# A thousand dollars a mile

The public pays when overloaded trucks break down road surfaces

To prevent the unnecessary destruction of public property, the law provides that during March and April trucks (outside cities and towns) shall not be loaded in excess of one-half of their rated carrying capacity.

When a road is asked to bear a load which is too heavy or driven at too great a speed the surface is broken and the foundation is "churned up." Disintegration follows. Repair costs are often more than \$1.000 a mile.

Water lurks in the foundations of all roads at this season of the year and the surfaces of all gravel and macadam roads are porous and soft.

The Department requests the voluntary co-operation of truck owners and drivers, but this does not affect in any way the enforcement of The Ontario Highways Act. Infractions will be penalized even more rigorously than before.

Maintenance and repair of roads fall largely on the users of the roads. In justice they should fall most heavily on the traffic which does most damage to the roads. That damage will be lessened if each individual truck owner and driver will suit his load and his speed to the conditions of the road, and keep well within the limits of the law.

The Hon. George S. Henry, Minister

S. L. Squire, Deputy Minister

Ontario

Do Not Feed Cream to Calves It is too expensive—yet many farmers feed 20 to 40 cents worth every day without knowing it-simply because their old cream separator does not skim closely and leaves cream in the milk. Cream does not fatten calves-but the sugar and starch in the skim milk does. Feed them skim milk and calf meal at ten cents a pound, not cream at forty. Thirty cents worth of cream wasted a day amounts to \$109.50 in one year and since the average life of a Melotte is twenty years it would save you, on this basis, \$2,190.00. Start saving today by using a Melotte. F. W. MOON We have an interesting booklet
