Problems of the Farm

Contributed by Grey County Department of Agriculture

Farmers' Week at O. A. C.

During the week of June 9, the farmers of Ontario are invited to attend the Ontario Agricultural College. It is the restarting of the old time excursion which used to be so popular. Special rates can be secured on the railroads if a large number goes.

However, the best way is to motor. Your time is your own, and a better opportunity is presented to see the country and more time allowed at the college.

Lunch will be served in the gymnasium, free of charge, at noon. To any arriving early, a special invitation is extended to visit the various departments and see the special exhibits set up for the occasion. Officials will be on hand to answer questions and give full details in connection with their work.

After lunch, a tour of the various farms will leave the gymnasium, conducted by Dr. C. A. Zavitz or his staff, over the plots, and Professor Toole through the barns and stables. Another tour has been arranged for those more interested in horticulture, dairying and poultry.

Ladies' Tour

A tour has also been arranged for the ladies. In charge of one of the lady demonstrators from Macdonald Institute, they will be conducted through the buildings, followed by a trip through the Dairy Buildings where Professor Dean will be in charge, thence to the Poultry Branch where Professor W. R. Graham will have charge.

At four o'clock, ball teams from various centres will provide amusement for those desiring to see them.

Experimental Union Meeting

The Annual Meeting of the Ontario Agricultural and Experimental Union will be held at the Ontario Agricultural College, Guelph, on Friday and Saturday, June 12 and 13.

At that season, the farm and garden crops should present objects of great value. The flowers, shrubs and trees should be very beautiful. Arrangements are being made for making the occasion both interesting and profitable. Practical subjects, such as Alfalfa Growing in Ontario, and Swede Turnips for Table Market are to be discussed. Addresses on rural life are to be given by Canadian and American speakers. The detailed program for the Experimental Union meeting will be issued shortly.

Poultry Culling

A letter has just recently been received from the head of the Poultry Extension Branch, O. A. C., asking the number of Poultry Culling Demonstrations wanted in Grey County. Unfortunately, there are not many applications on hand yet.

The poultry cullers will be in the district during July or early August so any district desiring these demonstrations should write to the Grey County Branch, Department of Agriculture, Markdale. Poultry has assumed wonderful proportions during the past few years. The culling of them has proven an exceptional benefit in discarding the poor layers. Let the O. A. C. poultry experts show you how to do this work. All assistance given is free of charge.

THE ONTARIO PIONEERS

The noble pioneers Who built their log homes! Among the hills and valleys dear, And piled the rocks and stones.

They cleared the noble forests, And tilled the fertile land; They did their work most willingly With ox teams and by hand.

Their good wives and their children Always lent a helping hand, Though many were their hardships They were a happy band.

Their neighbors, who were cheerful, Helped each other with a will, And when their crop was ready, Their little barns did fill.

They did not have high losses then, Nor losses for to pay, Nor lazy unemployed to feed, Who will not work a day.

The rulers did not borrow then, Nor raise their salaries high, Nor run the country on the rocks, Does anyone know why?

QUANTITY PRODUCTION

Ross Loucks, a farmer near Meaford, has four ewes that recently gave birth to thirteen lambs, three sets of triplets and a set of quadruplets.—Wiar-ton Canadian Echo.

CARD OF THANKS

Mrs. Catharine McGrath and family desire to thank their many friends and acquaintances for the kind expressions of sympathy extended to them in the loss of a husband and father. They very especially thank those contributing flowers and spiritual cards.

ANNUAL MEETING

THE ANNUAL MEETING OF THE South-East Grey United Farmers' Association, both co-operative and political will be held in Priceville on Friday, June 12, 1925, commencing at 10:00 a.m. The U. F. W. O. and U. F. Y. P. O. are also affiliated with this association and are invited to attend, ladies to bring lunch. M. E. Murray, Sec.-Treas.

Hints for the Household

For June

By BETTY WEBSTER

Readers, Note: If you have any questions concerning Recipes, and other Household Hints you would like to ask Betty Webster—address her in care of The Durham Chronicle.

HOUSEHOLD HINTS

A June Wedding

The "stylish" time of day for a wedding is late afternoon. No time could be more fitting for a June wedding. And your lawn, large or small, offers a good scene for it.

Follow wedding ceremony with supper. Follow supper with dancing. Use porch for dancing, if large enough. String colored lights on porch and here and there over lawn.

The Bride Must Remember

To Have: "Something old, Something new, Something borrowed, Something blue."

Is your family planning a camping trip? If so, here is a list of necessary provisions to take along for a family of five for one week. That is, if you expect to travel and cook your own meals every day.

List of Provisions

Eggs—2 gallon pail—packed in bran. Bacon—1 slab. Coffee—3 pounds ground. Milk—12 cans of condensed milk. Cereal—3 packages. Butter—5 to 7 pounds.

