WOOD ALCOHOL POISONING

By DR. ARTHUR L. FORSTER

Note: Dr. Forster will answer such health questions in these columns as will be of interest to others and permissible in public print. Personal questions will be answered only when accompanied by self-addressed and stamped envelope. Address Dr. Arthur L. Forster in care of The Durham Chronicle.

Wood alcohol-chemically known as methyl alcohol in distinction to grain or ethyl alcohol—has for years Commission, also read his report to paying of a number of accounts. been employed in the arts and industries, and has been responsible for many cases of fatal poisoning.
