PREMIER JOHN OLIVER

PENTECOSTALISM GAINS INFLUENTIAL CONVERTS

Rev. John Roach Straton, the fundamentalist pastor of New York City displays surprising agility in keeping himself on the front page of the newspapers, and thrives on the advertising. His most recent exploit has been the introduction of what is called "Pentecostalism" in the Galvry Baptist Church, which led to the resignation of five of his trustees by way of protest. The incident is chiefly interesting as showing how even leading religious denominations are being influenced by practices which until recently were confined to small and obscure cults. "The Assemblies in God," as the chief organization is called, is said to have a membership of three million members scattered throughout the world. Formed fifteen years ago in St. Louis, it later moved to Springfield, Mo., where it maintains a mother church and a large training school for its ministers, of whom there are 500 in the United States and Canada and another thousand in other parts of the globe. There is one branch, we believe, in Toronto, where the strange practices of Pentecostalism can be witnessed by the curious or indulged in by the converts.

A Venerable Practice

There have been outbursts of Pentecostalism throughout the ages ever since the founding of the Christian religion, all inspired by passages in the New Testament, which describe the conversion of Saul of Tarsus and the gift of tongues which descended upon the early disciples. The belief of the Pentecostals is that on certain occasions worshippers will be miraculously endowed with the gift of speaking in languages unknown to them before and in these languages make prophetic utterances, not to say, scientific, investigation has failed to verify any of these claims, except those recorded in Holy Writ, although there have been numerous examinations of them. One of the best known cases is recorded in a pamphlet published in 1707, when John Lacey, of England, told how the messages which came to him were not of a modern science sort in the account a first-class description of psycho-pilepsy. He does not furnish the text of his outgivings, but it seems probable that, since he had a fair knowledge of Latin and Greek, words in these languages would appear in his unknown gibberish.