COOKING HINTS

Cantaloupe Salad

Cantaloupe, French dressing, Lettuce. Method: Halve and seed cantaloupe. Cut off hard skin and all

hard green next to skin. Cut melon meat in cubes. Make your favorite French dressing. Pour dressing over melon cubes. Place in ice box to chill. When ready to serve—fix plates with crisp lettuce "nests." Place melon cubes in "nests" with a little dressing.

BAKING HINTS

Chocolate Whip Cream Roll

5 egg yolks, 5 egg whites, 1/2 cup of sugar, 2 tablespoons of cocoa, Filling, Whipped cream, Sugar, Vanilla, Sauce, (Marshmallow sauce, chocolate sauce or soft frosting).

Method: Beat egg yolks and sugar together until smooth and every grain of sugar has disappeared. Stir in cocoa. Beat egg whites stiff. Fold into mixture. Pour into good sized shallow pan to about an inch thickness—same as for a jelly roll. Bake slowly about 50 minutes. Turn out on paper covered with sifted powder sugar. Cool. Spread with sweetened whipped cream and roll like a jelly roll. When you serve, place on platter and pour over preferred sauce.

WOOD THAT DOES NOT ROT

Accustomed as we are in this country to seeing fallen trees decay and turn into mould in the course of a few years, we are surprised to learn that the redwood of California may lie upon the ground for hundreds of years and remain perfectly sound. There may be conditions under which it will decay, but in its native climate and soil, it has been found to withstand for centuries the attacks of wind and weather after it had fallen upon the ground. Evidently there are no insects which care to bore into it.

Recently there was discovered in Humboldt County, California, the trunk of a giant redwood on which there were growing many trees of various size. The fallen redwood was ten feet in diameter near the root, and it ran a length of 185 feet where the stem had broken when it fell. Evidently it had been blown down by the wind as it was uprooted. As the years passed, the upper surface was covered with the leaves and branches falling from other trees, until by-and-by, this formed a suitable soil for seeds to take root and grow in, and now it supports eleven good-sized trees—nine western hemlocks and two spruce. One of the spruce trees is 5 feet and one inch in diameter and about 170 years old. A hemlock is 25 inches through and estimated to be 180 years old. The roots of these trees pass down either side of the big redwood and reach the ground. Borings made into the redwood show that the wood is perfectly sound, although the trunk must have lain there at least 200 years. A ring-count showed that this ten-foot tree was about six-hundred years old when it was uprooted by an unusual blast.

Another smaller redwood was discovered, this one a little over six feet in diameter, which supported three hemlocks, aged respectively 235, 250 and 340 years. This fallen tree was also quite sound, although it must have fallen about the time that Columbus first landed in America.

TWENTY YEARS AGO

No one swatted the fly. No one had appendicitis. Cream was ten cents a pint. Cantaloupes were muskmelons. Milk shakes were a favorite drink. Advertisers did not tell the truth. You never heard of a "tin Lizzie." Doctors wanted to see your tongue. The hired girl drew one-fifty a week. No one "listened in" on the telephone. No one cared about the price of gasoline. Straw stacks were burned instead of baled. Jules Verne was the only convert to the submarine. The butcher threw in a piece of liver. (Watch him now.) You stuck tubes in your ears to hear a phonograph, and it cost you a dime.

TIDAL WAVE AT OWEN SOUND

On Friday evening, May 22, tidal waves occurred on Lake Huron and Ontario, due to storms. At Owen Sound, the water in the bay and harbor gradually receded then came

back more rapidly than it went out. It was lowered about five feet below normal and rose six or seven feet above the usual height. Fish were left high and dry and boats were stranded. When the flood came back, special precautions had to be taken to prevent damage, and boys picking up fish had to get to safety or meet the fate of Pharaoh and his hosts in the Red Sea.

How Strange!

A youthful barrister looked rather contemptuously at a simple-looking agricultural laborer in the witness-box, evidently regarding the rustic as too "fry fry" for his cross-examining skill. However, he began, "Have you ever been married?"

The witness, who stammered, said that he had once. "And whom did you marry?" "A w—w—woman, sir." The barrister turned to one of his conferees and murmured, "Village idiot. Come, come, my good man," he said to the witness, "of course it was a woman! Did you ever hear of anyone marrying a man?" "Yes sir; please, my sister did," was the reply, and the "village idiot" was troubled no further.

WOOL

Twenty-five million pounds of Canadian Wool have been already sold by the Growers' Own Selling Organization. Your Sales Department handles the Wool of 4,000 Ontario wool growers. Does it handle yours? For your convenience, cars are being loaded at:

DURHAM, Wednesday, June 10th HOLTSTEIN, Thursday, June 11th MOUNT FOREST, Friday, June 12th MEAFORD, Monday, June 15th OWEN SOUND, Tuesday, June 16th MARKDALE, Wednesday, June 17th DUNDALK, Thursday, June 18th

Bring your wool to one of these points, or if more convenient, ship it freight collect to WESTON any time.
