been appointed, or was taking evi-dence, and you will note that the For ins when chilled beef is shipped from similar commodity, and it is always canada, the British buyers insist harder to get them back. on classing it as imported beel. Can-adian chilled beef should properly trols 52 per cent of all produce on classing it as imported beef. Canbe looked upon by the Englishman shipped into the British Isles and shipped into the British Isles and commands at least fifteen per cent

Committee to set forth the possibil-Committee to set forth the possibil-ities of Canada as a producer of our logical market, it being so geomeat for Great Britain."

Marketing the National Problem

Marketing holds the centre of the stage in the farmer's problem. Practically all the attention of the Committee for the past year has been given to it. The most definite conclusions that could be arrived at are included in the present report.

These recommendations, servicea—

distributing centre for all Europe. To give you some idea of the volume in some commodities, I may just say that England in eggs alone last year imported twenty-one million pounds sterling of eggs.

My suggestions as to marketing and standardization are as follows:

Establish a clearing house organ—

ble in themselves, and as far as they go, all lead up to the national plan of marketing suggested last year.

All countries of the modern world he home killed supply.

Now I do not mean "frozen" beef inate waste and realize economy

gentine, which is all classed as an While I have said we are behind inferior grade and brings a much some other countries in co-operalower price, but I mean "fresh" tive marketing, we must admit there beef, that should bring the very has been progress, and already one-half of the 6 cents difference Wheat Pool, the Grain Growers We made a number of communi- which we had an opportunity of
