Problems of the Farm

Contributed by Grey County Department of Agriculture

Hog Grading Campaign

A Hog Grading Campaign is being staged in Grey County beginning this week. Mr. Gavin Barbour, Brantford, the official Hog Grader at that point, was in the County interviewing the shippers and drovers in connection with this matter.

The dates have all been set so that this week the demonstrations will be held at Markdale, Ayton, Durham and Holstein.

All hogs coming to market will be graded that way. If any farmer has none ready, he should come out to see the demonstration and ask questions. Hog Grading is a benefit to the farmer. Learn more about it.

Farmers' Week at the O. A. C.

On June the 12th, all the farmers of Grey County are invited to visit the Ontario Agricultural College, Guelph. Both motor and railway parties will be received.

Plans have been made to serve luncheon at the gymnasium and in the afternoon, to make systematic visits to the Experimental Plots, Animal Husbandry, Poultry and Dairy Departments. All buildings will be open for inspection.

It is hoped that soft ball games will be arranged in the afternoon between counties taking in the excursion. If there are any teams in Grey County willing to go, the Department will arrange for their transportation.

Every farmer, his wife and family, should take a day off and visit this great educational institution, the greatest Agricultural educational institution in Canada.

Demonstration Lecture Course

A circular has just been received by the Department of Agriculture, Markdale, from the Institutes Branch, Parliament Buildings, Toronto.

These Institutes, given in courses for the ladies. That branch is prepared to send instructors in any one or all of the following: Domestic Science, Home Nursing, Millinery and Sewing. It is expected, however, that at least fifteen will sign up to take the last two named courses and twenty-five the first two named. The Grey County Branch of Agriculture commends these courses to the ladies and will do all in its power to assist any organization desiring lecturers.

Kiwanis Farm Boys' Potato Club

The members of the Barrie Kiwanis Club are each donating a bag of potatoes to any farm boy twelve to eighteen years of age, who will take them, promising to keep accurate records of yield, cost of production, etc. and return one bag in the autumn to the donor. It is a fine spirit and is worthy of commendation.

MEAT AND BONE BY-PRODUCTS

Analyses of samples of meat and bone by-products including meat and blood meals, tankage, bone meal and fish meals have been made by the Chemistry Division of the Experimental Farms and the results detailed in bulletin No. 49 of the Department of Agriculture. The analyses show that these feed concentrates are highly nitrogenous and contain a valuable source of protein and bone-making material. The bulletin which is distributed by the Publications Branch of the Department of Agriculture, Ottawa, gives the details of the composition of a number of these materials at present on the market in Canada.

A tablespoonful of vinegar in the first rinse water will brighten the colors in silk and ribbons.

ADVERTISEMENT OF SALE OF CHATTELS

There will be sold by public auction at the McCabe and McLaughlin Garage, Durham, on

SATURDAY, JUNE 6, 1925.

Alex. MacDonald, Auctioneer. 1pd

PROFESSOR KATZ COMING

Professor E. Katz, the noted eyesight specialist of Listowel, is coming again to test your eyes and relieve your eyesight trouble, at the Hahn House, Durham, on Friday, June 5, by the method that seldom fails to relieve eye strain, headache, pain in the temples or that nervous feeling. When the eyes are properly attended, the above trouble is removed.

Consult Dr. Katz while in town. Two-sighted glasses in one piece for \$10.00, worth \$16.00.

L. O. L. MEMBERS NOTICE

LOST

SUNDAY, MAY 24, BETWEEN Guelph and Owen Sound, Small Black Club Bag containing wearing apparel and fishing rod. Reward, Box 12, Chronicle office. 1pd

Hints for the Household

For May

By BETTY WEBSTER

Readers, Note: If you have any questions concerning Recipes, and other Household Hints you would like to ask Betty Webster—address her in care of The Durham Chronicle.

HOUSEHOLD HINTS

A kitchen shower is a nice event to give for a bride-to-be. And really, a girl later is apt to be more grateful for a kitchen shower than any other kind of a party.

Have each guest bring a present for the bride-to-be, suitable for a kitchen. Have them write an appropriate verse to go with each article.

It's nice for the hostess to give a clothes basket, blue bird clothes line and clothes pins. She can stretch them in room, porch or yard, and as guests bring in their presents, she can pin them on the line.

When all is ready—give the bride-to-be the clothes basket and tell her to bring in the clothes. When her basket is full of gifts, have her sit in middle of room and open presents and read verses aloud. If verses have been cleverly written, this will be great fun.

If there is more time before refreshments, pass each person a sized square of cheese cloth and some colored yarn or thread. Have them hem these cloths. They may button hole, overcast or outline them. When finished—fold, place in a neat pile and present the bride with a practical and welcome gift of pretty dust cloths.

(Copyright, 1924, by The Bonnet-Brown Corporation, Chicago)

COOKING HINTS

Spring Fruits

Use as many fruit dishes as possible from now on. There is nothing like fruit to keep the spring menu healthful, tempting and economical. The most popular fruits are strawberries, rhubarb, pineapple, prunes and raisins.

Strawberries, of course, are wonderful. Rhubarb is at its best in the spring, and is considered better than a tonic.

Pineapple is economical and is classed as a most valuable spring fruit.

Prunes are always good and beneficial. Raisins—do not forget the raisins. In food value, they are very high, in food and dessert. They are fine when cooked with rhubarb.

So beginning now and during the coming summer months, eat fruit in some form—three times a day!

Fruit Whip (Uncooked)

1 egg white.
1 cup of fruit pulp.
1 cup sugar.
Little salt.