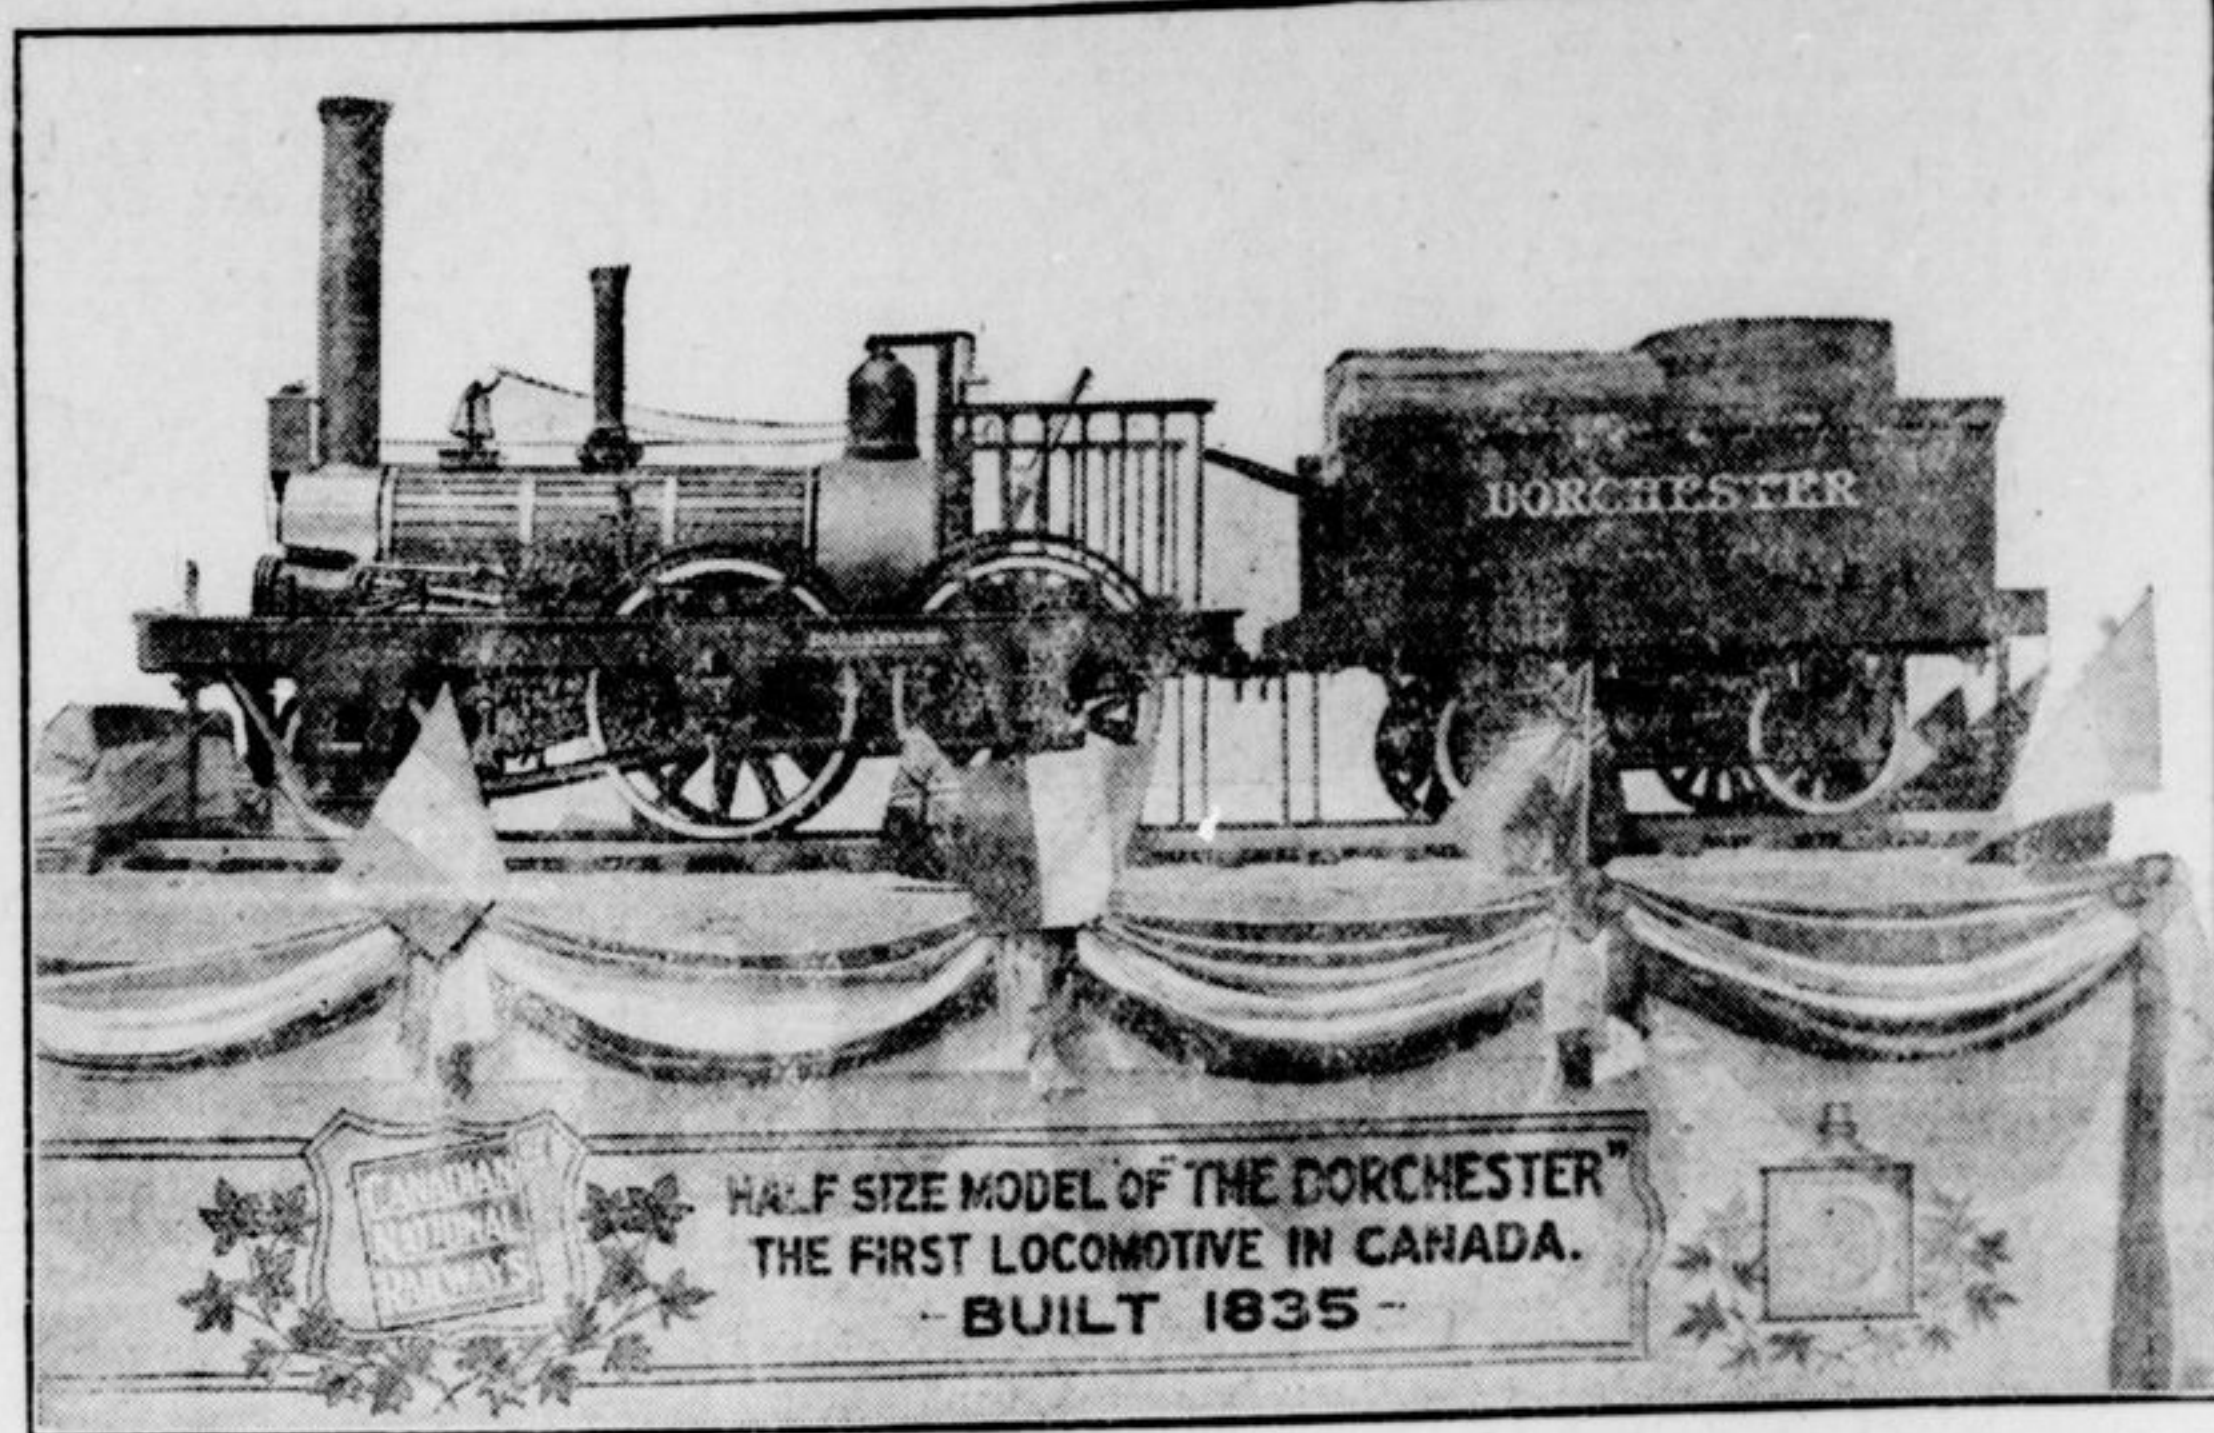

Mysteries Explained

A more recent case was observed in the glad Tidings Mission, New York, by John W. Harrington, who reports it in the New York Herald Tribune. A comely young woman of Swedish extraction was prone to deliver herself of what she deemed an important message, but in syllables which nobody present could understand. Some of it was recorded and later on submitted to the late Prof. James W. Hyslop, who was not only a well known investigator of psychic phenomena, but a good linguist. After consulting the authorities he pronounced it automatic gibberish, a string of meaningless syllables in which at regular intervals was inserted the Swedish word for seven. Another case which at the time was considered a genuine marvel was that of a Swedish girl who in her delirium spoke in classical languages. Linguists who were called to her bedside took down her curious ravings and found that they consisted largely of Latin and Greek quotations, flawlessly grammatical and correctly pronounced. The wonder was somewhat dissipated when it appeared that she had for years been employed by a college professor who used to read Greek and Latin aloud. Subconsciously her memory had retained the sounds of whose meaning she knew nothing.

The Second Coming

