CONTROL OF CORN BORER

Pest Extremely Bad in Middlesex and Elgin This Year.-Growers Should Protect Themselves.

Ravages of the European corn borer have reached such serious proportions in both Middlesex and earlier the better. Elgin counties that many farmers corn crops this year. Elgin is parper cent of the acreage.

Growers are advised to adopt stringent measures of protection, summarized as "cutting the crop low, ensiling it, ploughing the stubble under completely and making sure that all corn gets into the silo as early as possible."

Methods of Control.

The methods of control are simple inexpensive and not contrary to good farm practices. To get a clear idea of them it is necessary to keep in mind that the borers winter over and remain until the end May in any part of the corn plant above ground large enough to conceal them; hence they will be found in the stalks, stubble, cobs or any remnants of the crop left in eld or elsewhere. They will also be to some extent in stout weeds growing among the corn. Control measures, therefore, consist mainly in so treating these that the borers will be destroyed. If there is a silo this is easy, for all that is necessary then is to cut the crop low, ensile it, plough the stubble under completely and not drag it up again when cultivating. The cutting knives and fermentation kill all the borers that go into the silo and the ploughing destroys all left in the field, provided everything is kept beneath the surface.

If there is no silo or if the silo will not hold all the corn, the task is sometimes a little harder. In such cases the field must, of course be thoroughly ploughed after the crop has been removed. In addition, some method must be practiced of disposing of the stalks and ears or cobs. The best is to run all them through a cutting-box or shredder, feed the cattle all they will eat, throw the remainder into the manure and haul this out and plough it under before the end of May. If for any reason the stalks are fed whole the uneaten portion should not be thrown out into the manure, but should be kept separate and burned. It is better to burn the remnants than to plough them under, because it is hard to cover them completely with the plough. The great point to keep in mind is that no stalks, pieces of stalks or even cobs, should be left above ground, in the field or along fences or in the barn or the barnyard or anywhere else. Moreover all burnby the end of May, for otherwise the fraudulent sales. borers will change into moths, fly around and lay their eggs.

Plays Great Part.

Ploughing down of the stubble

disk, and a disk drill, if possible, used in sowing. Should, however, some of the stubble be brought up, much time, to pick and burn it.

This is especially true when approval was given to it at the polls. the corn has been planted in hills. In view of the vigor and frequency or has been cut high or broken down of assertions that sentiment on the

the borers are numerous, it will be advisable for a time to grow dent corn instead of flint, because it is stouter and so withstands attacks better. It will also help greatly in such places if a trap crop of flintfor example, Smutnose-consisting of about a dozen rows is planted about the midle of May and the planting of the main crop postponed until June 1, or as late as possible without running any risk. Th moths then will lay their eggs chiefly on the early corn and leave the main crop largely uninfested. The trap rows should be cut low ir August and fed to the cattle and the borers present thus destroyed.

AN UNPOPULAR APPOINTMENT (Shelburne Free Press)

Cecil T. Reid, mail courier on Route 4, Shelburne, was notified on Monday by the Postoffice Department that his services would not be required after his term of two years expires on September 30. Mr. Reid tendered for the job for another we understand the appointement was given to R. J. Ritchie, a retired farmer citizen of this town, at lesser figure. The new appointment is not proving a popular one with the boxholders on route 4, who, we are informed, intend petitioning the Department to that effect. Mr. Reid's services have been satisfactory as far as we can learn, he is a returned veteran and receives a war pension yearly. The co-operation of the citizens in general will be with Mr. Reid in his efforts to even yet secure the re-appointment.

ANOTHER FRAUD

(Guelph Mercury)

A new fraud is being perpetrated on the citizens of surrounding towns by a young woman who is going from house to house accompanied by a boy. The woman is selling cloth. Her plan is to approach the door and make a sale of cloth of seven yard lengths. When she has gone the customer, it is alleged, finds that by some sleight of hand . method she has received only three yards of cloth. It is extremely likely that she will visit this city . ing or ploughing must be completed to pursue the practice of her

LISTOWEL PIANO FACTORY TO RESUME OPERATIONS SOON

Final arrangements have been and other corn remnants plays a completed between the Morris Piano great part in the control of the Company at Listowel and the comborers, but to be effective what is pany which is purchasing the facploughed under must not be dragged tory for the sale of the factory and up again when cultivating the field, the Morris Piano Company's interbut must be left buried; for if they ests. All arrangements are satisare dragged up many borers will factory, and the necessary papers escape destruction. The cultivation have been signed. It is understood of the field should not be done with the new company intends to start toothed implement, but with a operations in the very near future.

The present Prohibition law has matter has undergone a change, and In the parts of the country where still more because of the recent rather surprising results of plebiscites in the three Prairie Provinces. the Premier of Ontario cannot, in The Sun's opinion, be justly blamed for his decision to give to the electorate another opportunity of passing judgment on the issue.

The questions to be submitted to the electorate have, moreover, the great merit of clearness. The first calls for a straight yes or no as to whether the O. T. A. is to continue or not. That is the vital point on which everything else depends. If cannot be secured in support of the once, as a law which has not public opinion behind it cannot be enforced. The form in which the second question has been framed ·leaves only one possible alternative to Prohibition- sale by Government vendors in sealed packages. WHY PROLONG SUSPENSE?

The Hamilton Herald discussed in this delay, parents had a scant few appeared before him again on a days to plan their families' program for a year. The Herald says. It is sail that the students have caused it by "abuse" of the privilege of part time and of writing or separate subjects. If this is intend ed for an alibi for the department of education, it is not a strong one. We cannot by any stretch of imagination place the whole blame on the students. Theirs to study and take advantage of facilities offered, but assuredly not to organize them. That duty belongs to the provincial government. The department of a majority is polled for maintaining education was "swamped" with exthe Act, Prohibition will remain in amination papers, hence the delay. force as at present. If a majority Why was it swamped? Queen's Park knew how many students law now on the statute book it will would write, and knew vastly more be better to repeal the measure at than the week's notice it is giving the students in return. Forewarned is forearmed, or should be. The time has come when the department itself would benefit by reconsideration of regulations.
