the basis of value. Not only do they consider the first cost of the car, although this is important—but they also investigate such items as operating costs, average mileage life of the car, resale values and so on.

Facilities for service is likewise a consideration.

It is because Chevrolet meets these demands, and because Chevrolet's price is lower than that of any other quality car that Chevrolet is to-day recognized as the world's greatest motor car value.