A leading Pentecostal disciple said that African was what he spoke the last time he had the gift. He became aware of this when, after coming out of the trance, he was told that he had repeated the word "on-to-du-ah" several times, and that this turned out to be, on the authority of a missionary who was present, the name of an African village. A puny gift, it appears to us, unless it might be expanded in Tin Pan Alley. It appears also that while some of the speakers at these linguistic orgies are inspired to speak, others are equally inspired to translate what they say, both speakers and translators being previously ignorant of the languages spoken. It was said the other day that the Chinese converts often speak in French or German, and that their message is to the effect that the second coming of the Lord is at hand. This message has been repeated so often that it may be as confidently expected as the morning in of some departed Indian chieftan at a spiritist seance.

Canada's First Locomotive Reproduced

HALF SIZE MODEL OF THE DORCHESTER THE FIRST LOCOMOTIVE IN CANADA. - BUILT 1835 -

The "Dorchester" was the name of the first locomotive placed in service in Canada and it was in use on the Champlain and St. Lawrence Railroad, built in 1835 and connecting Laprairie and St. Johns, Quebec, a distance of 16 miles. The "Dorchester" was built in England by the

Stephensons. The original line now forms part of the Canadian National Railways system.

On the occasion of the annual procession of the St. Jean Baptiste Society at Montreal where a series of floats representing historical subjects

were featured, the "Dorchester", built at the Point St. Charles shops of the Canadian National Railways, was seen. Afterwards the reincarnation of the first Canadian locomotive appeared in the Diamond Jubilee parade at Ottawa.

HOW TO USE CHEESE

No fewer than 38 ways in which to make cheese can be used in making savory dishes are given in Miss Helen G. Campbell's pamphlet on "Why and How to Use Cheese" issued by the Dairy and Gold Storage Branch of the Dominion Department of Agriculture. It is learnt from the pamphlet that there are 250 varieties of cheese in the world and that the first cheese factory in Canada was established in Oxford County, Ont., in 1864 and the second in Missisquoi county Que., in the following year. A great deal of interesting information is also given in the publication regarding the value of cheese as a diet and on its economy in use. While not recommended in quantity for young children or in-

valids cheese for older boys and girls as well as adults in ordinary state of health is, Miss Campbell points out, one of the best muscle builders and one that is entitled to a larger place in our menus. By some people the digestibility of cheese is doubted, but when eaten with bread or other starchy food such as potatoes or macaroni, it forms a most satisfactory diet and is not difficult to digest. It is better used as a main dish followed by a light dessert than at the end of a heavy meal, which is often the custom.
