Fashion's Allurements

Mrs. Roffe was reading the evening paper when she suddenly laid it down and remarked to her husband: "Just fancy, Albert! I see in the paper here that a woman, in looking after another woman to see what she had on, fell out of a window."

"Well, Marie," replied her husband, "that only goes to show that some women, in trying to follow the fashions, can go too far."

Our virtues always look larger to ourselves than anyone else.

Experience cannot be bought on credit.

Train 300 Miles Long to Carry Crop

(Right)—Thrashing time on the prairie. (Left)—Freight trains in readiness at Winnipeg for immediate service. (Bottom)—A grain elevator at Montreal.

Stationed at the Transcona yards, Winnipeg, and at strategic points throughout the Prairie Provinces, the Canadian Pacific Railway has 35,000 boxcars standing ready for the transportation of the 1925 crop. Of these over 3,000 cars are at the Winnipeg yards. To move this immense aggregation 650 freight and 150 switch engines will be required.

Were they all to be joined up into one train and if we further suppose that this train were moving at twenty miles an hour over a level crossing, a motorist who arrived there just as the first engine reached the crossing, would have to wait fifteen hours until the caboose passed across. This would indeed be a case where "taking a chance" would almost be justified.

Each boxcar is from 36 to 40 feet in length or an average of 38 feet. Allowing a space between each of four feet and taking into consideration also the 650 engines each ninety feet long, the total length of this great train would be about 290 miles which at twenty miles an hour would take close on fifteen hours to pass a given point.

The carrying capacity of a boxcar is about 1,500 bushels of wheat and this would take care on the first movement of the above imaginary train of 52,500,000 bushels. Since the train in its individual movements will travel several times, an idea of what proportion of the 1925 crop, estimated at 375,000,000 bushels the Canadian Pacific Railway will carry, is indicated.

Among the engines used in the hauling of the wheat trains are some of the most powerful in the world. Reckoning in the weight of coal carried, the heaviest of these engines weighs about 330,000 lbs. while the boxcar, loaded with grain, weighs 140,000 lbs. The average grain train is composed of forty boxcars, so the weight is about 6,000,000 lbs. or 3,000 tons. The total number of such trains would be 875 which would give a total weight of 2,625,000 tons.

Cutting of the crop is already under way and movement of the grain will commence about the end of August and will continue until the close of navigation on the Great Lakes which is generally between the 16 and 15 December. During the banner crop year of 1923, the Canadian Pacific Railway operated in connection with the movement of the grain approximately 5144 trains and 25,720 men were required to handle the traffic. In that year the Canadian Pacific Railway moved 220,000,000 bushels.

Discovery of a deposit for the production of hydrated lime has been made near Perth and is in such quantity as to justify steps being taken to form a company for the developing of the ore. Handicapped A philanthropic man in the Middle West was once approached by a person so utterly disreputable in appearance that any but the kind-hearted man himself would have had him ejected from the office. "Can't you find any work at all?" asked the good man when he heard the other's capital of his woes. "I can find work all right," said the seedy individual. "Plenty of it, but everybody wants references from my last employer." "And cannot you get those references from him?" "No, sir; he's been dead for fifteen years."

YOU'RE WEALTHY

Don't worry just because you're poor; If you were rich, you'd worry more— That's certain.

You get three square meals a day; You couldn't eat more anyway— "Thout hurtin'."

Don't think fates have been unkind; There's many millionaires you'll find— Complainin'.

There's lots of men with so-called means Who'd like to wear your old blue jeans "Thout strainin'."

You fellows in your working clothes Can shake 'em when the whistles blows "Thout frettin'."

The boss with dollars to your dime; You bet he's working overtime— And sweatin'.

There's them who'd give up every sou If they could stand up strong like you And healthy.

You've got your children and your wife, You've love and happiness and life— You're wealthy.

—George W. Stevens.

THE REAL GOOD

"What is the real good?" I asked in musing mood. "Order," said the law court; "Knowledge," said the school; "Truth," said the wise man; "Pleasure," said the fool; "Love," said the maiden. "Beauty," said the page; "Home," said the sage; "Fame," said the dreamer; "Equity," said the seer— Spake my heart full sadly; "The answer is not here." Then within my bosom, "Each heart holds the secret— Kindness is the word." —John Boyle O'Reilly.

RANDOM RHYMES

(W. H. Currie) Here lies whals left of PHILBERT A Who let his Camp Fire get away. Though PHIL ran fast, the fire ran faster. And PHILBERT shared in the disaster.

Old SILAS K. was level-headed And fire at HOME he'd always dreaded. But in the WOODS, he'd clean forget That Fire is Fire, WHEREVER met!

A sprightly dame was MINNIE MAY, "Ain't Nature just too sweet," she'd say. The picnic fire that MIN forgot Burnt off a forty acre lot.

Said ANDY GUMP, "I like it rough, I like this red-blood backwoods stuff!" Then lit his fire against a stump— For such a man was ANDY GUMP.

Young GEOFFREY J. Loved Nature well, "B'gosh," he'd say, "ain't Nature swell!" Then toss his glowing stubs around And burn the Forest to the ground.

"This is the life," cried CEDRIC G. "To eat beneath the greenwood tree!" But what a mess he left behind, Of cans and crusts and bacon rind.