Method: Beat egg white stiff. Add fruit and sugar. Mix well. Pile lightly in sherbet glasses. Chill.

Serve topped with whipped cream, cherry or strawberry.

Fruit Whip (Baked)

1 egg white.
3 tablespoons fruit pulp.
Sugar.
Little salt.

Method: Beat egg white stiff. Add fruit and sugar. Sometimes a little vanilla. Mix well. Pour into greased baking dish or individual molds. Place in pan of water and bake until set. Serve with whipped cream, plain cream or custard.

BAKING HINTS

Old Fashioned Ginger Cookies
1 cup brown sugar.
1 cup molasses.
1/2 cup of lard.
1 egg beaten.
1 teaspoon ginger.
1 teaspoon salt.
1 teaspoon soda.
1 cup sour milk.
1 1/4 cups flour.

Method: Cream lard, sugar and salt together. Add molasses and ginger. Then egg. Dissolve soda in sour milk. Add—mix thoroughly. Add flour. Drop teaspoons of batter on larded baking sheets. Bake in moderate oven. This makes about 50 cookies. Drop cookies far enough apart to keep them round.

EGG PRESERVATIVES

Cheap Eggs in Winter

Many families, even of farmers and other poultry keepers, have very few eggs to use from October to February when prices are high. It would be easy for them to preserve and store as many as required, if they would but take the trouble to do so, says Gus Langelier, Superintendent, Experimental Station, Cap Rouge, Que.

Experiment at Cap Rouge

In order to secure information regarding the best methods of preserving eggs, an experiment was started in 1916 at the Cap Rouge Experimental Station. Eight methods were tested: 1. Wrapping in paper and leaving undisturbed; 2. Wrapping in paper and turning daily; 3. Packing in oats; 4. Packing in sawdust; 5. Covering with 6. Armstrong paste; 7. Lime water; 8. Waterglass.

Results

It was soon found that the two best methods, by far, were the lime water and the waterglass. These have been continued to date, and very little difference has been found, though different lots of eggs are tested each year by the Dominion Chemist and the Dominion Poultry Husbandman at Ottawa, and by the Superintendent of the Cap Rouge Experimental Station.

Best Methods

Use one pound of good, freshly-burnt quicklime to five gallons of water. Slake the lime with a small quantity of water, just about enough to cover it, and then stir the milk thus formed into the water. Keep well stirred for a few hours, allow to settle, and pour the saturated water over the eggs. With waterglass, use about four pounds in ten gallons of water.

General Advice

All fresh used should be perfectly fresh and, if possible, from flocks having no male birds. The eggs should be completely immersed during the whole period of preservation, and the vessel should be kept covered. The best temperature, though not absolutely necessary, is from 40 to 45 degrees F.

ORGANIZE BENTINCK W. I.

The Bentinck I. O. O. E. was reorganized as a Women's Institute at a meeting on Tuesday at the home of Mrs. Sam Hopkins, with Miss S. Jamieson of Hanover acting as organizer. There was a very good attendance of ladies at the meeting, and 15 became members of the Institute.—Hanover Post.

Most men start out with good intentions, but somebody hands them transfers.

THE NORTHWARD TREND OF AGRICULTURE

An interesting commentary on the agricultural possibilities of the Canadian Northland is furnished by the report of the experimental sub-station at Fort Vermilion, Alberta, for 1923. Fort Vermilion is farther north than any part of Ontario, and at times the thermometer falls to more than 60 degrees below zero. The mean temperature during the crop season ranges from 6 to 10 degrees lower than during the same months at Ottawa.

Wheat seeding began at the sub-station farm on May 7, and nine varieties were sown on test plots. At harvest, they yielded at the rate of from 37 to 59 bushels per acre.

The results of the experiments with potatoes were even more remarkable. It has been found that in the northern regions, early deep planting produces the best results. The seed was planted from May 8 to 10, and one variety yielded as high as 419 bushels per acre. Irish Collier, a well-known variety, produced 339 bushels to the acre.

One variety of garden corn produced a fair percentage of fully matured though rather small cobs. Garden beans were quite successful, and a large number of other common vegetables produced excellent crops in a very short time. In fact, the shortness of time between the dates of seeding vegetables and the dates when they are fit for use is a striking feature of growth in the north country. This rapid growth is made possible by long hours of warm sunshine.

Fine yields of sunflowers for silage were obtained, while the growing period was favorable for hay and a heavy crop harvested.

All these results were obtained under more favorable conditions and by better cultivation than is generally found on farms, yet they show that there is a great field for the northward extension of agriculture.

NOT WORTH FLIVING

Now that Ontario has imposed a three-cent tax on gasoline, life in this province is hardly worth fliving.—Alliston Herald.

WOOL

Twenty-five million pounds of Canadian Wool have been already sold by the Growers' Own Selling Organization.

Your Sales Department handles the Wool of 4,000 Ontario wool growers. Does it handle yours? For your convenience, cars are being loaded at:

DURHAM, Wednesday, June 10th
HOLSTEIN, Thursday, June 11th
MOUNT FOREST, Friday, June 12th
MEAFORD, Monday, June 15th
OWEN SOUND, Tuesday, June 16th
MARKDALE, Wednesday, June 17th
DUNDALK, Thursday, June 18th

Bring your wool to one of these points, or if more convenient, ship it freight collect to WESTON any time.

Wool sacks, paper twine and further particulars from:
Canadian Co-operative Wool Growers, Limited
Toronto, Ont. Weston, Ont. Carleton Place, Ont.
