FIGHT THE CORN BORER

How to Deal With This Very **Troublesome Pest**

Plough the Field Thoroughly-Leave Stubble and All Other Remnants Buried-Grow Dent Corn Instead of Flint-Try a Trap Crop.

(Contributed by Ontario Department of Agriculture, Toronto.)

The methods of control are simple, inexpensive and not contrary to good farm practices, says Prof. L. Caesar of the Department of Entomology, Ontario Agricultural College. borers winter over and remain until the end of May in any part of the corn plant above ground large enough to conceal them. Hence they will be found in the stalks, stubble, cobs, or any remnants of the crop left in the ter, bath, furnace, electric lights, field or elsewhere. They will also be to some extent in stout weeds growing among the corn. Control measures, therefore, consist mainly in so treating these that the borers will be destroyed. If there is a silo this C. G. AND BESSIE McGILLIVRAY PURE BRED, ABERDEEN-ANGUS is easy, for all that is necessary then bull calf, six months old. Terms if is to cut the crop low, ensile it, 11 27 3 and not drag it up again when cultivating. The cutting knives and 61423 tf GOOD, MAPLE STOVE WOOD, DRY, fermentation kill all the borers that surface.

Plough the Field Thoroughly.

If there is no silo, or if the silo will not hold all the corn, the task is sometimes a little harder. In such cases the field must be thoroughly ploughed after the crop has been removed. In addition some method must be practiced of disposing of the stalks and ears or cobs. The best plan is to run all of them through a cutting-box or shredder, feed the catmainder into the manure and haul this out and plough it under before the end of May. If for any reason grade gas with the "pep" and long the stalks are fed whole, the uneaten portion should not be thrown out into the manure, but should be kept separate and drawn out and burned. It is better to burn the remnants than to plough them under, because it is hard to cover them completely with the plough. The great point to keep in mind is that no stalks, pieces of stalks or even cobs should be left above ground in the field or along fences or in the barn or the barnyard or anywhere else. Moreover, all burning or ploughing must be completed by the end of May, for otherwise the borers will change into moths, fly around, and lay their eggs. (The moths appear in June and July).

Leave Stubble and Other Remnants

up many borers will escape destruc- lars. If that were not enough, the tion. An example of this occurred this year in a field in Elgin County, where much of the ploughed stubble was dragged up by a toothed cultivator. In this field over 10,000 living borers were found. If the stubble had been left covered almost every borer would have perished. Hence the cultivation of the field should not be done with a toothed implement but with a disc, and a disc drill, if The Durham U.F.O. Live Stock As- possible, used in sowing. Should, sociation will ship stock from Dur- however, some of the stubble be ham on Tuesdays. Shippers are brought up it will pay well, and will

The ploughing should be done with a wide-burrow plough, and should be to a depth of at least six inches. It may be done either in the fall or the spring, but if in the fall the earlier

the better. Often the stubble cannot be covered completely unless it is first rolled or disced, or both rolled and disced, or in some cases unless a split log or leveller is run over it to break it off or loosen or pull it apart. This is especially true when the corn has been planted in hills or has been cut high or beaten down by storms. Grow Dent Corn and Not Flint.

in the parts of the county where the borers are numerous it will be advisable for a time to grow dent corn instead of flint, because it is

It will also help greatly in such places if a trap crop of flint-for example, Smutnose - consisting of the middle of May and the planting chickens, hens and ducks. of the main crop postponed until June 1st or as late as possible with-The undersigned auctioneer has out running any risk. The moths and fed to the cattle and the borers
